F. Witzsche, 2003 Reflections on Human Nature Arthur Oncken Lovejoy, 1961 **Experiential Consciousness and the Nature of Human Identity** Vitor Jose F. Rodrigues, 2022-12-13 Consciousness is hard to bring to the laboratory as it confronts us with a classic dilemma can a mind observe itself However who then is observing the observer Without experiential awareness culture the arts science and philosophy would not make sense Would it make sense if refrigerators were to produce a refrigerator culture without the experience of freezing food Virtually all human culture is destined to provide conscious experiences This volume provides a rich array of views on human nature and the way it shows up in the strange land of human identity **Nature of the Self** S. K. Leung, 2000 Proposes a radical theory on the existential confirmation and understanding of the Self **Reflections on Law and Armed Conflicts** Hilaire McCoubrey, Michael A. Meyer, 2023-12-11 This unique volume presents an edited selection of works upon the laws of armed conflict by the late Professor Colonel G I A D Draper OBE Professor Colonel Draper was a central figure in the analysis and dissemination of the humanitarian laws of armed conflict in the English speaking world He had a wide practical and academic experience of the subject including service as a prosecutor at the Nuremberg trials His work covered not only the contemporary substance of the law but also its moral ethical and political context the pressures upon its development and its potential for further positive and other development This edited collection presents a very significant part of Professor Colonel Draper's work including many pieces which are no longer readily accessible or have never before been published with modern commentary referring to developments which have occurred since his death The late Professor Colonel's work is an important scholarly contribution to the subject and also retains a very great degree of modern relevance including comment upon such issues as war crimes and appropriate responses to them The Editors present this collection as both an important scholarly and practical resource and a fitting tribute to one of the great twentieth century contributors to this area of law **Reflection on the Works of God in Nature and Providence, for every day in the year ... Translated from the French, and collated with the German, by A. Clarke** Christoph Christian STURM, 1801 Nature and Human Nature Thomas

Nature, Human Nature, & Human Difference Justin E. H. Smith, 2015-06-30 People have always been xenophobic but an explicit philosophical and scientific view of human racial difference only began to emerge during the modern period Why and how did this happen Surveying a range of philosophical and natural scientific texts dating from the Spanish Renaissance to the German Enlightenment *Nature Human Nature and Human Difference* charts the evolution of the modern concept of race and shows that natural philosophy particularly efforts to taxonomize and to order nature played a crucial role Smith demonstrates how the denial of moral equality between Europeans and non Europeans resulted from converging philosophical and scientific developments including a declining belief in human nature's universality and the rise of biological classification The racial typing of human beings grew from the need to understand humanity within an all encompassing system of nature alongside plants minerals primates and other animals While racial difference as seen through science did not arise in order to justify the enslavement of people it became a rationalization and buttress for the practices of trans Atlantic slavery From the work of Francois Bernier to G W Leibniz Immanuel Kant and others Smith delves into philosophy's part in the legacy and damages of modern racism With a broad narrative stretching over two centuries *Nature Human Nature and Human Difference* takes a critical historical look at how the racial categories that we divide ourselves into came into being
