Rediscovery Of The Frontier:

The Rediscovery of the Frontier Percy Holmes Boynton, 1970 The Rediscovery of the Frontier, By Percy H. Boynton Percy Holmes Boynton, 1968 **The People's Republic of China at 60** William C. Kirby, 2020-10-26 In 2009 the Fairbank Center for Chinese Studies convened a major conference to discuss the health and longevity of China's ruling system and to consider a fundamental question After three decades of internal strife and turmoil followed by an era of reform entrepreneurialism and internationalization is the PRC here for the dynastic long haul Bringing together scholars and students of China from around the world the gathering witnessed an energetic exchange of views on four interrelated themes politics social transformations wealth and well being and culture belief and practice Edited and expanded from the original conference papers the wide ranging essays in this bilingual volume remain true to the conference's aim to promote open discussion of the past present and future of the People's Republic of China Impossible Heights Adnan Morshed, 2015-01-15 The advent of the airplane and skyscraper in 1920s and 30s America offered the population an entirely new way to look at the world from above The captivating image of an airplane flying over the rising metropolis led many Americans to believe a new civilization had dawned In *Impossible Heights* Adnan Morshed examines the aesthetics that emerged from this valorization of heights and their impact on the built environment The lofty vantage point from the sky ushered in a modernist impulse to cleanse crowded twentieth century cities in anticipation of an ideal world of tomorrow Inspired by great new heights American architects became central to this endeavor and were regarded as heroic aviators Combining close readings of a broad range of archival sources Morshed offers new interpretations of works such as Hugh Ferriss's *Metropolis* drawings Buckminster Fuller's *Dymaxion* houses and Norman Bel Geddes's *Futurama* exhibit at the 1939 New York World's Fair Transformed by the populist imagination into master builders these designers helped produce a new form of visuality the aesthetics of ascension By demonstrating how aerial movement and height intersect with popular superman discourses of the time Morshed reveals the relationship between architecture art science and interwar pop culture Featuring a marvelous array of never before published illustrations this richly textured study of utopian imaginings illustrates America's propulsion into a new cultural consciousness *The Rediscovery of America* Ned Blackhawk, 2023-04-25 A sweeping and overdue retelling of U.S. history that recognizes that Native Americans are essential to understanding the evolution of modern America The most enduring feature of U.S. history is the presence of Native Americans yet most histories focus on Europeans and their descendants This long practice of ignoring Indigenous history is changing however with a new generation of scholars insists that any full American history address the struggle survival and resurgence of American Indian nations Indigenous history is essential to understanding the evolution of modern America Ned Blackhawk interweaves five centuries of Native and non Native histories from Spanish colonial exploration to the rise of Native American self determination in the late twentieth century In this transformative synthesis he shows that European colonization in the 1600s

was never a predetermined success Native nations helped shape England's crisis of empire the first shots of the American Revolution were prompted by Indian affairs in the interior California Indians targeted by federally funded militias were among the first casualties of the Civil War the Union victory forever recalibrated Native communities across the West twentieth century reservation activists refashioned American law and policy Blackhawk's retelling of U.S. history acknowledges the enduring power agency and survival of Indigenous peoples yielding a truer account of the United States and revealing anew the varied meanings of America

Dark Directions Kendall R. Phillips, 2012-02-28 A Nightmare on Elm Street Halloween Night of the Living Dead These films have been indelibly stamped on moviegoers' psyches and are now considered seminal works of horror Guiding readers along the twisted paths between audience auteur and cultural history author Kendall R. Phillips reveals the macabre visions of these films' directors in Dark Directions Romero Craven Carpenter and the Modern Horror Film Phillips begins by analyzing the works of George Romero focusing on how the body is used cinematically to reflect the duality between society and chaos concluding that the unconstrained bodies of the Living Dead films act as a critical intervention into social norms Phillips then explores the shadowy worlds of director Wes Craven In his study of the films *The Serpent and the Rainbow* *Deadly Friend* *Swamp Thing* *Red Eye* and *Shocker* Phillips reveals Craven's vision of technology as inherently dangerous in its ability to cross the gossamer thresholds of the gothic Finally the volume traverses the desolate frontiers of iconic director John Carpenter Through an exploration of such works as *Halloween* *The Fog* and *In the Mouth of Madness* Phillips delves into the director's representations of boundaries and the haunting consequences for those who cross them The first volume ever to address these three artists together Dark Directions is a spine-tingling and thought-provoking study of the horror genre In analyzing the individual works of Romero Craven and Carpenter Phillips illuminates some of the darkest minds in horror cinema
