stick and here in Making Numbers Count he outlines specific principles that reveal how to translate a number into our brain's language. This book is filled with examples of extreme number makeovers: vivid before and after examples that take a dry number and present it in a way that people click in and say "Wow now I get it." You will learn principles such as SIMPLE PERSPECTIVE, CUES, researchers at Microsoft found that adding one simple comparison sentence doubled how accurately users estimated statistics like population and area of countries, VIVIDNESS: get perspective on the size of a nucleus by imagining a bee in a cathedral or a pea in a racetrack which are easier to envision than 1/100,000th of the size of an atom, CONVERT TO A PROCESS: capitalize on our intuitive sense of time: 5 gigabytes of music storage turns into 2 months of commutes without repeating a song, EMOTIONAL MEASURING STICKS: frame the number in a way that people already care about: that medical protocol would save twice as many women as curing breast cancer. Whether you're interested in global problems like climate change, running a tech firm or a farm or just explaining how many Cokes you'd have to drink if you burned calories like a hummingbird, this book will help math lovers and math haters alike translate the numbers that animate our world, allowing us to bring more data more naturally into decisions in our schools, our workplaces and our society.

Irish Elections 1948-77: Results and Analysis Michael Gallagher, 2019-06-04 This book is the second in the series Sources for the Study of Irish Politics which is produced by the Political Studies Association of Ireland (PSAI). The aim of the PSAI is to promote the professional study of politics in and of Ireland and the aim of the series is to make more widely available material that is at present difficult to obtain. Building on its predecessor Irish Elections 1922-44: Results and Analysis 1993, this volume assembles the full results of all elections to Dáil Éireann from 1948 to 1977. The book also contains analysis of each election, summaries of votes, percentages and seats for each election, lists of TDs, members of parliament elected at each election, information on defeated TDs and women TDs, analysis of transfer patterns, members of government appointed after each election and the full results of all by-elections held in the period. It also provides summary results of the nine general elections of the period 1981-2007 along with a comprehensive list of TDs. 1922-2008 Elections to Dáil Éireann are held under the PR-STV single transferable vote electoral system and this volume provides a fascinating account of PR-STV in operation as well as constituting an indispensable record of Irish political history over the middle years of the independent state.

Building the Foundation: Whole Numbers in the Primary Grades Maria G. Bartolini Bussi, Xu Hua Sun, 2018-03-29 This twenty third ICMI Study addresses for the first time mathematics teaching and learning in the primary school and pre school setting while also taking international perspectives socio cultural diversity and institutional constraints into account One of the main challenges of designing the first ICMI primary school study of this kind is the complex nature of mathematics at the early level Accordingly a focus area that is central to the discussion was chosen together with a number of related questions The broad area of Whole Number Arithmetic WNA including operations and relations and arithmetic word problems forms the core content of all primary mathematics curricula The study of this core content area is often regarded as foundational for later mathematics learning However the principles and main goals of instruction on the foundational concepts and skills in WNA are far from universally agreed upon and practice varies substantially from country to country As such this study presents a meta level analysis and synthesis of what is currently known about WNA providing a useful base from which to gauge gaps and shortcomings as well as an opportunity to learn from the practices of different countries and contexts
