# 1. Statement of the problem

We study of the Re-entry Vehicle (RV) motion about of mass center in the planetary atmospheres by regular and chaotic dynamics methods

The dynamics of a rotating body studied famous mathematicians of all time as **Euler, Poinsot, Lagrange and Kovalevskaya**. The research of the dynamics of rotating bodies is very important for numerous applications such as the dynamics of satellites and re-entries. In this area we note the papers scientists as **Yaroshevsky, Belezky, Rumyantsev, J.Nicolaides, G.Gross, C.Murphy** et al.

Doman,William B. Blake,2006 A method for estimating the effects of nose cone ablation on the aerodynamic forces and moments of a reentry vehicle is presented The method provides a means of generating a rough but representative model that makes use of interpolated test or prediction data using instantaneous nose cone mass as an interpolation variable An interpolation function is proposed that can be used to approximate the location of points on the outer moldline as well as the aerodynamic characteristics between node points While the changes in overall vehicle mass properties due to ablation are typically small one can make use of the interpolated outer mold line information to estimate mass properties such as moments of inertia or center of gravity The interpolated aerodynamic and mass properties provide a means for generating data for dynamic simulations for use in vehicle proof of concept studies   *Advances in Guidance, Navigation and Control* Liang Yan,Haibin Duan,Yimin Deng,2025-03-03 This book features the latest theoretical results and techniques in the field of guidance navigation and control GNC of vehicles and aircrafts It covers a wide range of topics including but not limited to intelligent computing communication and control new methods of navigation estimation and tracking control of multiple moving objects manned and autonomous unmanned systems guidance navigation and control of miniature aircraft and sensor systems for guidance navigation and control etc Presenting recent advances in the form of illustrations tables and text it also provides detailed information of a number of the studies to offer readers insights for their own research In addition the book
