How Christianity Built Western Civilization Dr. Alex Locay,2022-01-05 Today the voices from the secular left are hard at work removing any trace of religion from government and the law Meanwhile secular historians have successfully limited Christianity s contribution in history to the Crusades and Inquisitions as if that is all Christians have to speak for The real story is quite different primarily that everything good in Western Civilization has its roots in the Christian religion How Christianity Built Western Civilization is the epic tale of how our Christian forefathers stood up to history s darkest forces to forge a new way of life grounded in the biblical worldview Over the centuries it has become evident that Western Civilization has emerged as mankind s greatest achievement It is here where the greatest political and economic systems were born and here that we see the concept of human rights emerge along with the modern scientific process and the greatest discoveries It is in the West that we find the most advanced educational institutions along with the greatest charities artistic masterpieces and architectural innovations Is this a coincidence or the deliberate result of our worldview How Christianity Built Western Civilization answers this question with chapters on human rights modern science universal education charity art and architecture focusing entirely on the revolutionary milestones and individuals that made these achievements possible Each chapter unfolds chronologically starting with the biblical foundation and moving through the work of the early and Medieval Church arriving at modern times The author builds a compelling case demonstrating how Western Civilization would be indistinguishable from India China or Africa today if not for the teachings of Christ and the Bible

Beyond Civilization Harry Redner,2020-03-26 For Harry Redner the phrase beyond civilization refers to the new and unprecedented condition the world is now entering specifically the condition commonly known as globalization Redner approaches globalization from the perspective of history and seeks to interpret it in relation to previous key stages of human development His account begins with the Axial Age 700 300 BC and proceeds through Modernity after AD 1500 to the present global condition What is globalization doing to civilization In answering this question Redner studies

the role played by capitalism the state science and technology He aims to show that they have had a catalytic impact on civilization through their reductive effect on society culture and individualism However Redner is not content to diagnose the ills of civilization he also suggests how they might be ameliorated by cultural conservation Above all it is to the problem of decline in the higher forms of literacy that he addresses himself for it is on the culture of the book that previous civilizations were founded This study will be of interest to sociologists historians and social and political theorists Its style makes it accessible also to general readers interested in civilization past present and future

History of Civilization in the fifth century. Translated ... from the French ... By A. C. Glyn Antoine Frédéric OZANAM, 1868

Saving Yellowstone Megan Kate Nelson, 2023-04-25 A narrative of adventure and exploration Saving Yellowstone is also a story of Indigenous resistance the expansive reach of railroad photographic and publishing technologies and the struggles of Black southerners to bring racial terrorists to justice It reveals how the early 1870s were a turning point in the nation's history as white Americans ultimately abandoned the the higher ideal of equality for all people creating a much more fragile and divided United States

Hard As the Rock Itself David Robertson, 2011-05-18 The first intensive analysis of sense of place in American mining towns Hard as the Rock Itself Place and Identity in the American Mining Town provides rare insight into the struggles and rewards of life in these communities David Robertson contends that these communities often characterized in scholarly and literary works as derelict as sources of debasing moral influence and as scenes of environmental decay have a strong and enduring sense of place and have even embraced some of the signs of so called dereliction Robertson documents the history of Toluca Illinois Cokedale Colorado and Picher Oklahoma from the mineral discovery phase through

mine closure telling for the first time how these century old mining towns have survived and how sense of place has played a vital role Acknowledging the hardships that mining s social environmental and economic legacies have created for current residents Robertson argues that the industry s influences also have contributed to the creation of strong cohesive communities in which residents have always identified with the severe landscape and challenging but rewarding way of life Robertson contends that the tough unpretentious appearance of mining landscapes mirrors qualities that residents value in themselves confirming that a strong sense of place in mining regions as elsewhere is not necessarily wedded to an attractive aesthetic or even to a thriving economy
