**Archaeology of Medieval Germany** Günter P. Fehring,2014-10-24 Medieval archaeology is a relatively young discipline It relies heavily on and contributes to the neighbouring disciplines of history and geography as well as certain of the natural sciences The kinds of sources investigated in the context of medieval archaeology also cast light on many aspects of life in later centuries The main sources used are graveyards churches and churchyards castles and fortifications rural and urban settlements technical production sites and routes of communication Closely allied to these are the numerous finds of small objects of everyday life from cutlery and tools to animal remains and grain This book is a comprehensive discussion of what can be established from the use of such materials about the culture and daily life of medieval Germany Each subject is augmented with the use of many illustrations Besides methodological questions the author considers what can be learnt about the history of settlement and architecture of technology of economic and social matters of churches and missions and of population diet and vegetation    *Biology and Breeding of Crucifers* Surinder Kumar Gupta,2016-04-19 Considerable interest has developed in recent years in crucifers and particularly in their wild relatives as they contain genetic material that may be utilized for further evolution of superior crop varieties through introgression and distant hybridization Until now there has been no single volume that focuses exclusively on the biology and bree    Mansfeld's Encyclopedia of Agricultural and Horticultural Crops R. Kulturgeschichte der "Kulturgeschichten" Martin Eichhorn,2002    The Ancient Mediterranean Environment between Science and History William V. Harris,2013-07-25 Scientists historians and archaeologists are at last beginning to collaborate seriously on studies of the long term history of the environment The fruit of an international conference held in Rome in 2011 The Ancient Mediterranean Environment between Science and History brings together scientists and scholars who are interested in the interaction of their several disciplines as well as in specific problems such as the effects of climate change and other environmental factors on historical developments and events the sources of the energy and fuel used in ancient civilizations and the effects of humans on the lands around the Mediterranean The collection balances broad Mediterranean wide studies and tightly focused studies of particular regions in Italy and Jordan    *Handbook of Plant Palaeoecology (First edition 2012)* René T. J. Cappers,Reinder Neef,2012-01-06 Plant palaeoecologists use data from plant fossils and plant subfossils to reconstruct ecosystems of the past This book deals with the study of subfossil plant material retrieved from archaeological excavations and cores dated to the Late Glacial and Holocene One of the main objectives of this book is to

describe the processes that underlie the formation of the archaeobotanical archive and the ultimate composition of the archaeobotanical records being the data that are sampled and identified from this immense archive Our understanding of these processes benefits from a knowledge of plant ecology and traditional agricultural practices and food processing This handbook summarizes the basic ecological principles that relate to the reconstruction of former vegetations and of agricultural practices in particular We hope this book will help palaeobotanists environmental archaeologists and colleagues from related disciplines optimize inferences based on what we could term old style archaeobotany And we hope that our observations will serve as an eye opener and improve future research not only as it is practised in our laboratories but also as it is practised in the field

*Etudes sur le grand domaine carolingien* Jean-Pierre Devroey,2024-10-28 The origins of the large estate of Carolingian Europe and the role it played in the evolution of Frankish society and economy are the themes of this volume The first group of articles focus on documentary evidence especially the polyptychs and their interpretation Though there is insufficient material for any true quantitative history Professor Devroey argues that the evidence points to demographic expansion coupled with the exploitation of new agricultural methods and crops and a reliance on the family as the unit of production Further studies relate these estates to the commercial networks of the area from a local to an international level A final concern is to demonstrate that the large estate formed a key component of the Carolingian rulers aim to establish the bonum commune and a stable society with assured food supplies regulated markets and a just system of weights and measures L origine du grand domaine de l Europe carolingienne et le rôle qu il jouait dans l évolution de la société et de l économie du monde franc sont les thèmes de ce volume Le premier groupe d articles se concentre sur des documents et plus spécialement sur les polyptyques et leur interprétation Bien qu il n y ait pas de matériel suffisant pour une histoire quantitative le professeur Devroey soutient que tout indique une expansion démographique laquelle viennent s ajouter l exploitation de nouvelles méthodes agricoles et de récoltes ainsi qu une dépendance vis à vis de la famille en tant qu unité de production Des études supplémentaires font le lien entre ces propriétés et les réseaux commerciaux de cette partie du monde du niveau local au niveau international L auteur s efforce finalement de démontrer que le grand domaine tait un des facteurs la base de la volonté des dirigeants carolingiens d instaurer le bonum commune et une société stable avec des approvisionnements assurés des marchés

Gomez-Campo,1999-07-07 Brassica crop species and their allies Raphanus Sinapis Eruca etc are important sources of edible roots stems leaves buds and inflorescences as well as of edible or industrial oils condiments and forage Many well known names of plants or plant products such as kale cabbage broccoli cauliflower Brussels sprouts kohlrabi Chinese cabbage turnip rape rutabaga swede colza or rapeseed canola mustard rocket etc are directly associated to this botanical group The scientific interest for this botanical group has run parallel to its economical importance and research achievements in our days would have certainly appeared unimaginable only two decades ago As the end of the millennium approaches entirely new fields transformation somatic fusion etc have been added to the classical ones Thus nobody can doubt the opportuneness of this book which combines and presents both the basic and applied biological aspects of the Brassica species     **The Competition of Fibres** Wolfram Schier,Susan Pollock,2020-04-30 The central issues discussed in this new collected work in the highly successful ancient textiles series are the relationships between fiber resources and availability on the one hand and the ways those resources were exploited to produce textiles on the other Technological and economic practices for example the strategies by which raw materials were acquired and prepared in the production of textiles play a major role in the papers collected here Contributions investigate the beginnings of wool use in western Asia and southeastern Europe The importance of wool in considerations of early textiles is due to at least two factors First both wild as well as some domesticated sheep are characterized by a hairy rather than a woolly coat This raises the question of when and where woolly

sheep emerged a question that has not up to now been resolvable by genetic or other biological analyses Second wool as a fiber has played a major role both economically and socially in both western Asian and European societies from as early as the 3rd millennium BCE in Mesopotamia and it continues to do so in different ways up to the modern day Despite the importance of wool as a fiber resource contributors demonstrate clearly that its development and use can only be properly addressed in the context of a consideration of other fibers both plant and animal Only within a framework that takes into account historically and regionally variable strategies of procurement processing and the products of different types of fibers is it possible to gain real insights into the changing roles played by fibers and textiles in the lives of people in different places and times in the past With relatively rare albeit sometimes spectacular exceptions archaeological contexts offer only poor conditions of preservation for textiles As a result archaeologists are dependent on indirect or proxy indicators such as textile tools e g loom weights spindle whorls and the analysis of faunal remains to explore a range of such proxies and methods by which they may be analyzed and evaluated in order to contribute to an understanding of fiber and textile production and use in the past
