Preventing Reading Failure An Examination Of The Myths Of Reading Instruction:

Preventing Reading Failure Patrick J. Groff, 1987 Intended for reading teachers and teacher educators this book provides an analysis of 12 fallacious beliefs thought to be responsible for the perpetuation of ineffective and inappropriate approaches to reading instruction The introduction looks at the dangers of the myths that underlie reading instruction discusses how the myths arise out of an apparently historical opposition to phonics instruction and touches on the goals of the book The next 12 chapters examine the myths and research refuting them which are as follows 1 phonics hinders comprehension 2 unpredictable spelling invalidates phonics 3 reading is based on sight words 4 reading is best taught in sentences 5 oral language test scores equal reading readiness 6 word length makes no difference 7 instruction should match students preferred learning modalities visual or aural orientation 8 letter names are unimportant 9 dictionary syllabication is needed 10 reading tests should be replaced by oral reading miscue analysis ORMA 11 subvocalization is bad and 12 oral reading is dangerous The next chapter discusses why the myths of reading instruction prevail citing such factors as publishers and writers of basal readers prejudice and lack of knowledge about phonics opposition to phonics from teachers organizations and the underuse of research findings The last chapter argues that the compulsion to dispel the myths must come from forces the reading establishment opposes a national commission on literacy merit pay for teachers an educational voucher system and private sector training of teachers A 16 page bibliography concludes the document HTH *Private Sector Alternatives for Preventing Reading Failure* Patrick J. Groff, 1987

organization Invisible Eugenics Mark M. Rich, Wealthy eugenicist psychopaths have launched a covert eugenics program to reduce the population They are attacking citizens with chemical weapons disguised as medicine which slowly inflict many devastating medical conditions The victims suffer a reduced lifespan and are removed from the breeding pool They have established complete control of the public schools which have been transformed into eugenic laboratories These laboratories are used to identify and destroy any positive values that might foster individual development and to identify those to be attacked The teachers and doctors are on the frontline working together to identify the resisters who are attacked for life with chemical weapons under the guise of medical treatment There is a highly coordinated worldwide coverup of the deaths and injuries caused by these weapons This population control agenda can be traced back to the late 1800s when they vowed to eliminate certain bloodlines to purify the human race **Monthly Catalogue, United States Public Documents**, 1990-05 **Monthly Catalog of United States Government Publications** United States. Superintendent of Documents, 1990 **Annual Report of the National Council on Educational Research** National Council on Educational Research, 1981 **Show-n-Tell on Schools** Susan Darst Williams, Dr. Su, 1999-09 This book includes funny fact packed briefings about key issues that will help parents take charge of their children s educations This primer for parent power takes you through 26 school issues from A to Z whole language new math Goals 2000 school to work and many other hot topics This book will encourage and teach parents how to get more involved in their children s educations The Decline and Fall of American Education, and a Blueprint for Its Resurrection Carl Walter Salser, Fred West, 1991 **The Money Myth** W. Norton Grubb, 2009-01-15 Can money buy high quality education Studies find only a weak relationship between public school funding and educational outcomes In The Money Myth W Norton Grubb proposes a powerful paradigm shift in the way we think about why some schools thrive and others fail The greatest inequalities in America s schools lie in factors other than fiscal support Fundamental differences in resources other than money for example in leadership instruction and tracking policies explain the deepening divide in the success of our nation s schoolchildren The Money Myth establishes several principles for a bold new approach to education reform Drawing on a national longitudinal dataset collected over twelve years Grubb makes a crucial distinction between simple resources and those compound complex and abstract resources that cannot be readily bought Money can buy simple resources such as higher teacher salaries and smaller class sizes but these resources are actually some of the weakest predictors of educational outcomes On the other hand complex resources pertaining to school practices are astonishingly strong predictors of success Grubb finds that tracking policies have the most profound and consistent impact on student outcomes over time Schools often relegate low performing students particularly minorities to vocational remedial and special education tracks So even in well funded schools resources may never reach the students who need them most Grubb also finds that innovation in the classroom has a critical impact on student success Here too America s schools are stratified Teachers in underperforming schools tend to devote significant amounts of time to

administration and discipline while instructors in highly ranked schools dedicate the bulk of their time to engaged learning using varied pedagogical approaches Effective schools distribute leadership among many instructors and administrators and they foster a sense of both trust and accountability These schools have a clear mission and coherent agenda for reaching goals Underperforming schools by contrast implement a variety of fragmented reforms and practices without developing a unified plan This phenomenon is perhaps most powerfully visible in the negative repercussions of No Child Left Behind In a frantic attempt to meet federal standards and raise test scores quickly more and more schools are turning to scripted off the shelf curricula These practices discourage student engagement suppress teacher creativity and hold little promise of improving learning beyond the most basic skills Grubb shows that infusions of money alone won't eradicate inequality in America's schools We need to address the vast differences in the way school communities operate By looking beyond school finance The Money Myth gets to the core reasons why education in America is so unequal and provides clear recommendations for addressing this chronic national problem
