Resource Guide for Early Childhood Family Education ,1994 *Raising a Responsible Child*: Elizabeth Ellis,1996-01-01

It has often been said Give a man a fish and he has food for a day Teach him to fish and he can provide for himself over a lifetime Raising a Responsible Child explains the phenomenon of the overindulgent parent who helps and protects too much and the underdeveloped child who never really learns to stand on his or her own feet Today many parents are especially prone to shower their children with love and attention and attempt to minimize stress by doing for them In the scurry of modern life parents often can t resist giving in to children s demands or solving their problems just to keep the peace While this is basically a loving approach it does not teach children how to be responsible and independent Parents learn the hard way that their overindulgence does more harm than good their children will only come to them with more demands and act helpless in the face of new problems If you find yourself entrenched in this pattern you can change by using a system of consistent straight forward and logical rules every day You can teach your children to take responsibility for their actions and earn their privileges and you will find perhaps to your surprise that they are willing and ready to do so Some of the issues this book will help you to deal with are The whiny and overly demanding preschooler The small child who throws tantrums in public to get his way The older child who is inconsiderate of family members The teenager who is constantly late for school The young adult who can t get her life together and mooches off her parents indefinitely Many parents discover that the tried and true methods detailed here not only help their children handle emotions in a more mature and constructive manner but also result in higher self esteem and a happier outlook on life **Handbook of School-Family Partnerships** Sandra L.

Model Strategies in Bilingual Education Heather McCollum,1993 [One Percent for the Kids](#) Isabel V. Sawhill,2004-05-13 In the United States long considered the land of opportunity children born into different types of families begin life with very unequal prospects A growing group of children is being raised in families in which a poorly educated mother begins childbearing at an early age often outside marriage and ends up dependent on public welfare Another group is raised by parents who delay childbearing until they are well educated married and have stable jobs these children go on to lead more advantageous lives While virtually everyone talks about the importance of investing in the next generation in the late 1990s federal spending on children represented only 2 percent of the nation s gross domestic product This volume argues forcefully that the life prospects of children at the bottom of the socioeconomic ladder can be improved substantially and the growing gap between them and more privileged children reduced by making appropriate investments now Taking their cue on funding from the Blair government in the United Kingdom which since 1997 has invested almost an extra 1 percent of GDP to reducing child poverty the contributors offer specific proposals along with their rationales and costs to improve early childhood education and health care bolster family income and work reduce teen pregnancy encourage and strengthen marriage and allow families to move to better neighborhoods The final chapter assesses the progress of the Blair government toward reaching its goals Contributors include Isabel Sawhill Brookings Institution Greg Duncan Northwestern University Katherine Magnuson Columbia University Andrea Kane Brookings Institution Sara McLanahan Princeton University Irwin Garfinkel Columbia University Robert Haveman University of Wisconsin Madison Jens Ludwig Georgetown University David Armor George Mason University Barbara Wolfe University of Wisconsin Madison Scott Scrivner Public Private Ventures and John H
