Nutricines Food Components In Health And Nutrition:

Nutricines Clifford A. Adams,1999-01-01 This book introduces this wholly new concept in food components The author following years of research describes the nature and mode of action of nutricines and highlights their significance in disease avoidance and health maintenance In his view food should now be seen as being made up of two groups of components nutrients and nutricines

Nutrition-Based Health Clifford Adams,2008-12-01 As a result of an increasing reluctance to use medication to maintain animal health this in depth examination evaluates nutrition based health as a strategy to avoid disease and maintain their health

Ruined by Excess, Perfected by Lack R. Patton,2011-02-01 Discussing the worldwide problem of overweight pets this comprehensive writing explains how behavior both of pets and people is a critical aspect of any proper diet It discusses how pets are poorly adapted to cope with a constant excess of soluble carbohydrate a common feature found in the majority of dry kibble diets Therefore this reference shows how oftentimes while pet owners believe that they are providing the best nutrition for their pets they are actually silently robbing their companions of health and longevity in their failure to restrict carbohydrates In response to this situation this informative book draws on anthropology genetics and behavior to establish logical nutrition thereby educating pet owners on how they can improve the length and quality of their pets lives

Nutricines and Derivatives of Nutrients in Animal Health and Disease Prevention

Tao Wang,HongGu Lee,2024-03-20 Good animal health is of great importance for the efficient production of animal derived foods at a low cost The demand for solutions for animal health maintenance and disease prevention is a major global challenge in animal production food safety and public health The animal body has a complete self defense system including oxidation and anti oxidation balance immune activation and suppression balance pro and anti inflammatory balance which can help the host against various factors that endanger normal life activities Nowadays the strategy of nutrition based health has become an increasingly important solution for animal health maintenance and disease prevention Nutrients carbohydrates fats proteins minerals vitamins et al and nutricines carotenoids enzymes fatty acids flavors oligosaccharides organic acids phospholipids polyphenols et al are two major categories of components in feeds Nutricines and some derivatives of nutrients vitamin derivatives amino acid derivatives et al have been intensively studied in animal and cell culture models and their roles in animal health maintenance and disease prevention are intimately known

The Living Gut W.N. Ewing,2009-04-01 Fully revised and updated this study is a significant contribution to the understanding of animal nutrition health and productivity Covering an array of modern topics from the biology of the gastrointestinal tract and the analysis of microbial populations to understanding bio feed ingredients and the use of enzymes oligosaccharides probiotics and organic acids to replace antibiotics in animal diets this is a must have reference for anyone involved in the animal sciences
