Vitamin History, the Early Years Lee McDowell, 2013-02-11 Casimer Funk 101 years ago first used the term vitamine in 1912 What were later to be known as vitamin deficiency diseases such as scurvy beriberi night blindness xerophthalmia and rickets had plagued the world at least since the existence of written records Records of medical science from antiquity attesting to human association of certain foods e g liver with either the cause or prevention of diseases are considered the nebulous beginnings of the concept of these essential nutrients The concept of a vitamin or accessory growth factor was developed in the early part of the 20th Century and for almost five decades there was an exciting era of isolation identification and synthesis of the vitamins The present book contains 10 chapters and methodically traces each vitamin from an unidentified factor to its discovery and synthesis In relation to history of nutrition vitamins are by far the most interesting class of nutrients Following the clues of the existence of each vitamin is similar to a good mystery story The early beginnings of the vitamin theory relate to reports that animals did not survive on diets of only carbohydrates fats protein and salts Beriberi was the earliest documented deficiency disorder 2697 B C High incidence of beriberi in Asian countries was due to over milling rice polished rice The subsequent research in this disease led to the discovery of vitamins and helped to establish some of the principal features of deficiencies in general Vitamin A deficiency results in two eye diseases of night blindness and xerophthalmia According to some of the oldest records liver cured these diseases Rickets the devastating bone disease of young children is a vitamin D deficiency The vitamin is referred to as the sunshine vitamin as it can be synthesized in the body Rickets was common in northern cities and was more rampant in industrial cities as industrial pollution prevented children from sunlight exposure Pellagra a niacin deficiency is a devastating disease that brought pain suffering and death and resulted when corn was the main food source Symptoms of the disease were referred to as the 4 D s dermatitis diarrhea dementia and death Scurvy which had been feared since ancient times resulted from diets devoid of

vitamin C rich foods of fruits and vegetables Scurvy was the vitamin deficiency disease that caused the most death and suffering in recorded history A fatal anemia pernicious anemia was a vitamin B 12 deficiency The disease resulted by only consuming plant foods or lack of a factor produced by the stomach needed for absorption of the vitamin The book contains pictures of very serious consequences and magnitude of vitamin deficiency diseases Likewise the book contains levity by illustrating humorous situations on causes and cures of these diseases The purpose of the present publication is to present an in depth review of the early history of vitamins to illustrate the devastation of these diseases and also provide some levity
