Reducing Poverty Through Labour Market Policies New Approaches To Poverty Analysis And Policy Vol :

New Approaches to Poverty Analysis and Policy ,1995 Options Ricardo Infante *New Approaches to Poverty Analysis & Policy* J. Figueiredo,Z. Shaheed,ILO.,1995 *Labor Markets in Latin America* Sebastian Edwards,Nora Claudia Lustig,2001-06-29 Many of the rules that govern labor markets in Latin America and elsewhere raise labor costs create barriers to entry and introduce rigidities in the employment structure These include the exceedingly restrictive regulations on hiring and firing practices as well as burdensome social insurance schemes Such labor market regulations contribute to an over expansion of precarious forms of employment and to rural poverty and hinder countries from responding rapidly to new challenges from increased foreign competition At the same time other norms can reduce costs and raise productivity they should be kept in place and their enforcement improved For example some occupational health and safety standards lower medical costs and save lives One may also want to keep legislation aimed at providing a minimum social insurance for unemployment old age sickness and disabilities In practice the most common decision that governments confront is not whether to intervene but to choose among different forms of intervention This volume provides analysts and policymakers with useful insights on this issue Part I addresses labor market institutions in a broader context such as collective bargaining arrangements minimum wages and poverty and optimal unemployment insurance schemes Part II analyzes labor market performance in Latin America the links between performance and labor market regulations and the status of labor market reform in the region These questions are addressed for the region as a whole and in great detail for Argentina Brazil Chile Mexico and Colombia The book provides a comprehensive description of the existing labor institutions in Latin America the problems they pose and the trends in labor market reforms as well as the difficulties encountered by the reform process in specific cases In addition to the editors the contributors are Edward Amadeo Jose Marcio Camargo Alejandra Cox Edwards Rene Cortazar Enriqu Trade Unions and Poverty Reduction Strategies ,2004 **Report of the Director-General** International Labour Office,1996 Journal of Economic Literature ,1996 The Journal of Developing Areas ,1995

Minimum Wages and Poverty in Developing Countries Nora Lustig,1996 Examines the relationship between minimum wages and poverty **African Sociological Review** ,2000 **Contents of Recent Economics Journals** ,1997-12-19 **The World Bank Research Program, 2005-2007** ,2008 This pocket sized reference on key environmental data for over 200 countries includes key indicators on agriculture forestry biodiversity energy emission and pollution and water and sanitation The volume helps establish a sound base of information to help set priorities and measure progress toward environmental sustainability goals **International Labour Review** ,1997 Child Poverty and Deprivation in the Industrialized Countries, 1945-1995 Giovanni Andrea Cornia,Sheldon Danziger,1997 The authors in this volume utilize a common analytical framework to evaluate how economic family structure and public policy changes affected the well being of children in the industrialized countries in the West and the East from the end of the Second World War to the mid 1990s

Throughout the industrialized world the living standards and social well being of children improved remarkably over these five decades But the quarter century golden age that followed the Second World War gave way to a period of stagnation after the early 1970s Many of the negative developments of the past two decades could not have been easily prevented because of the profound structural changes that have affected all industrialised economies and the profound political changes that have affected the former Soviet Bloc Nonetheless adverse or neglectful social policies share some of the blame for the recent unfavourable changes in child well being The evidence presented suggests that given current economic prospects and family structures further weakening of social policies targeted at children could erode much of the progress of the past fifty years

Social Security and Welfare: Concepts and Comparisons Robert Walker, 2004-11-16 What are the objectives of social security and social assistance provisions How can we establish whether these provisions are effective How do countries differ in the design and effectiveness of their social security systems This introductory textbook provides a foundation for the systematic study of social security and means tested social assistance The book is structured around a model of policy evaluation which focuses attention on the multiple objectives and outcomes of social security and provides the basis for a multi disciplinary approach It progresses from an examination of the varied objectives of social security via a consideration of key implementation issues to the establishment of measures of effectiveness and efficiency Throughout the text theoretical issues are illustrated with reference to the experiences of six countries the United Kingdom the USA Australia Germany Sweden and South Korea to provide an international comparative framework This is a key textbook for students of social and public policy and economics and essential reading for anyone interested in social security social welfare and the welfare state

Development Strategies and Food and Nutrition Security in Africa Heidhues, Franz, Atsain, Achi, Nyangito, Hezron, Padilla, Martine, Gheri, Gérard, Le Vallée, Jean-Charles, 2004 Bibliography p 41 48 **ILO Programme Implementation** International Labour Office, 2000 **The Oxford Handbook of the Economics of Poverty** Philip N. Jefferson, 2012-11-05 Poverty is a pressing and persistent problem While its extent varies across countries its presence always represents the diminution of human capacity Therefore it seems natural to want to do something about it Have countries made progress in mitigating poverty How do we determine who is poor and who is not poor What intuitions or theories guide the design of anti poverty policy Is overall labor market performance the key to keeping the poverty rate low Or does it matter how well connected an individual is to those who know about the availability of jobs Does being an immigrant increase the odds of being poor Are there anti poverty policies that work For whom do they work If I m poor will I have access to health care and housing Am I more likely to be obese polluted upon incarcerated un banked and without assets if I m poor Is poverty too hard a problem for economic analysis These are some of the questions that a distinguished group of scholars have come together to confront in this Handbook The Handbook is written in a highly accessible style that encourages the reader to think critically about poverty Theories are presented in a rigorous but not overly technical way

concise and straightforward empirical analyses enlighten key policy issues The volume has six parts Poverty in the 21st Century Labor Market Factors Poverty Policy Poverty Dynamics Dimensions of Poverty and Trends and Issues in Anti Poverty Policy A goal of the Handbook is to stimulate further research on poverty To that end several chapters challenge conventional thinking about poverty and in some cases present specific proposals for the reform of economic and social policy

Income Inequality in OECD Countries Peter Hoeller, Isabelle Joumard, Isabell Koske, 2014 This book provides a comprehensive review of income inequality issues in the OECD in a cross country setting It presents a wealth of data and analysis on the formation of inequality and identifies groups of countries that share similar inequality patterns It also reviews developments at the extremes of the income distribution namely poverty top incomes as well as the distribution of wealth An important contribution of the book is the careful examination of the determinants of the income distribution such as globalisation and technical progress as well as the effect of a wide range of economic policies that shape the distribution of income These include in particular labour market regulations household taxes and transfers as well as in kind public services It also sheds light on an under researched issue do policies aimed at boosting economic growth raise or reduce income inequality

Identifying the Poor: Using Subjective and Consensual Measures Karel Van Den Bosch, 2017-11-01 This title was first published in 2002 An investigation into the problem of identifying the poor and determining the poverty line The book focuses on one particular approach to the issue where survey respondents are asked for their views and outlines the four variants in the approach the consensual income method the consensual standard of living method the income evaluation method and the income satisfaction method The book contains an extensive and thorough review of the theoretical and empirical literature as well as rigorous analysis of survey data from Belgium The result is a conclusive assessment of the validity and usefulness of the subjective and consensual approaches to poverty measurement

Policy Into Action Mary Clare Lennon, Tom Corbett, 2003 The sweeping changes of 1996 s welfare reform legislation are more than just new policies They represent a profound transformation of the character and structure of social policy institutions in the United States a shift from a bureaucratic centralized mode for income transfer to a professional mode aimed at complex behavioral change The evaluation community has responded with a shift from traditional impact analyses to implementation studies that get inside the skin of this new more flexible structure Implementation research explores the translation of concepts into working policies and programs and evaluates how well the administrative and management dimensions of these policies work and how the programs are experienced by all involved Policy into Action offers state of the art thinking on implementation research from leading policy researchers and evaluation practitioners
