his interest in the political and economic goals of schooling particularly the attempts of those in power to use schools to destroy indigenous languages and cultures In this collection Spring brings together 10 of his key writings providing an overview not just of his own career but the larger contexts in which it is situated In the Introduction he reviews the evolution and scope of his work and his earlier arguments and reflects on its central themes which are reflected in the writings selected for this volume In the World Library of Educationalists international scholars themselves compile career long collections of what they judge to be their finest pieces extracts from books key articles salient research findings major theoretical and practical contributions so the world can read them in a single manageable volume Readers will be able to follow the themes and strands of their work and see their contribution to the development of a field as well as the development of the field itself Contributors to the series include Michael Apple James A Banks Stephen J Ball Elliot Eisner Howard Gardner John Gilbert Ivor F Goodson Peter Jarvis

Protecting Human Rights and Building Peace in Post-Violence Societies Nasia Hadjigeorgiou, 2020-02-20 This book critically examines the relationship between protecting human rights and building peace in post violence societies It explores the conditions that must be present and strategies that should be adopted for the former to contribute to the latter The author argues that human rights can aid peacebuilding efforts by helping victims of past violence to articulate their grievance and by encouraging the state to respond to and provide them with a meaningful remedy This usually happens either through a process of adjudication whereby human rights can offer guidance to the judiciary as to the best way to address such grievances or through the passing and implementation of human rights laws and policies that seek to promote peace However this positive relationship between human rights and peace is both qualified and context specific Through an interdisciplinary and comparative analysis of four case studies the book identifies the conditions that can support the effective use of human rights as peacebuilding tools Developing these the book recommends a series of strategies that peacebuilders should adopt and rely on Winner of the Constantinos Emilianides Award in Law for 2020 joint conferment

Indirect Discrimination Christa Tobler, 2005 Introduced into European Community law by the Court of Justice through its case law in the field of free movement of workers the legal concept of indirect discrimination has evolved

into one with far wider and greater relevance to many other areas of EC law as well This book analyses the concept of indirect discrimination in a broad and comparative context which encompasses both economic and social law

**After Brown** Charles T. Clotfelter, 2011-10-16 The United States Supreme Court's 1954 landmark decision *Brown v Board of Education* set into motion a process of desegregation that would eventually transform American public schools This book provides a comprehensive and up to date assessment of how Brown's most visible effect contact between students of different racial groups has changed over the fifty years since the decision Using both published and unpublished data on school enrollments from across the country Charles Clotfelter uses measures of interracial contact racial isolation and segregation to chronicle the changes He goes beyond previous studies by drawing on heretofore unanalyzed enrollment data covering the first decade after Brown calculating segregation for metropolitan areas rather than just school districts accounting for private schools presenting recent information on segregation within schools and measuring segregation in college enrollment Two main conclusions emerge First interracial contact in American schools and colleges increased markedly over the period with the most dramatic changes occurring in the previously segregated South Second despite this change four main factors prevented even larger increases white reluctance to accept racially mixed schools the multiplicity of options for avoiding such schools the willingness of local officials to accommodate the wishes of reluctant whites and the eventual loss of will on the part of those who had been the strongest protagonists in the push for desegregation Thus decreases in segregation within districts were partially offset by growing disparities between districts and by selected increases in private school enrollment

**Knocking on the Door** Christopher Bonastia, 2010-11-16 *Knocking on the Door* is the first book length work to analyze federal involvement in residential segregation from Reconstruction to the present Providing a particularly detailed analysis of the period 1968 to 1973 the book examines how the U S Department of Housing and Urban Development HUD attempted to forge elementary changes in segregated residential patterns by opening up the suburbs to groups historically excluded for racial or economic reasons The door did not shut completely on this possibility until President Richard Nixon took the drastic step of freezing all federal housing funds in January 1973 *Knocking on the Door* assesses this near miss in political history exploring how HUD came surprisingly close to implementing rigorous antidiscrimination policies and why the agency's efforts were derailed by Nixon Christopher Bonastia shows how the Nixon years were ripe for federal action to foster residential desegregation The period was marked by new legislative protections against housing discrimination unprecedented federal involvement in housing construction and frequent judicial backing for the actions of civil rights agencies By comparing housing desegregation policies to civil rights enforcement in employment and education Bonastia offers an unrivaled account of why civil rights policies diverge so sharply in their ambition and effectiveness

**The Detroit School Busing Case** Joyce A. Baugh, 2011-02-16 In the wake of *Brown v Board of Education* racial equality in American public education appeared to have a bright future But for many that brightness dimmed

considerably following the Supreme Court's landmark decision in *Milliken v Bradley* 1974. While the literature on Brown is voluminous, Joyce Baugh's measured and insightful study offers the only available book-length analysis of Milliken, the first major desegregation case to originate outside the South. As Baugh chronicles when the city of Detroit sought to address school segregation by busing white students to black schools, a Michigan statute signed by Gov. William Milliken overruled the plan. In response, the NAACP sued the state on behalf of Ronald Bradley and other affected parents. The federal district court sided with the plaintiffs and ordered the city and state to devise a metropolitan plan that crossed city lines into the suburbs and encompassed a total of fifty-four school districts. The state, however, appealed that decision all the way to the Supreme Court. In its controversial 5-4 decision, the Court's new conservative majority ruled that since there was no evidence that the suburban school districts had deliberately engaged in a policy of segregation, the lower court's remedy was wholly impermissible and not justified by Brown, which the Court said could only address *de jure* not *de facto* segregation. While the Court's majority expressed concern that the district court's remedy threatened the sanctity of local control over schools, the minority contended that the decision would allow residential segregation to be used as a valid excuse for school segregation. To reconstruct the proceedings and give all claims a fair hearing, Baugh interviewed lawyers representing both sides in the case as well as the federal district judge who eventually closed the litigation, plumbed the papers of Justices Blackmun, Brennan, Douglas, and Marshall, talked with the main reporter who covered the case, and researched the NAACP files on Milliken. What emerges is a detailed account of how and why Milliken came about as well as its impact on the Court's school desegregation jurisprudence and on public education in American cities.

**The Oxford Handbook of Philosophy and Disability** Adam Cureton, David Wasserman, 2020-05-14. Disability raises profound and fundamental issues: questions about human embodiment and well-being, dignity, respect, justice, and equality, personal and social identity. It raises pressing questions for educational, health, reproductive, and technology policy and confronts the scope and direction of the human and civil rights movements. Yet it is only recently that disability has become the subject of the sustained and rigorous philosophical inquiry that it deserves. The Oxford Handbook of Philosophy and Disability is the first comprehensive volume on the subject. The volume's contents range from debates over the definition of disability to the challenges posed by disability for justice and dignity; from the relevance of disability for respect, other interpersonal attitudes, and intimate relationships to its significance for health policy, biotechnology, and human enhancement; from the ways that disability scholarship can enrich moral and political philosophy to the importance of physical and intellectual disabilities for the philosophy of mind and action. The contributions reflect the variety of areas of expertise, intellectual orientations, and personal backgrounds of their authors. Some are founding philosophers of disability; others are promising new scholars; still others are leading philosophers from other areas writing on disability for the first time. Many have disabilities themselves. This volume boldly explores neglected issues, offers fresh perspectives on familiar ones, and ultimately expands philosophy's boundaries. More than merely

presenting an overview of existing work this Handbook will chart the growth and direction of a vital and burgeoning field for years to come

**Bottlenecks** Joseph Fishkin, 2014-01-10 Equal opportunity is a powerful idea and one with extremely broad appeal in contemporary politics political theory and law But what does it mean On close examination the most attractive existing conceptions of equal opportunity turn out to be impossible to achieve in practice or even in theory As long as families are free to raise their children differently no two people's opportunities will be equal nor is it possible to disentangle someone's abilities or talents from her background advantages and disadvantages Moreover given different abilities and disabilities different people need different opportunities confounding most ways of imagining what counts as equal This book proposes an entirely new way of thinking about the project of equal opportunity Instead of focusing on the chimera of literal equalization we ought to work to broaden the range of opportunities open to people at every stage in life We can achieve this in part by loosening the bottlenecks that constrain access to opportunities the narrow places through which people must pass in order to pursue many life paths that open out on the other side A bottleneck might be a test like the SAT a credential requirement like a college degree or a skill like speaking English It might be membership in a favored caste or racial group Bottlenecks are part of the opportunity structure of every society But their severity varies By loosening them we can build a more open and pluralistic opportunity structure in which people have more of a chance throughout their lives to pursue paths they choose for themselves rather than those dictated by limited opportunities This book develops this idea and other elements of opportunity pluralism then applies this approach to several contemporary egalitarian policy problems class and access to education workplace flexibility and work family conflict and antidiscrimination law
