Army,1934      **Umberto Nobile And the Arctic Search for the Airship Italia** Garth Cameron,2017-09-09 By the time it was over eight of the crew and nine rescuers

were dead and scores more had been put in harm's way. The disappearance and search for the airship Italia was headline news all over the world for months after its last radio message on 25 May 1928. It had reported being to the north east of its base at Kings Bay on the Arctic island of Spitsbergen returning from a long flight to Greenland and the North Pole. Ships, aircraft and men from many countries converged on Kings Bay to participate in the rescue effort. The Italian airship designer and pilot Umberto Nobile had flown to the North Pole and beyond in 1926. He resolved to return to the Arctic with a new airship in 1928. The expedition had geographical and scientific aims but the political environment was also an important motivator. Benito Mussolini and his fascist party had come to power in 1922 and a successful expedition to the Arctic would be excellent propaganda.

The Focke Helicopter H. Focke, 1938. This report presents some of the problems concerning tests of helicopters such as forced landings, controllability and stability, general safety, piloting, maneuvers, performance, servicing and the production of lift of a propeller. Test flights are described including a 67 mph flight by Hanna Reitsch.

**Realm of Ice and Sky** Buddy Levy, 2025-01-28. Two-time National Outdoor Book Award winning author Buddy Levy's thrilling narrative of polar exploration via airship and the men who sacrificed everything to make history. Arctic explorer and American visionary Walter Wellman pioneered both polar and trans-Atlantic airship aviation, making history's first attempts at each. Wellman has been cast as a self-promoting egomaniac known mostly for his catastrophic failures. Instead, he was a courageous innovator who pushed the boundaries of polar exploration and paved the way for the ultimate conquest of the North Pole, which would be achieved not by dogsled or airplane but by airship. American explorer Dr. Frederick Cook was the first to claim he made it to the North Pole in 1908. A year later so did American Robert Peary, but both Cook's and Peary's claims had been seriously questioned. There was enough doubt that Norwegian explorer extraordinaire Roald Amundsen, who'd made history and a name for himself by being first to sail through the Northwest Passage and first man to the South Pole, picked up where Walter Wellman left off, attempting to fly to the North Pole by airship. He would go in the Norge, designed by Italian aeronautical engineer Umberto Nobile. The 350-foot Norge flew over the North Pole on May 12, 1926, and Amundsen was able to accurately record and verify their exact location. However, the engineer Nobile felt slighted by Amundsen. Two years later, Nobile returned this time in the Italia, backed by Prime Minister Benito Mussolini. This was an Italian enterprise and Nobile intended to win back the global accolades and reputation he believed Amundsen had stripped from him. The journey ended in disaster, death, and accusations of cannibalism, launching one of the great rescue operations the world had ever seen. *Realm of Ice and Sky* is the riveting tale

of the men who first flew the most advanced technological airships of their time to the top of the world risking and even giving their lives for science country and polar immortality      Dirigible Airships United States.
