Galdikas,1995-03-31 *The Madame Curie Complex* Julie Des Jardins,2010-10-06 Why are the fields of science and technology still considered to be predominantly male professions The Madame Curie Complex moves beyond the most common explanations limited access to professional training lack of resources exclusion from social networks of men to give historical context and unexpected revelations about women s contributions to the sciences Exploring the lives of Jane Goodall Rosalind Franklin Rosalyn Yalow Barbara McClintock Rachel Carson and the women of the Manhattan Project Julie Des Jardins considers their personal and professional stories in relation to their male counterparts Albert Einstein Robert Oppenheimer Enrico Fermi to demonstrate how the gendered culture of science molds the methods structure and experience of the work With lively anecdotes and vivid detail The Madame Curie Complex reveals how women scientists have often asked different questions used different methods come up with different explanations for phenomena in the natural world and how they have forever transformed a scientist s role

Storytelling Apes Mary Sanders Pollock,2015-05-04 The annals of field primatology are filled with stories about charismatic animals native to some of the most challenging and remote areas on earth There are for example the chimpanzees of Tanzania whose social and family interactions Jane Goodall has studied for decades the mountain gorillas of the Virungas chronicled first by George Schaller and then later more obsessively by Dian Fossey various species of monkeys Indian langurs Kenyan baboons and Brazilian spider monkeys studied by Sarah Hrdy Shirley Strum Robert Sapolsky Barbara Smuts and Karen Strier and finally the orangutans of the Bornean woodlands whom Birut Galdikas has observed passionately Humans are after all storytelling apes The narrative urge is encoded in our DNA along with large brains nimble fingers and color vision traits we share with lemurs monkeys and apes In Storytelling Apes Mary Sanders Pollock traces the development and evolution of primatology field narratives while reflecting upon the development of the discipline and the changing conditions within natural primate habitat Like almost every other field primatologist who followed her Jane Goodall recognized the individuality of her study animals defying formal scientific protocols she named her chimpanzee subjects instead of numbering them thereby establishing a trend For Goodall Fossey Sapolsky and numerous other scientists whose works are discussed in Storytelling Apes free living primates became fully realized characters in romances tragedies comedies and never ending soap operas With this work Pollock shows readers with a humanist perspective that science writing can have remarkable literary value encourages scientists to share their passions with the general public and inspires the conservation community

Blue Eclipse Book II Patrick Joseph,2020-11-12 A poetic story rhyme that is a compilation of scripted

youthful times Within these pages is a shard from a greater story that chronicles the legacy of characters meant for the entertainment each individually purposed for a grand design And as the wheels of fate turn each character will play their part unable to understand the greater role they partake in within the great theatrics of the world play Each figure within this are pulled from historical sources past and present with subtle liberties to flesh out the true nature of their character So as disparate destined paths cross into the other and intersect the fiery ambition they posses will become their sword while the purity of their immortal soul will become their shield individually designed to protect a sincere dream while defending their outer shell from being torn away from this mortal coil And as each soul delves beyond the grip of the unfamiliar of their opening acts a threshold would demand to be crossed as they individually with warm hearts and open minds yearn for meaning as they individually await a glimpse of their true purpose escaping the confines of ephemeral restraints to push to a space that exists beyond sight
