how many Americans came to view powerful corporations and a federal government bent on economic growth as threats to human health and the environment Fallout from atomic testing air and water pollution the proliferation of pesticides and herbicides all connected to the growing dominance of technology and corporate capitalism in American life led a variety of constituencies to seek solutions in what came to be known as environmentalism In addition to political and legal campaigns to effect change an alternative form of civic participation emerged beginning in the late 1940s as growing numbers of citizens turned to what they deemed environmentally friendly consumption practices The goal of this politically charged consumption was not only to protect themselves and their families from harm but also to achieve social change at a time when many believed the government was placing the desires of business before the needs of its citizens Politicians responded to the growing environmental concerns of middle class Americans but in the end continual political compromises with corporate power meant weak laws and lax enforcement Many citizens sought refuge in an alternative green marketplace including organic foods natural fiber clothing alternative energy and everyday products designed to have minimal environmental impact In doing so they attempted to create a community for those who shared their concerns and frustrations as well as their vision for a different American Way Thomas Jundt s work highlights the intertwining of consumerism and environmentalism amidst the growing power of corporate capitalism and government in postwar America *What's Your Red, White, and Blue IQ?* Stephen J.
