*Meta-Ethnographic Synthesis in Education* Michalis Kakos, Bettina Fritzsche, 2020-04-22 Calls for deparochialization of educational research Lingard 2006 have directed educational ethnography from the conventional research designs and from the study of single sites and local situations to the study of the circulation of cultural meanings objects and identities in diffuse time spaces Marcus 1995 96 In response to this call and following the already established tradition of use of meta ethnography in health studies this volume explores the potentials of this method Noblit Hare 1988 to unpick the interconnectedness of different educational sites which have been and are being studied ethnographically Besides

metaethnographic analyses may also offer a credible response to the lessening of opportunities for original educational ethnographic research at times of limited resources The volume examines the forms of translocal and transtemporal ethnographic synthesis currently in use by educational ethnographers as well as the challenges and the possibilities that the method offers It also addresses and attempts to respond to the question if meta ethnography might be a means to sharpen ethnographers sensitivity for each other s work and achievements in the past This book was originally published as a special issue of *Ethnography and Education* The Social Science Encyclopedia Adam Kuper,2004-10-14 The Social Science Encyclopedia first published in 1985 to acclaim from social scientists librarians and students was thoroughly revised in 1996 when reviewers began to describe it as a classic This third edition has been radically recast Over half the entries are new or have been entirely rewritten and most of the balance have been substantially revised Written by an international team of contributors the Encyclopedia offers a global perspective on key issues within the social sciences Some 500 entries cover a variety of enduring and newly vital areas of study and research methods Experts review theoretical debates from neo evolutionism and rational choice theory to poststructuralism and address the great questions that cut across the social sciences What is the influence of genes on behaviour What is the nature of consciousness and cognition What are the causes of poverty and wealth What are the roots of conflict wars revolutions and genocidal violence This authoritative reference work is aimed at anyone with a serious interest in contemporary academic thinking about the individual in society
