Nuer A Description Of The Modes Of Live:

The Nuer, a Description of the Modes of Livelihood and Political Institutions of a Nilotic People Edward Evan Evans-Pritchard, 1968 Handbook of Ethnography Paul Atkinson, Sara Delamont, Amanda Coffey, John Lofland, Lyn Lofland, 2007-04-25 I wish the Handbook of Ethnography had been available to me as a fledgling ethnographer I would recommend it for any graduate student who contemplates a career in the field Likewise for experienced ethnographers who would like the equivalent of a world atlas to help pinpoint their own locations in the field Journal of Contemporary Ethnography No self respecting qualitative researcher should be without Paul Atkinson's handbook on ethnography This really is encyclopaedic in concept and scope Many big names in the field have contributed so this has to be the starting point for anyone looking to understand the field in substantive topic theoretical tradition and methodology SRA News Ethnography is one of the chief research methods in sociology anthropology and other cognate disciplines in the social sciences This Handbook provides an unparalleled critical guide to its principles and practice The volume is organized into three sections The first systematically locates ethnography firmly in its relevant historical and intellectual contexts The roots of ethnography are pinpointed and the pattern of its development is demonstrated The second section examines the contribution of ethnography to major fields of substantive research The impact and strengths and weaknesses of ethnographic method are dealt with authoritatively and accessibly The third section moves on to examine key debates and issues in ethnography from the conduct of research through to contemporary arguments The result is a landmark work in the field which draws on the expertise of an internationally renowned group of interdisciplinary scholars The Handbook of Ethnography provides readers with a one stop critical guide to the past present and future of ethnography It will quickly establish itself as the ethnographer's bible Islam & Ethnicity in Northern Kenya & Southern Ethiopia Günther Schlee, Abdullahi A. Shongolo, 2012 A study of the longue dur e of a marginalized part of northern Kenya examining the process of territorialization and the role of Islam in politicizing ethnicity **Visual Methods in Social Research** Marcus Banks, 2001-05-01 There has been an explosion of interest in visual culture coming largely from work in sociology anthropology and cultural studies and while there are a number of practical and technical manuals available for film photographic and other visual media there is a dearth of writing that combines both the practical and the technical This book redresses this with a balanced approach that is written primarily for students in the social sciences who wish to use visual materials in the course of empirical qualitative field research It should also be of interest to experienced researchers who wish to expand their methodological approaches *Live Stock and Dead Things* Hannah Chazin, 2024-12-20 Reconceptualizes human animal relationships and their political significance in ancient and modern societies In *Live Stock and Dead Things* Hannah Chazin combines zooarchaeology and anthropology to challenge familiar narratives about the role of nonhuman animals in the rise of modern societies Conventional views of this process tend to see a mostly linear

development from hunter gatherer societies to horticultural and pastoral ones to large scale agricultural ones and then industrial ones Along the way traditional accounts argue that owning livestock as property along with land and other valuable commodities introduced social inequality and stratification Against this Chazin raises a provocative question What if domestication wasn't the origin of instrumentalizing nonhuman animals after all Chazin argues that these conventional narratives are inherited from conjectural histories and ignore the archaeological data In her view the category of domestication flattens the more complex dimensions of humans relationship to herd animals In the book's first half Chazin offers a new understanding of the political possibilities of pastoralism one that recognizes the powerful role herd animals have played in shaping human notions of power and authority In the second half she takes readers into her archaeological fieldwork in the South Caucasus which sheds further light on herd animals transformative effect on the economy social life and ritual Appealing to anthropologists and archaeologists alike this daring book offers a reconceptualization of human animal relationships and their political significance

Modes of Thought Wolfgang Iktentscher, 2004 The Leiden Tradition in Structural Anthropology Ridder, Karremans, 2023-07-31 **The Publishers' Trade List Annual**, 1965 **The Leiden Tradition in Structural Anthropology** Rob de Ridder, Rob Ridder, Jan A. J. Karremans, 1987 *Explaining Social Life* John Parker, Hilary Stanworth, 2017-09-16 This distinctive text makes social theory accessible to and usable by students Whereas social theory is often seen as abstract esoteric and separate from our understanding of the social world here it is shown to be a flexible and practical resource for anyone wanting to explain social phenomena This expanded and updated second edition actively encourages readers to develop and practice their own capacities for social explanation Providing readers with a powerful tool kit of five social theoretical concepts Individuals Nature Culture Action and Social Structure that are fundamental to social explanation Drawing on a historically and geographically wide range of examples of social phenomena to show how these theoretical concepts operate and why they're important Offering end of chapter questions that enable readers to put theory into practice and begin theorising for themselves *Explaining Social Life* is ideal for anyone interested in social theory including students of sociology anthropology and related social sciences both those engaging with social theory for the first time and more advanced students looking to build upon their understanding

distinguished anthropologists Fredrik Barth Andre Gingrich Robert Parkin and Sydel Silverman to mark the foundation of the Max Planck Institute for Social Anthropology this volume not only traces the development of each tradition but considers their impact on one another and assesses their future potentials Moving from E B Taylor all the way through the development of modern fieldwork Barth reveals the repressive tendencies that prevented Britain from developing a variety of anthropological practices until the late 1960s Gingrich meanwhile articulates the development of German anthropology paying particular attention to the Nazi period of which surprisingly little analysis has been offered until now Parkin then assesses the French tradition and in particular its separation of theory and ethnographic practice Finally Silverman traces the formative influence of Franz Boas the expansion of the discipline after World War II and the fault lines and promises of contemporary anthropology in the United States
