Sally M. Miller,Daryl Morrison,2005 New information on the life of the famed environmentalist presented in 2001 at the John Muir Institute hosted by the John Muir Center *Seed of the Future* Dayton Duncan,2013-11-26 It s now a given that Americans and people the world over would seek to preserve their sacred special places One hundred fifty years ago however it was definitely not a foregone conclusion that the awe inspiring granite cliffs astounding waterfalls and sublime sequoias of Yosemite would be protected This idea of preservation was the national park idea an idea that started from a seed a seed that was planted in Yosemite It was through the efforts of people like James Mason Hutchings Galen Clark Frederick Law Olmsted John Muir and Theodore Roosevelt among others that the world learned of Yosemite flocked to it nearly destroyed it and ultimately saved it These fascinating characters and their remarkable stories are skillfully woven together in this beautiful volume created expressly to capture the wonder of Yosemite and to inspire future generations to do their part for wild places

This Green and Growing Land Kevin C. Armitage,2017-12-01 From Benjamin Franklin s campaign to combat pollution at the Philadelphia s docks in the 1750s to the movement against climate change today American environmentalists have sought to protect the natural world and promote a healthy human society In *This Green and Growing Land* historian Kevin Armitage shows how the story of American environmentalism part philosophy part social movement is in no small way a story of America itself of the way citizens have self organized have thought of their communities and their government and have used their power to protect and enrich the land Armitage skillfully analyzes the economic and social forces begetting environmental change and emphasizes the responses of a variety of ordinary Americans as well as a few well known leaders to these complex issues This concise and engaging survey of more than 250 years of activism tells the story of a magnificent American achievement and the ongoing problems that environmentalism faces **Nature, Technology, and Society** Victor Ferkiss,1994-11 Traces cultural attitudes toward the environment and technology across the span of human civilization While all human societies have enlisted technologies to control nature the last hundred years have witnessed the technological exploitation and destruction of natural resources on an unprecedented scale As environmental groups and the scientific community sound the alarm about deforestation global warming and ozone depletion the obvious question arises how did we

get where we are today In *Nature Technology and Society* Victor Ferkiss sets out to answer this central question arguing that we cannot escape from our present environmental predicament unless we understand the ideas which have created it Ferkiss asks the basic questions concerning humans and their relationship to the environment He traces cultural attitudes towards the environment from early mankind to the present day This fascinating book is distinctive both in its comprehensiveness and in its attempt to place side by side influential thinkers and movements with varied views on these issues *The Humboldt Current* Aaron Sachs,2007-07-31 A masterly and beautifully written account of the impact of Alexander von Humboldt on nineteenth century American history and culture The naturalist and explorer Alexander von Humboldt 1769 1859 achieved unparalleled fame in his own time Today however he and his enormous legacy to American thought are virtually unknown In *The Humboldt Current* Aaron Sachs traces Humboldt s pervasive influence on American history through examining the work of four explorers J N Reynolds Clarence King George Wallace and John Muir who embraced Humboldt s idea of a chain of connection uniting all peoples and all environments A skillful blend of narrative and interpretation that also discusses Humboldt s influence on Emerson Whitman Thoreau Melville and Poe *The Humboldt Current* offers a colorful passionate and superbly written reinterpretation of nineteenth century American history *Cast Out of Eden* Robert Aquinas McNally,2024-05 *Cast Out of Eden* explores John Muir s role in the legacy of racialized colonialism affecting U S wild lands and points toward a way forward ***The National Parks*** Dayton Duncan,Ken Burns,2009-09-08 The companion volume to the twelve hour PBS series from the acclaimed filmmaker behind *The Civil War* *Baseball* and *The War* America s national parks spring from an idea as radical as the Declaration of Independence that the nation s most magnificent and sacred places should be preserved not for royalty or the rich but for everyone In this evocative and lavishly illustrated narrative Ken Burns and Dayton Duncan delve into the history of the park idea from the first sighting by white men in 1851 of the valley that would become Yosemite and the creation of the world s first national park at Yellowstone in 1872 through the most recent additions to a system that now encompasses nearly four hundred sites and 84 million acres The authors recount the adventures mythmaking and intense political battles behind the evolution of the park system and the enduring ideals that fostered its growth They capture the importance and splendors of the individual parks from Haleakala in Hawaii to Acadia in Maine from Denali in Alaska to the Everglades in Florida from Glacier in Montana to Big Bend in Texas And they introduce us to a diverse cast of compelling characters both unsung heroes and famous figures such as John Muir Theodore Roosevelt and Ansel Adams who have been transformed by these special places and committed themselves to saving them from destruction so that the rest of us could be transformed as well *The National Parks* is a glorious celebration of an essential expression of American democracy *A Natural History of Nature Writing* Frank Stewart,2012-07-11 *A Natural History of Nature Writing* is a penetrating overview of the origins and development of a uniquely American literature Essayist and poet Frank Stewart describes in rich and compelling prose the lives and works of the most prominent American nature writers of the 19th and

20th centuries including Henry D Thoreau the father of American nature writing John Burroughs a schoolteacher and failed businessman who found his calling as a writer and elevated the nature essay to a loved and respected literary form John Muir founder of Sierra Club who celebrated the wilderness of the Far West as few before him had Aldo Leopold a Forest Service employee and scholar who extended our moral responsibility to include all animals and plants Rachel Carson a scientist who raised the consciousness of the nation by revealing the catastrophic effects of human intervention on the Earth's living systems Edward Abbey an outspoken activist who charted the boundaries of ecological responsibility and pushed these boundaries to political extremes Stewart highlights the controversies ignited by the powerful and eloquent prose of these and other writers with their expansive and often strongly political points of view Combining a deeply felt sense of wonder at the beauty surrounding us with a rare ability to capture and explain the meaning of that beauty nature writers have had a profound effect on American culture and politics A Natural History of Nature Writing is an insightful examination of an important body of American literature

**Son of the Wilderness** Linnie Marsh Wolfe, 2003 This Pulitzer Prize winning biography is available in an updated paperback edition Working closely with Muir's family and with his papers Wolfe was able to create a full portrait of her subject not only as America's firebrand conservationist and founder of the national park system but also as husband father and friend Illustrations

[John Muir's Last Journey](#) John Muir, 2013-04-10 I am now writing up some notes but when they will be ready for publication I do not know It will be a long time before anything is arranged in book form These words of John Muir written in June 1912 to a friend proved prophetic The journals and notes to which the great naturalist and environmental figure was referring have languished unpublished and virtually untouched for nearly a century Until now Here edited and published for the first time John Muir's travel journals from 1911-12 along with his associated correspondence finally allow us to read in his own words the remarkable story of John Muir's last great journey Leaving from Brooklyn New York in August 1911 John Muir at the age of seventy three and traveling alone embarked on an eight month 40 000 mile voyage to South America and Africa The 1911-12 journals and correspondence reproduced in this volume allow us to travel with him up the great Amazon into the jungles of southern Brazil to snowline in the Andes through southern and central Africa to the headwaters of the Nile and across six oceans and seas in order to reach the rare forests he had so long wished to study Although this epic journey has received almost no attention from the many commentators on Muir's work Muir himself considered it among the most important of his life and the fulfillment of a decades long dream John Muir's Last Journey provides a rare glimpse of a Muir whose interests as a naturalist traveler and conservationist extended well beyond the mountains of California It also helps us to see John Muir as a different kind of hero one whose endurance and intellectual curiosity carried him into far fields of adventure even as he aged and as a private person and family man with genuine affections ambitions and fears not just an iconic representative of

American wilderness With an introduction that sets Muir's trip in the context of his life and work along with chapter introductions and a wealth of explanatory notes the book adds important dimensions to our appreciation of one of America's greatest environmentalists John Muir's Last Journey is a must reading for students and scholars of environmental history American literature natural history and related fields as well as for naturalists and armchair travelers everywhere Savage Dreams Rebecca Solnit, 2014-06-06 In 1851 a war began in what would become Yosemite National Park a war against the indigenous inhabitants that has yet to come to a real conclusion A century later 1951 and about a hundred and fifty miles away another war began when the U S government started setting off nuclear bombs at the Nevada Test Site It was called a nuclear testing program but functioned as a war against the land and people of the Great Basin **Environmental Studies** Diane M. Fortner, 1994 Written for young people who are just beginning to develop an awareness about one planet one people and one home Includes nature writings legal history current news and a prediction for the future John Muir Rod Miller, 2013-05-28 In 1849 11 year old John Muir immigrated from Scotland to America Here he rose from farmer and sawmill worker to become a noted authority on the botany glaciers and forestry of the nation's wilderness Best known for his long association with the Yosemite Valley and Sierra Nevada Mountains of California Muir also explored mostly afoot the southern States Alaska the Great Basin and the Mojave Desert His studies of nature took him around the world and generated volumes of poetic evocative writings As America expanded relentlessly westward Muir witnessed the plunder and exploitation of the land and became a driving force in efforts to protect the natural world A modest and private man married and father of two doting daughters his conservationist views forced him into battle with powerful political and industrial interests Some battles he won influencing four US Presidents to sponsor legislation that protected forests and established or expanded America's national parks Muir lost his last and perhaps most personal battle He fought until near the end of his life to prevent the Hetch Hetchy Valley in Yosemite National Park from becoming a reservoir for the city of San Francisco Some of his conservationist friends believed the conflict so sapped his physical emotional and spiritual strength that it contributed to his death Remembered as the founder of the Sierra Club father of America's conservation movement and architect of a still growing wilderness ethic Muir set an example many still follow fighting today's threats to the environment At the Publisher's request this title is being sold without Digital Rights Management Software DRM applied
