Landscape as Sacred Space Steven Lewis,2005-07-15 Steven Lewis s *Landscape as Sacred Space* Metaphors for the Spiritual Journey invites new discussions about our spiritual journeys and allows seekers to rethink approaches to Christian spirituality and theology in light of postmodernity Landscape metaphors provide a common and accessible language to articulate one s spiritual journey Spiritual mountains deserts and valleys are dominant landscapes on our journey through life Most people have experienced the joy of a mountaintop spiritual experience the pain of spiritual deserts or perhaps the dreariness too often associated with spiritual valleys There is a tendency however to highlight spiritual mountaintops while avoiding spiritual deserts and ignoring spiritual valleys This leaves many Christians ill equipped either to deal with crises or to integrate God into ordinary life Each landscape offers rich lessons that when combined together lead us toward a maturing faith and into a deeper relationship with God *Landscape as Sacred Space* is intended to aid those who search for more meaningful ways to articulate their faith journey The book grants permission to struggle with life s landscapes provides safe spaces to reflect on the journey and introduces language that enables exploration and discovery

Landscape Appreciation David Jacques,2019-12-02 This book examines the many theories of preferred landscape over the last half century and informs those readers teaching or in landscape practice of the main lines of argument so that they can make up their own minds

Poignant Landscapes Van Thi Diep,2024-01-15 What is behind the modern soul s quest for meaning in life In the search to find belonging in our cultures lovability in our relationships worthiness in our economic and political systems and sacredness through the worshipping of all things between technology and nature what is it that we are truly looking for Even the uninspired among us cannot help but be mesmerized by beautiful landscapes find reassurance in calming landscapes and be in awe of the force of nature in powerful landscapes But how often do we stop to contemplate the existential relationship we have with these landscapes In the liminality of poignant landscapes that is the space between the external landscapes that move us and the

psychological landscapes that guide us is a portal to life's most profound questions: Who am I? Why am I here? Who do I want to be? And what world do I want to live in? Using the negative space found in language, ecophilosopher Van Thi Diep delicately weaves together insights from her academic research study on place making and what it means to flourish as a landscape architect with personal ruminations on self acceptance, belonging, and healing social trauma. Through these reflections, she invites you on a vulnerable yet courageous journey to look inside the poignant landscapes that shape our individual soul paths, as well as the ones we all share as humans here on Earth together. In the wisdom of these poignant landscapes is the permission to feel the pain of being human, to be loved exactly as we are, without conditions, and to be inspired by the sacredness of life. This collection of short essays, poetry, and photographs wistfully mirrors the fluidity of landscapes by transcending the binaries of intellectualism and emotionality, inner and outer world experiences, individual and collective existence, to return to what the modern soul wants most: the knowing that true belonging does not exist outside of us, but instead is found intuitively within.

Landscape Ethnoecology Leslie Main Johnson, Eugene S. Hunn, 2012. Although anthropologists and cultural geographers have explored place in various senses, little cross-cultural examination of kinds of place or ecotopes has been presented from an ethno-ecological perspective. In this volume, indigenous and local understandings of landscape are investigated in order to better understand how human communities relate to their terrestrial and aquatic resources. The contributors go beyond the traditional ecological knowledge (TEK) literature and offer valuable insights on ecology and on land and resources management, emphasizing the perception of landscape above the level of species and their folk classification. Focusing on the ways traditional people perceive and manage land and biotic resources within diverse regional and cultural settings, the contributors address theoretical issues and present case studies from North America, Mexico, Amazonia, tropical Asia, Africa, and Europe.

Magazine, 1906 **Applying Landscape Ecology in Biological Conservation** Kevin Gutzwiller, 2011-06-27. Landscape ecology and conservation biology are rapidly developing disciplines, and a current synthesis of principles and applications in these two fields is needed under one cover. Many managers are not applying principles of landscape ecology in efforts to conserve biota, yet the loss of biological diversity could be reduced if broad-scale processes and patterns were consistently considered in management and conservation decisions. Bringing together insights from leaders in landscape ecology and conservation biology, this book explains how our knowledge about landscape ecology can help us understand, manage, and maintain biodiversity. Beyond explaining pertinent concepts of landscape ecology and biological conservation and describing examples of their use in management research and planning, this book also distills principles for applying landscape ecology.

in conservation identifies gaps in current knowledge and provides research approaches to fill those voids The book is divided into five parts the first part introduces the book and discusses what landscape ecology is and why it is important to biological conservation The second deals with multiple scales connectivity and organism movement The third part discusses landscape change and how this affects biodiversity and the fourth part covers conservation planning The final part presents a synthesis that identifies overarching principles pervasive constraints and realistic prospects for applying landscape ecology in biological conservation Conservationists land use planners and ecologists will find this book to be an essential resource
