The Chinese Entrepreneurship Way Julia Perez-Cerezo, 2013-10-07 China is the second largest economy in the world and it stands poised to become the largest China's geopolitical power is also developing at a stunning pace It has been predicted that China will have more impact on the world over the next 20 years than any other country The world order as we have known it is changing and China is becoming its leader But contrary to the belief that China's economic miracle is solely due to its government the reality is that it has been fuelled by its people's pent up ambition and entrepreneurial spirit Private owned companies account for about 60 percent of the country's gross domestic product GDP and about 75 percent of the country's jobs The real secret to the Chinese economy's outstanding development had most to do with the nature and attitude of the Chinese people This book is about models of Chinese entrepreneurship It tells the stories of fifteen women entrepreneurs but dealing with them just as entrepreneurs They have been chosen because in today's China women are closer to the junzi ideal of Confucius The book shows that Chinese entrepreneurs' good performance is based on principles and values shaped over the millennia It sheds light on the approaches and rationale of the entrepreneurial paths Chinese follow A striking feature of Chinese entrepreneurs is how they all seem to go with the flow of things So they are not afraid to face risks or to start all over again They do not panic when adversities arise for they know that success will always follow adversity For Chinese entrepreneurs the world is a place where anything is possible This makes them creative and able to persevere willing to try what for others may seem

impossible or unrealistic They are brimming with a unique inner strength self motivation and self control Chinese entrepreneurs have a tremendous emotional intelligence and are experts at generating new ideas and strategies They regard their employees and the building of an internal corporate culture as the soul of their business For them a crisis is an opportunity to improve and learn to focus on working hard and being efficient today in order to succeed tomorrow Chinese entrepreneurs operate in the Chinese Paradigm a paradigm which overlaps very little with our Western paradigm But while the Chinese are very familiar with Western modes of business we Westerners are unaware of how they operate This book is aimed to shine some light on this **Massage Therapy** Jean E.
