F.A.C.S, 2009-03 I was a Family Doctor Surgeon on the Fort Peck Indian reservation in Montana for four years in 1962-6 This book is a collection of stories about my experiences mainly with the Sioux Indians **Social Organization and Social Usages of the Indians of the Creek Confederacy** John Reed Swanton, 1928 **Social Order and Political Change** Duane Champagne, 1992-07-01 Under what conditions can democratic governments be formed and become stable The author addresses this question in a unique way that brings sociological and political theory to bear on the study of traditional societies long the preserve of historians and anthropologists By examining in detail the history of four American Indian societies the Cherokee the Choctaw the Chickasaw and the Creek the author documents a general theory of politics and constitutional government The four societies present an opportunity to study the process of democratic institution building in a controlled comparative historical context The societies were subject to similar geopolitical relations with the United States they were incorporated into the same sequence of world economic system relations initially fur trade and then the cotton market they experienced the emergence of class structures and they all produced some form of constitutional democracy The Cherokee however adopted a stable constitutional government earlier and with less coercion than the other three nations Why was this so With the aid of comparative analysis the author finds the answer in the Cherokee differentiation of politics from the nationally and religiously ordered clan system This set of institutional relations allowed the Cherokee to maintain a strong sense of social solidarity while tolerating conflict increased political differentiation and formation of a political nationality The other three societies were either less differentiated or less socially unified They formed their constitutional governments thirty to forty years later than the Cherokee and with more internal political coercion and in the Creek case with less political stability The formation and stabilization of democratic state governments is a major issue in such

contemporary phenomena as political change in Third World nations and the transformation of the governments of Eastern Europe The four case studies presented in this book form the basis of a new and powerful theoretical argument for understanding historical patterns of democratic change political stability and the relations of political power

Asian Revitalization Katie Cummer, 2021-01-11 Adaptive reuse refers to reusing an old building for a purpose other than which it was originally built or designed This conservation approach has become increasingly popular around the world However there are few publications that focus on its application in Asia This book fills this gap by looking at both unique and shared aspects of adaptive reuse in three Asian urban centers Hong Kong Shanghai and Singapore Building on government policy documents and extensive field work this book contextualizes adaptive reuse in each city and reveals the impetus behind a wide range of projects from revitalization in Hong Kong commercial development in Shanghai to community building in Singapore The introductory chapter sets adaptive reuse within an international perspective noting salient differences and similarities between Asia and other parts of the world It also anchors the discussion within a regional perspective focusing on the similarities and differences between Hong Kong Shanghai and Singapore Each of the following four essays addresses a specific topic about adaptive reuse including its relationship to urban development and sustainability how it benefits heritage buildings and how it reveals best practices in heritage conservation in Asia The subsequent three essays one for each city supplemented with timelines set out a clear framework for understanding the city specific case studies that follow the essays

Afterwards fifteen representative projects across the three cities are presented as in depth case studies The pairing of essays and case studies provides a detailed understanding of each city s approach to adaptive reuse in the twenty first century a time when the need for sustainable development solutions are at the forefront Intended for classroom use and professional readership this book will be of considerable value in Asia as well as elsewhere providing material for stimulating and worthwhile discussion Asian Revitalization is a highly practical and accessible volume on the long established conservation practice of adaptive reuse in East Asia Its focus on real life issues examples and challenges posed by revitalization programs in the region is extremely relevant to researchers and practitioners in architectural conservation urban design and urban studies Miles Glendinning University of Edinburgh Scotland This is a superb well documented and original book written by some of the best known and highly respected authors in the field of heritage conservation The carefully examined case studies illustrate a wide variety of solutions that highlight the work of some of the best minds of the next generations Alastair Kerr University of Victoria Canada This is a most interesting set of essays informative and thought provoking The best way to save any heritage building is by keeping it in beneficial use and how to achieve this in a sensitive manner is what these essays are about They should be vital reading for anyone considering an adaptive reuse project in Asia Michael Morrison Purcell UK With cultural heritage firmly ensconced in the global development agendas of the United Nations this well grounded volume draws upon the experience of Hong Kong SAR Shanghai and Singapore to demonstrate to scholars and practitioners alike how historic properties can be sustained through savvy adaptive reuse in the midst of tremendous urban redevelopment pressures Montira Horayangura Unakul UNESCO Bangkok Thailand

Tracing Contemporary Chinese Art Isaac Leung,2023-11-13 This book explores the author s ten year ethnographic journey in different locations in Shanghai His immersion in China s art world is grounded in a topology of places and new ways of writing and deploying history today The ethnographic approaches to experiencing analysing and representing space offer a critical tool to explore a different version of realism invisible in the nominal art and art history paradigms As the market and institutional norms are still being defined this book also documents and analyses how individuals have strived to negotiate boundaries in the art world and thus create unique selfhood Instead of conventional methods of periodisation and stylistic analysis this book presents a historiographic strategy emphasising the philosophical significance of spatial realism to offer insights into history subjectivities and political institutions

The Nazi Card Brian Johnson,2017-01-25 The Cold War began almost immediately after the end of World War II and the defeat of the Nazis in Europe As images of the Nazis atrocities became part of American culture s common store the evil of their old enemy beyond the Nazis as a wartime opponent became increasingly important As America tried to describe the danger represented by the spread of Communism it fell back on descriptions of Nazism to make the threat plain through comparison At the heart of the tensions of that era lay the inconsistency of using one kind of evil to describe another The book addresses this tension in regards to McCarthyism campaigns to educate the public about Communism attempts to raise support for wars in Asia and the rhetoric of civil rights Each of these political arenas is examined through their use of Nazi analogies in popular political and literary culture The Nazi Card is an invaluable look at the way comparisons to Nazis are used in American culture the history of those comparisons and the repercussions of establishing a political definition of evil
