Patterson,2013-10-08 As the journalist Walter Lippmann noted nearly a century ago democracy falters if there is no steady supply of trustworthy and relevant news Today s journalists are not providing it Too often reporters give equal weight to facts and biased opinion stir up small controversies and substitute infotainment for real news Even when they get the facts rights they often misjudge the context in which they belong Information is the lifeblood of a healthy democracy Public opinion and debate suffer when citizens are misinformed about current affairs as is increasingly the case Though the failures of today s communication system cannot be blamed solely on the news media they are part of the problem and the best hope for something better Patterson proposes knowledge based journalism as a corrective Unless journalists are more deeply informed about the subjects they cover they will continue to misinterpret them and to be

vulnerable to manipulation by their sources In this book derived from a multi year initiative of the Carnegie Corporation and the Knight Foundation Patterson calls for nothing less than a major overhaul of journalism practice and education The book speaks not only to journalists but to all who are concerned about the integrity of the information on which America s democracy depends

*Non-Western Online Newspapers* Isyaku Hassan, Mohd Nazri Latiff Azmi, 2021-03-03 The media attention towards Islam has increased recently but meeting the quality standards in reporting the religion is often of great concern in this regard This issue has been debated since the aftermath of violent incidents such as the 9 11 attacks in 2001 the Afghanistan War in 2002 the Iraq War in 2003 the Danish cartoon row in 2005 the London bombings in 2005 the Paris attacks in 2015 and the New Zealand shootings in 2017 In reporting violence the media tend to construct a negative image of Islam which is likely to reproduce unfounded hostility toward Islam and Muslims known as Islamophobia This book provides a systematic analysis of how non western online newspapers reproduce Islamophobia in news reporting Regulating the Web Zachary Stiegler, 2013 Since its popularization in the mid 1990s the Internet has impacted nearly every aspect of our cultural and personal lives Over the course of two decades the Internet remained an unregulated medium whose characteristic openness allowed numerous applications services and websites to flourish By 2005 Internet Service Providers began to explore alternative methods of network management that would permit them to discriminate the quality and speed of access to online content as they saw fit In response the Federal Communications Commission sought to enshrine net neutrality in regulatory policy as a means of preserving the Internet's open nondiscriminatory characteristics Although the FCC established a net neutrality policy in 2010 debate continues as to who ultimately should have authority to shape and maintain the Internet's structure Regulating the Web brings together a diverse collection of scholars who examine the net neutrality policy and surrounding debates from a variety of perspectives In doing so the book contributes to the ongoing discourse about net neutrality in the hopes that we may continue to work toward preserving a truly open Internet structure in the United States

China's Peaceful Rise in a Global Context Jinghao Zhou, 2010-04-02 China's rise has become inevitable but there is no agreement about whether China will rise peacefully or pose a threat to the United States The author asserts that both theories of China threat and peaceful rise failed to address China's central domestic problem Thus both theories are not convincing This book attempts to develop a third view of China's rise from a domestic perspective and contends that China's potential threat to the existing global order is not derived from her rapid economic growth and military expansion but from her potential domestic chaos A strong democratic China will contribute to the global peace but the collapse of China will gravely threaten Western societies The current Chinese political system directly contributes to this social instability and could possibly cause China's social crash China's democratization is the key to ensure China's peaceful rise in a global context However the Party is still in power and any attempt to dissolve the one party system in present day China has poor prospects China must take a two step gradual reform approach to complete the transition from an authoritarian regime to a democratic one In the two step theory the first phase for promoting China's democratization includes exercising freedom of media increasing the consciousness of citizen participation and enacting religious rights Through all these democratic exercises China will gradually be able to achieve a fully democratic society This two step theory is crucial for the United States if it is to enact effective foreign policy toward China and for China to develop a democratic harmonious society
