**Preschool Prevention of Reading Failure** Richard L. Masland, Mary Wootton Masland, 1988 A summary of research on preschool recognition of reading disabilities and possible instructional approaches Prediction and Prevention of Reading Failure Nathalie A. Badian, 2000 Identify a child at risk for reading failure in preschool or kindergarten and you will be enhancing outcomes for educational success Miss those predictors and the stage will be set for a lifetime of social and emotional consequences But how do you accurately predict which child will face reading difficulties at the earliest stage of his or her schooling That is the challenge researchers and practitioners around the world confront in this comprehensive text Written by an international team of researchers this book champions the need for preschool and kindergarten detection of children at risk for reading delays reviews the research surrounding this critical topic and offers ideas for intervention programs designed to prevent reading failure It weaves thought provoking results of important studies with a timely commentary on what the field of reading research needs next

**The Study of Dyslexia** Martin Turner, John Rack, 2006-01-16 In long ago 1999 the Dyslexia Institute and Plenum Press conceived a plan for two books which would gather the best of current knowledge and practice in dyslexia studies This would benefit those but not only those many individuals who train with us acquiring a postgraduate certificate and diploma with our higher education partner the University of York Since then the century changed the hinge of history creaked and Plenum was taken over by Kluwer Academic Publishers but the first of the pair Dyslexia in Practice emerged quickly and on schedule Townend and Turner 2000 Written by staff and close associates of the Institute its chapters were produced under close scrutiny and with

the expedition of a command economy To our delight the book has seen a success which went beyond the dreams of its editors it has been adopted by other courses similar to our own and is widely referred to The same was never likely to be true of The Study of Dyslexia which was envisaged as a theoretical companion volume written by authors and researchers of international repute Nearly five years after the idea first took shape this second volume now arrives to complete the enterprise but it has been a very different project

Handbook of Children's Literacy Terezinha Nunes, Peter Bryant, 2013-03-09 PETER BRYANT TEREZINHA NUNES The time that it takes children to learn to read varies greatly between different orthographies as the chapter by Sprenger Charolles clearly shows and so do the difficulties that they encounter in learning about their own orthography Nevertheless most people who have the chance to learn to read do in the end read well enough even though a large number experience

some significant difficulties on the way Most of them eventually become reasonably efficient spellers too even though they go on make spelling mistakes at any rate if they are English speakers for the rest of their lives So the majority of humans plainly does have intellectual resources that are needed for reading and writing but it does not always find these resources easy to marshal What are these resources Do any of them have to be acquired Do different orthographies make quite different demands on the intellect Do people differ significantly from each other in the strength and accessibility of these resources If they do are these differences an important factor in determining children s success in learning to read and write These are the main questions that the different chapters in this section on Basic Processes set out to answer

Vogel, 2012-12-06 Educational Alternatives for Students with Learning Disabilities responds to the pressing need to provide teachers of learning disabled students with practical knowledge regarding state of the art intervention strategies This book provides examples of validated alternative educational practices which avoid the pitfalls and stigmatizing effects on students of older models of intervention The new practices aim to maximize teaching effectiveness and to assist the learning disabled in achieving their potential The intervention strategies described in this book have the power to enhance the efforts of all concerned *Commonsense Methods for Children with Special Needs* Peter S.
