Harmony and Dissent R. Bruce Elder, 2010-04-22 R Bruce Elder argues that the authors of many of the manifestoes that announced in such lively ways the appearance of yet another artistic movement shared a common aspiration they proposed to reformulate the visual literary and performing arts so that they might take on attributes of the cinema The cinema Elder argues became in the early decades of the twentieth century a pivotal artistic force around which a remarkable variety and number of aesthetic forms took shape To demonstrate this Elder begins with a wide ranging discussion that opens up some broad topics concerning modernity's cognitive and perceptual regime with a view to establishing that a crisis within that regime engendered some peculiar and highly questionable epistemological beliefs and enthusiasms Through this discussion Elder advances the startling claim that a crisis of cognition precipitated by modernity engendered by way of response a peculiar sort of pneumatic spiritual epistemology Elder then shows that early ideas of the cinema were strongly influenced by this pneumatic epistemology and uses this conception of the cinema to explain its pivotal role in shaping two key moments in early twentieth century art the quest to bring forth a pure objectless non representational art and Russian Suprematism Constructivism and Productivism

Auditing Corporate Surveillance Systems Isabel Wagner,2022-03-31 News headlines about privacy invasions discrimination and biases discovered in the platforms of big technology companies are commonplace today and big tech s reluctance to disclose how they operate counteracts ideals of transparency openness and accountability This book is for computer science students and researchers who want to study big tech s corporate surveillance from an experimental empirical or quantitative point of view and thereby contribute to holding big tech accountable As a comprehensive technical resource it guides readers through the corporate surveillance landscape and describes in detail how corporate surveillance works how it can be studied experimentally and what existing studies have found It provides a thorough foundation in the necessary research methods and tools and introduces the current research landscape along with a wide range of open issues and challenges The book also explains how to consider ethical issues and how to turn research results into real world change

Conference Record ,1972 **Engineers of Happy Land** Rudolf Mrázek,2002 Based on close reading of historical documents poetry as much as statistics and focused on the conceptualization of technology this book is an unconventional evocation of late colonial Netherlands East Indies today Indonesia In considering technology and the ways that people use and think about things Rudolf Mr zek invents an original way to talk about freedom colonialism nationalism literature revolution and human nature The central chapters comprise vignettes and take up in turn transportation from shoes to road building to motorcycle clubs architecture from prison construction to home air conditioning optical technologies from photography to fingerprinting clothing and fashion and the introduction of radio and radio stations The text clusters around a

group of fascinating recurring characters representing colonialism nationalism and the awkward inevitable presence of the European cultural intellectual and political avant garde Tillema the pharmacist author of Kromoblanda the explorer engineer IJzerman the Javanese princess Kartina the Indonesia nationalist journalist Mas Marco the Dutch novelist Couperus the Indonesian novelist Pramoedya Ananta Toer and Dutch left wing liberal Wim Wertheim and his wife In colonial Indies as elsewhere people employed what Proust called remembering and what Heidegger called thinging to sense and make sense of the world In using this observation to approach Indonesian society Mr zek captures that society off balance allowing us to see it in unfamiliar positions The result is a singular work with surprises for readers throughout the social sciences not least those interested in Southeast Asia or colonialism more broadly

New Trends and Developments in Automotive System Engineering Marcello Chiaberge,2011-01-08 In the last few years the automobile design process is required to become more responsible and responsibly related to environmental needs Basing the automotive design not only on the appearance the visual appearance of the vehicle needs to be thought together and deeply integrated with the power developed by the engine The purpose of this book is to try to present the new technologies development scenario and not to give any indication about the direction that should be given to the research in this complex and multi disciplinary challenging field

Cultural Specificity in Transnational Television Drama Elke Weissmann,2025-08-08 Cultural Specificity in Transnational Television Drama examines two European television industries those of Germany and Wales This book analyses how near global shifts towards the fragmentation of audiences the convergence of media and the transnationalisation of the television industries impact in culturally specific ways It shows that these larger developments in the industries intersect with specific local histories and cultures which influence how the changes are experienced and what kind of stories they lead to Offering a comparative cultural analysis of these two industries and their output and drawing on a variety of methods which include interviews analysis of published interviews in the trade and other press some archival research and textual analysis this book shows that the global shifts in television impact in locally specific ways which implies a continuation and indeed exaggeration of existing cultural differences at the same time as we see increasing collaboration internationalisation and as a result also homogenisation between nations This book presents a unique emphasis on both transnationalising and localising tendencies highlighting the need to maintain analytical focus on the nation in this supposedly post national world It will be of particular interest to scholars and researchers in contemporary television landscape literary and film studies modern languages philosophy and economics

The Medical Record George F. Shrady,2024-05-09 Reprint of the original first published in 1875 Finishing the Race Human History, Life, and Race before Us Plammoottil V. Cherian,2023-08-29 **FINISHING THE RACE** Stimulating theological and packed with fascinating historical details of Human Race from a Biblical

perspective author s lively tour of the entire Bible traces the origin of human race from one man whose progeny spread to the entire earth filled the earth established their nations with set boundaries Author establishes the historical account of creation challenging the concept of Darwinian Evolution which claims man is an evolutionary product Author stresses that there is only One God who created the universe the cosmos the planets stars life and the multitude of living species of organisms with the command endowed in their DNA when God said to herbs plants and animals to multiply according to its kind according to their kind which is the basis for biological variation and speciation Whereas God s command to human beings was Be fruitful and multiply fill the earth and subdue it meaning there is only one single race of humanity Author has a profound Christian vision of humanity s temporal and eternal destiny and thus he relates in *Finishing the Race* In an age when truth is relative and vanishing conscience the nations are the crossroads confused about the true direction as nations are estranged from God The present culture is as in the Days of Noah quoting Jesus and citing world events and conditions as signs of the end An end time scenario of world and the second coming of Christ when a northern and a southern army will clash in fierce battle over Jerusalem the Holy City of God the capital of the Messianic Kingdom Not claiming any superiority like many of the past and famous scientists like Galilei Galileo Blaise Pascal Isaac Newton Louis Pasteur Robert Boyle etc Cherian attempt to convince his readers God is in control of human and world affairs and natural events Heaven and hell are not mysterious realms of imagination but true physical entities invisible to human eyes and calls the nations to submit to God who only is the answer to national and global unrest that we see now Scientific Papers: 1887-1892 John William Strutt Baron Rayleigh,1902
