Nutation and the Earth's Rotation E.P. Fedorov, M.L. Smith, 2012-12-06 The IAU Symposium No 78 Nutation and the Earth's Rotation was held in Yev USSR from 23 to 28 May 1977 The Organizing Committee included E P Fedorov and R O Vicente Joint Chairmen W Fricke J Kovalevsky P Melchior N Pariisky M Rochester C Sugawa G Wilkins and Ya Yatskiv who presided over the Local Organizing Committee The meeting was sponsored by Commission 19 and co sponsored by Commissions 4 8 and 31 There were 114 registered participants from 14 countries The main topics covered were as follows the specification of nutation in the IAU system of astronomical constants determination of forced nutation and nearly diurnal free polar motion from astronomical observations expected use of lunar ranging data and long baseline interferometers for precise measurement of the nutation terms models of the internal constitution of the Earth as the basis of a new theory of nutation the effect of the ocean and liquid core on the rotation of the Earth and the interaction between Earth tides and nutation Nutation and the Earth's Rotation International Astronomical Union. Symposium, International Astronomical Union. Schmadel, Gert Zech, 2013-11-11 Astronomy and Astrophysics Abstracts which has appeared in semi annual volumes since 1969 is devoted to the recording summarizing and indexing of astronomical publications throughout the world It is prepared under the auspices of the International Astronomical Union according to a resolution adopted at the 14th General Assembly in 1970 Astronomy and Astrophysics Abstracts aims to present a comprehensive documentation of literature in all fields of astronomy and astrophysics Every effort will be made to ensure that the average time interval between the date of receipt of the original literature and publication of the abstracts will not exceed eight months This time interval is near to that achieved by monthly abstracting journals compared to which our system of accumulating abstracts for about six months offers the advantage of greater convenience for the user I 1980 some older Volume 27 contains literature published in 1980 and received before August literature which was received late and which is not recorded in earlier volumes is also included We acknowledge with thanks contributions to this volume by Dr J Bouska Prague who surveyed journals and publications in Czech and supplied us with abstracts in English **Geodynamics and Earth Tides Observations from Global to Micro Scale** Carla Braitenberg, Giuliana Rossi, Geodynamics and Earth Tides Editor group, 2018-08-23 This volume treats the key aspects that

must be known when dealing with continuous space geodetic or terrestrial geodetic observations. The signals of Earth core resonance are discussed as well as tidal effects on Earth polar motion and on earthquake triggering. Hydrologic loading by the ocean tides or subsurface water flows is discussed. These signals compete with crustal deformation observations of earthquakes e.g. Gorkha 2015 during interseismic periods and on volcanoes Elbrus, Caucasus. The instrumentation that is covered includes superconducting gravimeters, continuous seafloor gravimeters, interferometric tilt and strain meters and GNSS networks. The articles give an up to date account of research in which the Earth tides are a benchmark signal for the sophisticated instrumentation mounted on satellites or the surface observing time variable signals of an evolving Earth. Scientists studying the earthquake cycle and geodetic monitoring will find useful material. For students in the geosciences the collection offers a good overview of the broad spectrum of topics related to the Earth geodetic monitoring.

Time and the Earth's Rotation D.D. McCarthy, J.D.H. Pilkington, 2012-12-06 IAU Symposium No. 82 Time and the Earth's Rotation met to discuss modern research in the field of the rotation of the Earth with particular emphasis on the role of new observational techniques in this work. The use of these techniques has prompted a new look at the definitions of the traditional reference systems and the concepts of the rotation of the Earth around its center of mass. Specific topics discussed were time, polar motion, reference systems, conventional radio interferometry, very long baseline interferometry, VLBI, Doppler satellite methods, satellite laser ranging, lunar laser ranging and geophysical research concerning the Earth's rotation. Improvement in the accuracy of the observations is a key to possible solutions of the many unsolved problems remaining in this field. It appears that such improvement using both classical and new techniques is forthcoming in the near future. This will surely contribute to a better understanding of some of the long standing questions concerning the rotation of the Earth around its center of mass and lead to an improved knowledge of the rotating deformable Earth. This volume contains the papers presented at IAU Symposium No. 82 as well as the discussions provoked by these papers. It is hoped that it captures the principal points of the meeting and that it will contribute not only to a better understanding of existing problems but also to future research in time and the Earth's rotation.

Dynamics and Astrometry of Natural and Artificial Celestial Bodies I.M. Wyrzyszcak, J.H. Lieske, R.A. Feldman, 2012-12-06 IAU Colloquium 165 Dynamics and Astrometry of Natural and Artificial Celestial Bodies was held in Poznan, Poland, in July 1996, bringing together over 200 scientists from 27 countries who discussed their work in 179 oral and poster presentations. The present volume contains 83 of the papers presented at the meeting. The meeting brought together specialists from diverse fields who focused on the very close collaboration between

dynamics and astrometry where one discipline contributes to the progress of the other The oral sessions were organized into general categories pertaining to solar system dynamics new observational techniques catalogues and astrometry dynamics and observational problems of artificial satellites and space debris rotation of solar system objects reference systems and astronomical standards new mathematical techniques and three all day poster sessions This volume is divided into seven parts comprising 83 contributions a list of participants and an index
