The End of American Childhood Paula S. Fass, 2017-11-07 How American childhood and parenting have changed from the nation's founding to the present The End of American Childhood takes a sweeping look at the history of American childhood and parenting from the nation's founding to the present day Renowned historian Paula Fass shows how since the beginning of the American republic independence self definition and individual success have informed Americans attitudes toward children But as parents today hover over every detail of their children's lives are the qualities that once made American childhood special still desired or possible Placing the experiences of children and parents against the backdrop of social political and cultural shifts Fass challenges Americans to reconnect with the beliefs that set the American understanding of childhood apart from the rest of the world Fass examines how freer relationships between American children and parents transformed the national culture altered generational relationships among immigrants helped create a new science of child development and promoted a revolution in modern schooling She looks at the childhoods of icons including Margaret Mead and Ulysses S Grant who as an eleven year old was in charge of his father's fields and explored his rural Ohio countryside Fass also features less well known children like ten year old Rose Cohen who worked in the drudgery of nineteenth century factories Bringing readers into the present Fass argues that current American conditions and policies have made adolescence socially irrelevant and altered children's road to maturity while parental oversight threatens children's competence and initiative Showing how American parenting has been firmly linked to historical changes The End of American Childhood considers what implications this might hold for the nation's future

The Child Richard A. Shweder, Thomas R. Bidell, Anne C. Dailey, Suzanne D. Dixon, Peggy J. Miller, John Modell, 2009-09-15 The Child An Encyclopedic Companion offers both parents and professionals access to the best scholarship from all areas of child studies in a remarkable one volume reference Bringing together contemporary research on children and childhood from pediatrics child psychology childhood studies education sociology history law anthropology and other related areas The Child contains more than 500 articles all written by experts in their fields and overseen by a panel of distinguished editors led by anthropologist Richard A Shweder Each entry provides a concise and accessible synopsis of the topic at hand For example the entry Adoption begins with a general definition followed by a detailed look at adoption in different cultures and at different times a summary of the associated mental and developmental issues that can arise and an overview of applicable legal and public policy While presenting certain universal facts about children's development from birth through adolescence the entries also address the many worlds of childhood both within the United States and around the globe They consider the ways that in which race ethnicity

gender socioeconomic status and cultural traditions of child rearing can affect children's experiences of physical and mental health education and family. Alongside the topical entries *The Child* includes more than forty *Imagining Each Other* essays which focus on the particular experiences of children in different cultures. In *Work before Play* for Yucatec Maya Children for example readers learn of the work responsibilities of some modern day Mexican children while in *A Hindu Brahman Boy Is Born Again* they witness a coming of age ritual in contemporary India. Compiled by some of the most distinguished child development researchers in the world *The Child* will broaden the current scope of knowledge on children and childhood. It is an unparalleled resource for parents, social workers, researchers, educators and others who work with children. **Future**

Families Ross D. Parke, 2013-08-28 *Future Families* explores the variety of family forms which characterize our contemporary culture while addressing the implications of these increasingly diverse family units on child development. Reveals the diversity of new family forms based on the most current research on fathers, same gender parents, new reproductive technologies and immigrant families. Illustrates that children and adults can thrive in a variety of non traditional family forms. Shows the interrelatedness of new trends in family organization through the common themes of embedded families and caregiving in community and cultural contexts. Features an interdisciplinary approach drawing from works in areas that include child development, family studies, sociology, cross cultural scholarship, ethnic studies, biology, neuroscience, anthropology and even architecture. Sets an agenda for future research in the area of families by identifying important gaps in our knowledge about families and parenting. *Clones, Fakes and Posthumans*, 2015-06-24 *Clones, Fakes and Posthumans* Cultures of Replication explores cloning and related phenomena that inform each other like twins, fakes, replica or homogeneities through a cultural prism. What could it mean to think of a cloning mentality? Could it be that a cloning culture has made biotechnological cloning desirable in the first place and vice versa that biotechnological cloning then enforces technologies of social and cultural cloning? What does it mean to say that a culture replicates? If biotechnological cloning has to do with choice and repetitive reproduction of selected characteristics how are those kinds of desires expressed socially, politically and culturally? Lifting the issue of cloning above the biotechnological domain we problematize the cultural context including modernity's readiness to imitate and manipulate nature and the skewed privileging of desirable socialities as a basis for exclusive replication. We also explore possible relations between a cloning mentality and a consumer society that fosters a brand name mentality. The construction and coercive implementation of copy prone technological and symbolic items are at the very heart of the consumer society and its modes of mass production as they have emerged from and seek to articulate, define and refine modernity and modernization. **The Family-centered Library Handbook** Sandra
