Reflections On The Economic Transition:

Lessons from the Economic Transition Salvatore Zecchini, 2013-12-01 An attentive reader embarking on this book might wonder what the economic transition to which the title refers might be. In this century almost all countries have gone through periods of economic transition but which period of economic history can claim to embody the notion or to represent the era of the transition? Definitely no country or group of countries has experienced anything comparable to the economic upheavals that the fall of communism has brought about in a large portion of the world in just three years 1989 to 1991. No other transition to date has prompted more interest and more studies among economists, academics and policy makers than has the transformation of centrally planned economies into market based systems. It is this transformation that has come to define the transition. Early in the transformation process in November 1990 with the support of the Centre for Co-operation with the Economies in Transition CCET I launched a conference to examine the challenges faced by these countries. About six years have gone by and a new economic landscape has emerged in that part of the world. The difficulties in transforming these economies have exceeded all expectations and economic performances have varied considerably across countries. The time has come therefore to make a first evaluation of progress and problems with a view to extracting useful policy lessons to guide policy makers in successfully completing the transition in the near future.

A Reflection on Sraffa's Revolution in Economic Theory Ajit Sinha, 2021-06-02 This book presents a substantial collection of essays from a wide range of well-respected scholars addressing several aspects of Piero Sraffa's economics in light of continuing controversies over the interpretation that should be placed on his work. It moves beyond extant scholarship with an added emphasis on the philosophical dimension of Sraffa's seminal work *Production of Commodities by Means of Commodities*. Contributors probe new ways of thinking about the political economy of Sraffa and in doing so alongside the comments to each contribution by other scholars provide a cutting edge debate and discussion on non-mainstream economic theory. This book will be of interest to academics and advanced graduate students in economics with additional interest from scholars in philosophy and the methodology of science.

Lees, 2012-12-06 THE PROBLEM AND THE APPROACH The abortive revolutions of 1848 have been widely regarded by historians as a watershed not only in the

political but also in the intellectual development of modern Europe Before 1848 according to the traditional view the prevalent climate of opinion was idealistic hopeful humane and progressive Afterwards it was empirical pessimistic cynical and obsessed with power As Hans Kohn put it in his essay Mid century The Turning Point In 1848 the foundations of Western civilizational intellectual belief in the objectivity of truth and justice ethical faith in mercy and tolerance were still unshaken In the spring of 1848 mankind was full of glowing hope but the end of 1848 dashed the hopes and the century which 1848 inaugurated appears to have led slowly but surely to decay and disaster 1 Germany a prime culprit in the debacle which marked the last third of that century has been seen as the country in which the events of 1848-49 had the most profound impact Although few historians have gone as far as Kohn in linking the failures experienced by mid nineteenth century Germans to the horrors perpetrated by some of their twentieth century descendants it has long been common to think of Germany's response to her defeated revolution as a process of attitudinal preparation for Otto von Bismarck's authoritarian solution to the national question in the period between 1864 and 1871 which in turn was fraught with ominous long range significance

Cognitive Capitalism and Its Reflections in South-Eastern Europe Vladimir Cvijanović, Carlo Vercellone, Andrea Fumagalli, 2010 Cognitive capitalism is considered to be a new stage in the historical evolution of capitalism which is undergoing a metamorphosis affecting most of the laws and tendencies characteristic of industrial capitalism This raises a series of issues tackled in the theoretical part especially regarding the increased importance of cognitive work and the new composition of the labour market that influence the determinants of the value of goods the structure of welfare and the forms of income distribution A historical analysis is applied to describe the evolution of cognitive capitalism and its endogenous potentially destabilising dynamics The empirical part analyses the diffusion of cognitive capitalism in the former socialist countries of South Eastern Europe and elsewhere
