Preparation And Properties Of Stereoregular Polymers:

Preparation and Properties of Stereoregular Polymers R.W. Lenz, F. Ciardelli, 2013-03-13 This book contains the texts of the main lectures presented at the NATO Advanced Studies Institute on Advances in Preparation and Properties of Stereoregular Polymers held at Tirrenia near Pisa Italy from October 3 to 14 1978 A few contributed papers have also been included because they were concerned with topics not included in the main lectures The primary objective of the Institute was to assist in the further development of stereoregular polymers because of the ever increasing demand for new products with exceptional chemical and physical properties This need has reawakened interest in the field Indeed there is now a rapidly increasing activity in the study of stereoregular polymerization and the preparation of structurally ordered polymers with the aim of achieving appreciable improvements in existing polymeric materials through new developments in synthesis and properties as well as in discovering new polymeric structures In order to achieve these objectives a broad interdisciplinary cooperation among scientists involved in investigations on the design synthesis characterization and application of stereoregular or structurally ordered polymers will be necessary Preparation and Properties of Stereoregular Polymers R.W. Recent Advances in Mechanistic and Synthetic Aspects of Polymerization M. Fontanille, A. Guyot, 2012-12-06 Due to their specific properties polymers with well defined structures have been receiving increasing attention over the last several years Owing to the wide variability of their properties these specialty polymers have been used in various areas from biomedical engineering to electronics or energy applications The synthesis of such polymers necessitates the use of new methods of polymerization which derived from an insight into the mechanism of polymerization reactions A NATO Advanced

Research Workshop on Frontiers in Polymerization Catalysis and Polymer Synthesis was held in BANDOL FRANCE in February 1987 Its aim was to assess the new polymerization methods as well as the latest advances in the mechanisms of conventional polymerization reactions together with their applications to the synthesis of new macromolecular structures The financial support from the NATO Scientific Affairs Division which covered the lecturers accomodation and travel expenses as well as the organization charges of this event gave it international scope Several industrial companies participate at the meeting and contributed to it success The organizers who are also editors of these proceedings want to express their thanks to both NATO Scientific Affairs Division and the companies present at the meeting
