Reflections On The Causes Of Human Misery:

Reflections on the Causes of Human Misery and Upon Certain Proposals to Eliminate Them Barrington Moore, 1972

Reflections on the Causes of Human Misery and Upon Certain Proposals to Eliminate Them Barrington Moore (Jr.), 1972

Democracy, Revolution, and History Theda Skocpol, 2018-10-18 The work of Barrington Moore Jr is one of the landmarks of modern social science A distinguished roster of contributors here discusses the influence of his best known work *Social Origins of Dictatorship and Democracy* Their individual perspectives combine in delineating Moore's contributions to the transformation of comparative and historical social science over the past several decades The essays in *Democracy, Revolution, and History* all address substantive and methodological problems asking questions about the different historical paths toward democratic or nondemocratic political outcomes Following Moore's example they use well researched comparative cases to make their arguments In the process they demonstrate how vital Moore's work remains to contemporary research in the social sciences This volume points as well to new frontiers of scholarship suggesting lines of work that build upon Moore's achievements

The Body's Recollection of Being David Michael Levin, 2002-01-04 This is a unique study continuing the work of Merleau Ponty and Heidegger and using the techniques of phenomenology against the prevailing nihilism of our culture It expands our understanding of the human potential for spiritual self realization by interpreting it as the developing of a bodily felt awareness informing our gestures and movements The author argues that a psychological focus on our experience of well being and pathology as embodied beings contributes significantly to a historically relevant critique of ideology It also provides an essential touchstone in experience for a fruitful individual and collective response to the danger of nihilism Dr Levin draws on Merleau Ponty's phenomenology to clarify Heidegger's analytic of human beings through an interpretation that focuses on our experience of being embodied He reconstructs in modern terms the wisdom implicit in western and semitic forms of religion and philosophy considering the work of Freud Jung Foucault and Nietzsche as well as that of American educational philosophers including Dewey In particular he draws on the psychology of Freud and Jung to clarify our historical experience of gesture and movement and to bring to light its potential in the fulfilment of Selfhood Throughout the book the pathologies of the ego and its journey into Selfhood are considered in relation to the conditions of technology and the powers of nihilism

Human Rights Anthony Woodiwiss, 2012-11-12 Are human rights part of the problem or part of the solution in the current clash of civilizations Drawing on a hitherto neglected body of work in classical social theory and combining it with ideas derived from Barrington Moore Norbert Elias and Michel Foucault Woodiwiss poses and answers the questions How did human rights become entangled with power relations How might the nature of this entanglement be altered so that human rights better serve the global majority In answering these questions he explains how and why rights discourse developed in such distinctive ways in four key locations Britain the United States Japan and in the UN On this basis he provides for the first time a general

sociological account of the development of international human rights discourse which represents a striking challenge to current thinking and policy **The Legalization of Human Rights** Saladin Meckled-García, Basak Çali, 2006-01-16 The concept of human rights as a universal goal is at the centre of the international stage It is now a key part in discourse treaties and in domestic jurisdictions However as this study shows the debate around this development is actually about human rights law This text scrutinizes the extent to which legalization shapes the human rights ideal and surveys its ethical political and practical repercussions How does the law influence what we think about rights What more is there to such rights than their legal protection These expert contributors approach these questions from a range of perspectives political theory moral theory anthropology sociology international law international politics and political science to deliver a diversity of methodologies This book is essential reading for those wishing to develop a clear understanding of the relationship between human rights ideals and laws and for those working toward the fostering of a genuine human rights culture

Suffering and Evil W. S. F. Pickering, Massimo Rosati, 2008 Until recently the subject of suffering and evil was neglected in the sociological world and was almost absent in Durkheimian studies as well This book aims to fill the gap with particular reference to the Durkheimian tradition by exploring the different meanings that the concepts of evil and suffering have in Durkheim's works together with the general role they play in his sociology It also examines the meanings and roles of these concepts in relation to suffering and evil in the work of other authors within the group of the *Ann e sociologique* up until the beginning of World War II Finally the Durkheimian legacy in its wider aspects is assessed with particular reference to the importance of the Durkheimian categories in understanding and conceptualizing contemporary forms of evil and suffering

In Defense of Universal Human Rights Rhoda E. Howard-Hassmann, 2018-11-26 Should African and Muslim majority countries be obliged to protect LGBT rights or do such rights violate their cultures Should Western based corporations be held liable if their security guards injure union activists in another part of the world or should such decisions be settled under local or domestic law In this book renowned human rights scholar Rhoda E Howard Hassmann vigorously defends the universality of human rights arguing that the entire range of rights is necessary for all individuals everywhere regardless of sex color ethnicity sexuality religion or social class Howard Hassmann grounds her defense of universality in her conception of human dignity which she maintains must include personal autonomy equality respect recognition and material security Only social democracies she contends can be considered fully rights protective states Taking issue with scholars who argue that human rights are Western quasi imperialist impositions on states in the global South and risk undermining community and social obligation Howard Hassmann explains how human rights support communities and can only be preserved if states and individuals observe their duties to protect them *Freedom from poverty as a human right: economic perspectives* Andreassen, Bard A., Marks, Stephen P., Sengupta, Arjun, 2010-06-04 *Human Rights and World Politics (Second Edition)* David P. Forsythe, 1989-01-01 By the 1980s the concept of internationally recognized human rights was being reinforced by a

growing body of international law and by the multiplication of agencies concerned with such matters as torture in Paraguay slavery in Mauritania the British use of force in Northern Ireland and starvation and malnutrition in East Africa and Southeast Asia No matter how much a national leader might find it more convenient to focus on other matters some world organization or private group could be counted on to keep the issue of universal human rights alive Because the subject is particularly timely David P Forsythe has revised Human Rights and World Politics first published in 1983 For this second edition Forsythe has updated all chapters and completely rewritten the one on U S foreign policy to include the second Reagan administration After a brief history of the evolution of human rights in international law and diplomacy he surveys human rights standards as developed by the United Nations and other official organizations Moving from the definitive core of law Forsythe turns to the interpretation and implementation of rights agreements the role of private or unofficial organizations such as Amnesty International and the Red Cross the relationship between civil political and socio economic rights the role of human rights in U S foreign policy particularly under Carter and Reagan and lobbying in Washington by human rights interest groups In all Forsythe s exhaustive research and careful analysis bring clarity and concreteness to a subject too often obscured by rhetoric

American Political Scientists Glenn H. Utter, Charles Lockhart, 2002-10-30 This dictionary offers the only comprehensive collection of profiles of American political scientists each of whom contributed significantly to the intellectual development of American political science from its beginnings in the late 19th century to the present This second edition includes 22 new and 110 revised entries reflecting new scholarship that emerged during the 1990s Numerous experts helped the editors develop this consensus group of the 193 political scientists who have made the most important theoretical contributions over the years with attention to varied approaches and the different subfields Alphabetically arranged entries focus on the main ideas and major works by each scholar listing list the most important publications by and about the individual There are numerous cross references to show how the work of one scholar has influenced another in the discipline Appendices list the political scientists by degree granting institutions and by major fields A short bibliography points to important general readings about the profession A general index makes this major reference easily accessible for broad interdisciplinary research

New Critical Writings in Political Sociology Alan Scott, 2017-03-02 In the third and final volume of this series we examine the implications of the accelerating globalization process for the nation state Are globalization the rise of regional and international institutions and the international agreements on human rights actually reducing and transforming state sovereignty Clearly ethnic racial and religious identities remain salient but how do they correspond to intersect with and overflow continuous nation state spaces that are demarcated by legally recognized borders In what conditions do democratic state building projects actually enhance political civil and social rights and when do they tend to contribute to the consolidation of elite power Should democratic forces put their faith in a cosmopolitan vision of global citizenship especially when they tackle quintessentially international and

transnational problems like peace aboriginal rights and the protection of the environment In this volume s collection of contemporary political sociologists key articles we present work that explores the exposure of the nation state and the post World War II world system to global forces *Human Trafficking* Mary C. Burke,2017-09-01 With a range of experts from different disciplines and professions this text comprehensively explains human trafficking as it exists and is being addressed in the twenty first century The first section gives an overview of the issue and contextualizes it within a human rights and historical framework The second section provides the reader with more detailed interdisciplinary information about trafficking The third section which contains a chapter written by a former FBI agent focuses on the anti trafficking movement and addresses international responses to the problem as well as considerations for working with victims Human Trafficking closes with a chapter about how trafficking is being addressed and how individuals larger social groups and organizations can get involved in putting an end to the crime and to helping survivors Human Trafficking is essential reading for professionals in law enforcement human services and health care and for concerned citizens interested in human rights and making a difference in their communities This book is also intended for use in undergraduate and graduate interdisciplinary courses in human trafficking *Climate Change, Justice and Sustainability* Ottmar Edenhofer,Johannes Wallacher,Hermann Lotze-Campen,Michael Reder,Brigitte Knopf,Johannes Müller,2012-06-25 Analysing and synthesising vast data sets from a multitude of disciplines including climate science economics hydrology and agricultural research this volume seeks new methods of combining climate change mitigation adaptation development and poverty reduction in ways that are effective efficient and equitable A guiding principle of the project is that new alliances of state and non state sector partners are urgently required to establish cooperative responses to the threats posed by climate change This volume offers a vital policy framework for linking our response to this change with progressive principles of global justice and sustainable development

Noam Chomsky: On Power, Knowledge and Human Nature P. Wilkin,1997-04-30 Noam Chomsky is among the most influential contemporary thinkers Peter Wilkin looks in particular at the philosophical basis of his social and political thought especially his ideal about power knowledge and human nature He shows how Chomsky s ideas can help to defend naturalism as in social and political thought Chomsky s critical writings of social inquiry and his normative ideas on libertarian socialism and human emancipation are interpreted as synthesising a number of important ideas and approaches at a time when these ideas have fallen out of favour **Principled World Politics** Richard A. Falk,2000 On normative international relations

Peace and World Order Studies Barbara J. Wien,1978-01-01 **Modern Governments and Political Systems** S. L. Kaushik,Rama Patnayak,1995 **Dictionary of the Social Sciences** Craig Calhoun,2002-05-02 Featuring over 1 800 concise definitions of key terms the Dictionary of the Social Sciences is the most comprehensive authoritative single volume work of its kind With coverage on the vocabularies of anthropology sociology political science economics human geography cultural studies and Marxism the Dictionary is an integrated easy to use A to Z reference tool Designed for students and non

specialists it examines classic and contemporary scholarship including basic terms concepts theories schools of thought methodologies issues and controversies As a true dictionary it also contains concise jargon free definitions that explain the rich sometimes complex language of these increasingly visible fields
