Johnson, Peggy Noonan on John F. Kennedy, Paul Johnson on Bill Clinton. *Public Papers of the Presidents of the United States*     **A Handbook for Seminary Presidents** G. Douglass Lewis, 2006-06-13  
There are now over 250 theological seminaries in the United States and Canada. Leading these diverse institutions is a difficult task that combines elements of executive management, academic prowess, master storytelling, and spiritual discipline. Apart from informal mentoring relationships, however, there has been no resource specifically designed to impart collected presidential wisdom. Douglass Lewis Lovett Weems and the four dozen other presidential contributors to this volume, a project of the Association of Theological Schools in the United States and Canada, together possess hundreds of years of combined experience in institutional leadership. They pass along sage advice on everything from boards and enrollment to facilities and institutional advancement, with special discussions of women in leadership, Canadian schools, and the challenges of university-based programs. Any person in administration at a seminary recognizes that leadership in theological education presents a unique set of challenges. *A Handbook for Seminary Presidents* aims to make this task easier and more fulfilling, not only for the presidents themselves but also for deans, faculty, support staff, and all who seek to effectively prepare the next generation of Christian leaders. **The Presidentialization of Politics** Thomas Poguntke, Paul Webb, 2007-04-27 The Presidentialization of Politics shows that the politics of democratic societies is moving towards a presidentialized working mode even in the absence of formal institutional changes These developments can be explained by a combination of long term structural changes in modern politics and societies contingent factors which fluctuate over time While these contingent short term factors relate to the personalities of office holders the overall political agenda and the majority situation in parliament there are several structural factors which are relatively uniform across modern nations First the internationalization of modern politics which is particularly pronounced within the European Union has led to an executive bias of the political process which has strengthened the role of political top elites vis vis their parliamentary groups and or their parties Their predominance has been amplified further by the vastly expanded steering capacities of state machineries which have severely reduced the scope of effective parliamentary control At the same time the declining stability of political alignments has increased the proportion of citizens whose voting decisions are not constrained by long standing party loyalties In conjunction with the mediatization of politics this has increased the capacity of political leaders to by pass their party machines and to appeal directly to voters As a result three interrelated processes have led to a political process increasingly moulded by the inherent logic of presidentialism increasing leadership power and autonomy within the political executive increasing leadership power and autonomy within political parties and increasingly leadership centred electoral processes The book presents evidence for this process of presidentialization for 14 modern democracies including the US and Canada While there are substantial cross national differences the overall thesis holds modern democracies are increasingly following a presidential logic of governance through which leadership is becoming more central and more powerful but also increasingly dependent on successful immediate appeal to the mass public Implications for democratic theory are considered

Pestritto, 2005-01-20 Woodrow Wilson is best known for his service as the twenty eighth president of the United States and his influence on American foreign policy in the twentieth century and beyond Yet Wilson is equally important for his influence on how Americans think about their Constitution and principles of government *Woodrow Wilson and the Roots of Modern Liberalism* highlights Wilson's sharp departure from the traditional principles of American government most notably the Constitution Ronald J Pestritto persuasively argues that Wilson's unfailing criticism places him clearly in line with the Progressives assault on the original principles of American constitutionalism Drawing primarily from early writings and speeches that Wilson made during his years as a scholar Pestritto examines the future president's clear and consistent ideologies that laid the foundation for later actions taken as a public leader Engaging and thought provoking *Woodrow Wilson and the Roots of Modern Liberalism* gets to the heart of Wilson's political ideologies and brings a fresh perspective to the study of American political development
