The ancient Greek world consisted of approximately 1 000 autonomous polities scattered across the Mediterranean basin and each one developed its own unique set of socio political institutions and social practices The Oxford History of the Archaic Greek World offers twenty one detailed studies of key sites from across the Greek world between c 750 and c 480 BCE a crucial period when much of what is now seen as distinctive about Greek culture emerged All the studies in this seven volume series use the same structure and methodology so that readers can easily compare a wide range of Greek communities The series thus offers a new and unique resource for the study of ancient Greece that will transform how we study and think about a crucial era in ancient Greek history Volume IV contains detailed and up to date studies of Cyrene Delphi Macedonia Massalia and Metapontion **Resistance at the Edge of Empires** Cameron A. Petrie, 2020-12-28 From 1985 to 2001 the collaborative research initiative known as the Bannu Archaeological Project conducted archaeological explorations and excavations in the Bannu region in what was then the North West Frontier Province NWFP of Pakistan now Khyber Pakhtunkhwa This Project involves scholars from the Pakistan Heritage Society the British Museum the Institute of Archaeology UCL Bryn Mawr College and the University of Cambridge This is the third in a series of volumes that present the final reports of the exploration and excavations carried out by the Bannu Archaeological Project This volume presents the first synthesis of the archaeology of the historic periods in the Bannu region spanning the period when the first large scale empires expanded to the borders of South Asia up until the arrival of Islam in the subcontinent at the end of the first and beginning of the second millennium BC The Bannu region provides specific insight into early imperialism in South Asia as throughout this protracted period it was able to maintain a distinctive regional identity in the face of recurring phases of imperial expansion and integration *Means of Exchange* Dagfinn Skre, 2008-12-31 This second volume based on the excavations of the Viking town Kaupang 2000 2003 presents find types used in economic transactions coins hacksilver ingots

weights and balances Changes in type and volume of economic transactions at Kaupang and in Scandinavia are discussed and the economic mentality of Viking crafts and tradesmen is explored Earlier the study of Viking silver currency was based mainly on hoards containing coins and hacksilver In this volume the combined study of the find types mentioned as well as the sophisticated chronology of settlements finds from sites like Kaupang gives a completely new insight into economy and exchange In the early 9th century silver and goods seem to have come to Kaupang mainly from the Carolingian world Silver weighed with locally produced lead weights was used as currency on a limited scale The old e unit was easily convertible to Carolingian units After the mid 9th century this early system was altered The increased availability of silver caused by the import of Islamic coins as well as the introduction in most of Scandinavia in the 860s 870s of standardized weights of probable Islamic origin paved the way from then on for an increasing use of silver as payment These studies demonstrate that sites like Kaupang led the way in economic development in Scandinavia The urban environment promoted an economic mentality which contributed significantly to the fundamental transformation of Scandinavian culture and society which culminated in the region's integration in Christian Europe in the High Middle Ages All the King's Horses Paula K. Lazrus,Alex Barker,2012-06-27 This volume from the SAA Press examines the impact of looting and the use of artifacts of unknown provenance in the humanities and social sciences ranging from the impact of amnesty laws for reporting stolen cultural property to the use of Google Earth to assess the scale of illicit excavations and from the impact of poorly sourced artifacts on early Mycenaean and Minoan studies to the structure of the growing commercial trade in ancient coins **The Science and Archaeology of Materials** Julian Henderson,2013-04-15 The Science and Archaeology of Materials is set to become the definitive work in the archaeology of materials Henderson's highly illustrated work is an accessible and fascinating textbook which will be essential reading for all practical archaeologists With clear sections on a wide range of materials including ceramics glass metals and stone this work examines the very foundations of archaeological study Anyone interested in ancient technologies especially those involving high temperatures kilns and furnaces will be able to follow in each chapter how raw materials are refined transformed and shaped into objects This description is then followed by appropriate case studies which provide a new chronological and geographical example of how scientific and archaeological aspects can and do interact They include Roman pale green and highly decorated glass 17th Century glass in Britain and Europe the effect of the introduction of the wheel on pottery technology the technology of Celadon ceramics early copper metallurgy in the Middle East chemical analysis and lead isotope analysis of British Bronzes early copper alloy metallurgy in Thailand the chemical analysis of obsidian and its distribution the origins of the Stonehenge bluestones This book shows how archaeology and science intersect and feed off each other Modern scientific techniques have provided data which when set within a fully integrated archaeological context have the potential of contributing to mainstream archaeology This holistic approach generates a range of connections which benefits both areas and will enrich archaeological study in the future

Document Supply Centre, 1997 *Archaeology and Religion in Early Northwest India* Daniel Michon, 2015-08-12 This book explores the ways in which past cultures have been used to shape colonial and postcolonial cultural identities It provides a theoretical framework to understand these processes and offers illustrative case studies in which the agency of ancient peoples rather than the desires of antiquarians and archaeologists is brought to the fore

Bibliotheca Celtica, 1970 [The Molyvoti, Thrace, Archaeological Project 1](#) Nathan T. Arrington, Thomas F. Tartaron, Marina Tasaklaki, Domna Terzopoulou, 2024-08-15 This publication is the first of four volumes that will present the final results of the 2013 2015 seasons of MTAP a Greek American synergasia project This first volume presents the history and finds from the archaeological site often referred to as Ancient Stryme which ancient sources identified as an emporion trading post and polis settled by Thasians The volume provides a new chronology for the site including its 4th century BCE reoccupation after destruction possibly associated with Philip of Macedon and traces diachronic change through the Early Byzantine period A significant discovery is a complete Classical house at the site one of the few from Aegean Thrace which features informative architecture and domestic assemblages Intensive urban survey clarifies the city's 4th century walls and harbors and expands our understanding of the scale and function of coastal settlements In the surrounding chora the area's first geomorphological study evaluates landscape use and the changing coastline Contributions from over 20 authors discuss the excavation survey geomorphology and finds from MTAP shedding new light on Greek Thracian interaction settlement trade and the environment from prehistory through the Early Byzantine period in an understudied region of the Aegean

Roman and Medieval Exeter and their Hinterlands Stephen Rippon, Neil Holbrook, 2021-03-23 This first volume presenting research carried out through the Exeter A Place in Time project provides a synthesis of the development of Exeter within its local regional national and international hinterlands Exeter began life in c AD 55 as one of the most important legionary bases within early Roman Britain and for two brief periods in the early and late 60s AD Exeter was a critical centre

of Roman power within the new province When the legion moved to Wales the fortress was converted into the civitas capital for the Dumnonii Its development as a town was however relatively slow reflecting the gradual pace at which the region as a whole adapted to being part of the Roman world The only evidence we have for occupation within Exeter between the 5th and 8th centuries is for a church in what was later to become the Cathedral Close In the late 9th century however Exeter became a defended burh and this was followed by the revival of urban life Exeter s wealth was in part derived from its central role in the south west s tin industry and by the late 10th century Exeter was the fifth most productive mint in England Exeter s importance continued to grow as it became an episcopal and royal centre and excavations within Exeter have revealed important material culture assemblages that reflect its role as an international port
