Handbook of Phenomenology and Medicine S. Kay Toombs,2012-12-06 As the fields of philosophy of medicine and bioethics have developed in the United States the philosophical perspective of phenomenology has been largely ignored Yet the central conviction that informs this volume is that phenomenology provides extraordinary insights into many of the issues that are directly addressed within the world of medicine Such issues include the nature of medicine itself the distinction between immediate experience and scientific conceptualization the nature of the body and the implications of embodiment in the realm of clinical practice the meaning of health illness and disease the problem of intersubjectivity particularly with respect to achieving successful communication with another the complexity of decision making in the clinical context and in the realm of medical ethics the possibility of empathic understanding the theory and method of clinical practice and the essential characteristics of the therapeutic relationship i e the relationship between the sick person and the one who professes to help Some of the authors who have contributed to this volume are philosophers some are engaged in other academic disciplines and several are practicing healthcare professionals

The Birth of Ethics Michael van Manen,2020-11-25 From the time of conception through the gestation of pregnancy to the birth of a newborn child exists an extraordinary emergent ethics How does this ethics come into being when a child is conceived How does the appearance of ethics in pregnancy differ from its emergence after birth How does the original meaning of ethics relate to modern morality in decision making In this book Michael van Manen explores these ethical moral complexities and conceptualizations of life s beginnings He delves into perennial and contemporary aspects of conception pregnancy and birth to present ethics as a fundamental phenomenon in the experiential encounter between parent and child Even in the context of neonatal perinatal medicine where all manner of medical technologies and illnesses may potentially complicate the developing relation of parent and child ethics is always already present yet also enigmatic in its origin And yet

to approach ethical moral questions we need to understand the inception of ethics The Birth of Ethics Phenomenological Reflections on Life s Beginnings is an essential text not only for health professionals and researchers but also for parents family members and others who care and take responsibility for newborns in need of medical care **The Child in the World** Eva M. Simms,2008 The Child in the World builds a bridge between continental philosophers who tend to overlook child existence and developmental psychologists who often fail to consider the philosophical assumptions underlying their work In this volume author Eva M Simms draws on both psychological and phenomenological research to investigate child existence in its cultural and historical context and explore the ways children interact with the world around them Simms examines key experiences of childhood with special attention to the non dualistic nature of the child s consciousness and the understanding that there is more to the child s experiences than cognitive processes In chapters that proceed from infancy to early childhood Simms considers how children live their embodiment coexist with others experience and the spaces and places of their neighborhoods have deeply felt relations to things grasp time intuitively and often in contradiction to adult clock time and are transformed by the mystery of the symbolic order of play and language Simms s approach is particularly informed by the philosophy of Maurice Merleau Ponty which allows for a descriptive and grounded understanding of child experience as well as sophisticated and critical philosophical thinking about human existence in general By respecting and celebrating the magical non dualistic relationship child consciousness has to the world The Child in the World offers readers a unique opportunity to expand their understanding of human existence Students and teachers of psychology and philosophy early childhood educators psychotherapists as well as general readers who are parents of young children will enjoy this fascinating volume Swallow Mary Cappello,2011 Discusses what it means to ingest things humans weren t meant to eat and how the line between human bodies and foreign bodies can sometimes blur *Disrupting Higher Education Curriculum* Michael Anthony Samuel,Rubby Dhunpath,Nyna Amin,2017-05-10 Discomfort with the inappropriateness of university curricula has met with increasing calls for disruptive actions to revitalise higher education This book conceived to envision an alternative emancipatory curriculum explores the historical ideological philosophical and theoretical domains of higher education curricula The authors acknowledge that universities have been and continue to be complicit in perpetuating cognitive damage through symbolic violence associated with indifference to the pernicious effects of race categorisation gender inequalities poverty rising unemployment and cultural hegemony as they continue to frame curricula cultures and practices The book contemplates the project of undoing cognitive damage offering glimpses to redesign curriculum in the 21st century The contributors international scholars emergent and expert researchers include different nationalities orientations and positionalities constituting an interdisciplinary ensemble which collectively provides a rich commentary on higher education curriculum as we know it and where we think it could be in the future The edited volume is a catalytic tool for disrupting canonised rituals of practice in higher education It has been a while since a scholarly book so authoritative in

its claims and innovative in its concepts threatens to shake up the curriculum field at its foundations Rich in metaphor and meaning the superbly written chapters challenge a field that once more became moribund as we settled sic far too comfortably into accepting handed down frames and fictions about knowledge authority power and agency that imprint cognitive damage on those forced to the margins of schools and universities Disrupting Higher Education Curriculum demonstrates however that it is in fact from those margins of the education enterprise that academics teachers and learners can see more clearly how patterns of thought and action hold us back from placing and experiencing our African humanity at the centre of the curriculum Jonathan Jansen Rector and Vice Chancellor of the University of the Free State South Africa
