School Library Journal ,2004 **Beaufort Sea Planning Area Proposed 1996 Oil and Gas Lease Sale 144, Alaska Outer Continental Shelf (OSC)** ,1996 *Count God In* Loren F. Bliese,2018-03-09 This study of Song of Songs uncovers many patterns related to the numerical value twenty six and related numbers for the divine name YHWH Patterns are so unique that they clearly show authorial intent They involve the numerical value of root forms of words their sequences and their totals in the book The beloved man is highlighted by special patterns which indicate that a typology for God is intended Deer names in the refrain have number patterns that confirm intention for being circumlocutions for divine names The disputed presence of the divine name YH in 8 6 is confirmed by the value of its full word One of the most striking patterns found with the help of a computer is that the totals of root words are all arranged to point to theological numbers in a beautiful intricacy Besides describing these patterns this study discusses numerical competence within a proposed Hebrew literary circle and what steps they might have gone through to create these amazing phenomena These theological numbers confirm intentionality for allusions to the Hebrew Bible and support a hermeneutic of spiritual applications A literary analysis of each poem focuses on the use of numbers among other features of prominence **Imperial Irrigation District Water Conservation and Transfer Project and Draft Habitat Conservation Plan** ,2002 **River** Leslie Day,2025-11-15 Leslie Day s life changed forever when in 1975 she moved to a tiny houseboat on the Hudson River at the 79th Street Boat Basin a new home umbilically tied to Manhattan s Upper West Side In her heartfelt memoir *River* Day reveals how she fell in love with and married her neighbor a biology professor at Brooklyn College became a naturalist educator and author and raised her son on the boat As Day invites readers into the intimate and connective stories of the singular floating community on the river the histories and the people of the Hudson flow along with the tides and currents of Day s life There are stories of those who polluted the river and of those who fought for it to be clean and safe stories of how Day became a student and teacher of the river and of the plants and animals she grew to know and love Challenges and celebrations have their own place too storms sinkings fires and ice fields as well as weddings birthdays holidays and found families A unique look at life on and of the Hudson River is a love letter to New York City its famous waterway and the environment around us and the people who shape it **Measures of Community Resilience for Local Decision Makers** National Academies of Sciences, Engineering, and Medicine,Policy and Global Affairs,Resilient America Roundtable,Committee on Processes and Objectives for Community Measures of Resilience,2017-03-16 The 2012 National Research Council report *Disaster Resilience A National Imperative* identified the development and use of resilience measures as critical to building resilient communities Although many kinds of resilience measures and measuring tools have and continue to be developed very few communities consistently use them as part of their planning or resilience building efforts Since federal or top down programs to build resilience often yield mixed results bottom up approaches are needed but are often difficult for communities to implement alone A major

challenge for many communities in developing their own approaches to resilience measures is identifying a starting point and defining the process Other challenges include lack of political will due to competing priorities and limited resources finite time and staff to devote to developing resilience measures lack of data availability and or inadequate data sharing among community stakeholders and a limited understanding of hazards and or risks Building on existing work the National Academies of Sciences Engineering and Medicine organized a workshop in July 2015 to facilitate the exchange of knowledge and information about ways to advance the development and implementation of resilience measures by and within diverse communities Participants worked to gain a better understanding of the challenges these communities face in the pursuit of resilience and determine whether the approach used during this workshop can help guide communities in their efforts to build their own measures of resilience This publication summarizes the presentations and discussions from the workshop
