Reforming London The London Government Problem 1855 19:

Explaining local government J. A. Chandler, 2013-07-19 Explaining local government available at last in paperback uniquely presents a history of local government in Britain from 1800 until the present day The study explains how the institution evolved from a structure that appeared to be relatively free from central government interference to as John Prescott observes one of the most centralised systems of government in the Western world The book is accessible to A level and undergraduate students as an introduction to the development of local government in Britain but also balances values and political practice to provide a unique explanation using primary research of the evolution of the system [A History of Britain, 1885-1939](#) John Davis, 1999-05-26 The period between 1885 and 1939 was a pivotal half century in British history in which the Victorian political system yielded to a system far more recognisably modern in response to popular pressure for social reform and the implications of global superpower status Dr Davis relates these political developments to the background of social and economic change and to the consequences of Britain's position as an imperial power Drawing extensively upon the new historical scholarship of the 1980s and 1990s John Davis presents an original analysis of political change in a crucial period of Britain's recent past **A Mighty Capital under Threat** Bill Luckin, Peter

Thorsheim, 2020-03-03 Demographically nineteenth century London or what Victorians called the new Rome first equaled then superseded its ancient ancestor By the mid eighteenth century the British capital had already developed into a global city Sustained by its enormous empire between 1800 and the First World War London ballooned in population and land area Nothing so vast had previously existed anywhere **A Mighty Capital under Threat** investigates the environmental history of one of the world's global cities and the largest city in the United Kingdom Contributors cover the feeding of London waste management movement between the city's numerous districts and the making and shaping of the environmental sciences in the late nineteenth and early twentieth centuries *London's Mayor at 20* Jack Brown, Richard Brown, Tony

Travers, 2020-11-24 This year London's elected mayor and assembly turn twenty But has London's mayoralty lived up to the expectations that were set for it Have its three mayors been able to get to grips with the city's challenges How have they responded to crises in the past and what does the future hold This important new book marks the twentieth anniversary of London's mayor and assembly and investigates the relative successes and challenges of the mayoralty to date before asking what comes next for London It combines analysis by experts with reflections from those closely involved in setting up running and working with the Greater London Authority alongside those who have held the position of Mayor of London themselves

The Petite Bourgeoisie in Europe 1780-1914 Geoffrey Crossick, Heinz-Gerhard Haupt, 2013-10-18 Crossick and Haupt provide a major overview of the social economic cultural and political development of the petite bourgeoisie in modern Europe a group until now largely neglected by European social historians Through comparative analysis the authors examine issues such as the centrality of small enterprise to industrial change the importance of family and locality to the petit

bourgeois world the search for stability and status and the associated political move to the right Crossick and Haupt have written an invaluable and authoritative assessment of the emergence of a distinctive petit bourgeois cultural and political identity It will be of interest to both undergraduate students and academic historians

The Politics of London Tony Travers,2017-05-26 Interest in the governance of London has remained high in the years following the election of a London mayor and all the twists and turns of Mayor Livingstone's term of office including struggles with Whitehall and the boroughs Written by a leading authority The Politics of London provides a definitive critique of the politics administration and government of one of the world's leading cities and recommends major changes to the capital's government to address its longstanding crisis of governability

Professionalism, Patronage and Public Service in Victorian London Gloria Clifton,2015-11-19 This study of 19th century local government examines the role of local government officials and the social origins of this growing bureaucracy As the predecessor of the London County Council the Metropolitan Board of Works was an important body and its officials formed a large and significant professional group not hitherto studied in such depth

Religious Vitality in Victorian London W. M. Jacob,2021-09-01 This innovative book challenges many of the widely held assumptions about the place of religion in Victorian society and in London the world's first great industrial and commercial metropolis Against the background of Victorian London it explores the religiosity of Londoners as expressed through the dynamic renewal of traditional faith communities including Judaism and the historic churches as well as fresh expressions of religion including the Salvation Army Mormons spiritualism and the occult It shows how laypeople especially the rich and women were mobilised in the service of their faith and their fellow citizens Drawing on research in social economic oral cultural and women's history Jacob argues that religious motivations lay behind concerns that subsequently preoccupied people in the twentieth and twenty first centuries These include the changing place of women in society an active concern for social justice the sexual exploitation of women and children and provision of education for all classes and all ages By examining religion broadly in its social and cultural context and looking beyond conventional approaches to religious history Religious Vitality in Victorian London illustrates the dynamic significance of religion in society influencing even the expression of secularism

Architecture and Social Reform in Late-Victorian London Deborah E. B.

Weiner,1994 Amidst the sea of squalid brick tenements and working class two up two down houses of late nineteenth century London new building types arose large in scale and bold in their message the triple storied Queen Anne board schools the mock Elizabethan settlement houses an Arts and Crafts free public art gallery replete with mystic symbolism and as first conceived a neo Byzantine pleasure palace for the working classes

City Of Cities Stephen Inwood,2011-07-06 By 1880 London capital of the largest empire ever known was the richest most populous city in the world And yet it remained an overcrowded undergoverned city with huge slums gripped by poverty and disease Over the next three decades London began its transformation into a new kind of city one of unprecedented size dynamism and technological advance In this highly

evocative account Stephen Inwood defines an era of unique character and importance by delving into the lives and textures of the booming city He takes us by hansom cab bicycle electric tram or motor bus from the glittering new department stores of Oxford Street to the synagogues and sweat shops of the East End from bohemian bars and gaudy music halls to the well kept gardens of Edwardian suburbia Essential reading for the scholar the historian and the lover of London He is equally at home with the grand sweep and the human detail always supported by immaculate research Inwood can throw off with elegant ease a concise explanation of technicalities that the reader was vaguely aware of not understanding and perhaps meant to look up sometime Liza Picard Financial Times Magazine

The Land Question in Britain, 1750-1950 M.

Cragoe,P. Readman,2010-01-20 The Land Question occupied a central place in political and cultural debates in Britain for nearly two centuries From parliamentary enclosure in the mid eighteenth century to the fierce Labour party debate concerning the nationalization of land after World War Two the fate of the land held the power to galvanize the attention of the nation

London John Broich,2013-05-03 As people crowded into British cities in the nineteenth century industrial and biological waste byproducts and then epidemic followed them Britons died by the thousands in recurring plagues Figures like Edwin Chadwick and John Snow pleaded for measures that could save lives and preserve the social fabric The solution that prevailed was the novel idea that British towns must build public water supplies replacing private companies But the idea was not an obvious or inevitable one Those who promoted new waterworks argued that they could use water to realize a new kind of British society a productive social machine a new moral community and a modern civilization They did not merely cite the dangers of epidemic or scarcity Despite many debates and conflicts this vision won out in town after town from Birmingham to Liverpool to Edinburgh authorities gained new powers to execute municipal water systems But in London local government responded to environmental pressures with a plan intended to help remake the metropolis into a collectivist society The Conservative national government in turn sought to impose a water administration over the region that would achieve its own competing political and social goals The contestants over London's water supply matched divergent strategies for administering London's water with contending visions of modern society And the matter was never pedestrian The struggle over these visions was joined by some of the most colorful figures of the late Victorian period including John Burns Lord Salisbury Bernard Shaw and Sidney and Beatrice Webb As Broich demonstrates the debate over how to supply London with water came to a head when the climate itself forced the endgame near the end of the nineteenth century At that decisive moment the Conservative party succeeded in dictating the relationship between water power and society in London for many decades to come

London Boroughs at 50 Tony Travers,2015-11-24 It is the year 1965 Mary Quant introduces the miniskirt to society in her shop in Chelsea the Dalek style Post Office Tower is opened and the Beatles play their last ever live UK tour date Most importantly on 1 April a new system of city government is introduced and London's thirty two boroughs are born revolutionising the capital into the place we know today New names had to be chosen councillors elected

and policies formed these boroughs and the Greater London Council between them took control of housing roads planning schools and social services Half a century on and though the GLC was abolished in 1986 the boroughs live on now working alongside a new metropolitan government headed by mayors Ken Livingstone and since 2008 Boris Johnson In London s Boroughs at 50 Tony Travers examines the governing system that developed alongside the growing metropolis and by identifying the unique path each has taken over the years tells the fascinating story of how our remarkably diverse boroughs have not only survived but actively shaped both the city and the lives of its inhabitants in their impressive fifty year history

Armed with Swords & Scales Sascha Auerbach,2021-02-04 Explores how local courtrooms have been a common feature of everyday life and culture since the eighteenth century [The Cambridge Social History of Britain, 1750-1950](#) F. M. L. Thompson,1990 Whilst in certain quarters it may be fashionable to suppose that there is no such thing as society historians they have had no difficulty in finding their subject The difficulty rather is that an outpouring of research and writing is hard for anyone but the specialist to keep up with the literature or grasp the overall picture In these three volumes as is the tradition in Cambridge Histories a team of specialists has assembled the jigsaw of topical monographic research and presented an interpretation of the development of modern British society since 1750 from three perspectives those of regional communities the working and living environment and social institutions Each volume is self contained and each contribution thematically defined contains its own chronology of the period under review Taken as a whole they offer an authoritative and comprehensive view of the manner and method of the shaping of society in the two centuries of unprecedented demographic and economic change

Romantic Metropolis James Chandler,Kevin Gilmartin,2005-10-13 This 2005 collection of essays challenges the traditional conception that British Romanticism was rooted in nature and rural life by showing that much of what was new about Romanticism was born in the city The essays examine the works and events of the Romantic period from the point of view of the urban world where rapid developments in population industry communication trade and technology set the stage and the tone for many of the great achievements in literature and culture The great metropolis appears as both fact and figure London is its paradigm but the metropolitan perspective is also borrowed and projected elsewhere In this volume some of the most exciting critics of Romanticism explore diverse cultural productions from poems and paintings to exhibition sites panoramas and political organizations to do long overdue justice to the place of the city both as topic and as location in British Romanticism

The London Restaurant, 1840-1914 Brenda Assael,2018-07-03 This is the first scholarly treatment of the history of public eating in London in the Victorian and Edwardian eras The quotidian nature of eating out during the working day or evening should not be allowed to obscure the significance of the restaurant defined broadly to encompass not merely the prestigious West End restaurant but also the modest refreshment room and even the street cart as a critical component in the creation of modern metropolitan culture The story of the London restaurant between the 1840s and the First World War serves as an exemplary site for mapping the

expansion of commercial leisure the increasing significance of the service sector the introduction of technology the democratization of the public sphere changing gender roles and the impact of immigration The London Restaurant incorporates the notion of gastro cosmopolitanism to highlight the existence of a diverse culture in London in this period that requires us to think not merely beyond the nation but beyond empire The restaurant also had an important role in contemporary debates about public health and the sometimes conflicting but no less often complementary prerogatives of commerce moral improvement and liberal governance The London Restaurant considers the restaurant as a business and a place of employment as well as an important site for the emergence of new forms of metropolitan experience and identity While focused on London it illustrates the complex ways in which cultural and commercial forces were intertwined in modern Britain and demonstrates the rewards of writing histories which recognize the interplay between broad global forces and highly localized spaces

The Politics of the Poor Marc Brodie, 2004-03-04 This book is about the political views of the classic poor of London's East End in the late Victorian and Edwardian periods The residents of this area have been historically characterized as abjectly poor casually employed slum dwellers with a poverty induced apathy toward political solutions interspersed with occasional violent displays of support for populist calls for protectionism imperialism or anti alien agitation These factors in combination have been thought to have allowed the Conservative Party to politically dominate the East End in this period This study demonstrates that many of these images are wrong Economic conditions in the East End were not as uniformly bleak as often portrayed The workings of the franchise laws also meant that those who possessed the vote in the East End were generally the most prosperous and regularly employed of their occupational group Conservative electoral victories in the East End were not the result of poverty Political attitudes in the East End were determined to a far greater extent by issues concerning the personal in a number of senses The importance given to individual character in the political judgements of the East End working class was greatly increased by a number specific local factors These included the prevalence of particular forms of workplace structure and the generally somewhat shorter length of time on the electoral register of voters in the area Also important was a continuing attachment to the Church of England amongst a number of the more prosperous working class In the place of many myths about the people of the East End and their politics this study provides a model that does not seek to explain the politics of the area in full but suggests the point strongly that we can understand politics and the formation of political attitudes in the East End or any other area only through a detailed examination of very specific localized community and workplace structures This book challenges the idea that a Conservatism of the slums existed in London's East End in the Victorian and Edwardian period It argues that images of abjectly poor residents who supported Conservative appeals about protectionism imperialism and anti immigration are largely wrong Instead it was the support of better off workers combined with a general importance in the area of the personal in politics emphasized by local social and workplace structures which delivered the limited successes that the

Conservatives did enjoy **Reconstruction** Neal Shasore, Jessica Kelly, 2023-02-23 Commendation the Colvin Prize 2023 Society of Architectural Historians of Great Britain Reconstruction explores the impact of the First World War on the built environment examining the immediate and longer term aftermath of the Great War on the architecture of Britain and the British Empire during the interwar years While much attention has been paid by historians to post war architectural reconstruction after 1945 the earlier developments of the interwar period 1919 1939 have been comparatively overlooked This volume reveals how the architectural developments of this period not only provided important foundations for what happened after 1945 they are also of real significance in their own right Sixteen essays written by leading and emerging scholars bring together new and diverse approaches to the period a period of reconstruction fraught with the challenges of modernity and democratisation The collection considers the complex effects of reconstruction on design discourse practice and professionalism and deals with the full spectrum of architectural styles and approaches privileging neither Modernism nor traditional styles like the neo Georgian It brings to the fore social and political histories of the built environment and makes important postcolonial interventions into the architectural history of British Imperialism at home and in its far reaches in Cairo South Africa Australia and India **The History of the Merchant Taylors' Company** Matthew Davies, 2022-09-16 One of the Great Twelve livery companies of the City of London the Merchant Taylors Company has been in existence for some seven hundred years This new history will chart the remarkable story of the Company and its members from its origins until the 1950s encompassing the lives and achievements of men such as Sir Thomas White founder of St John s College Oxford and the celebrated chronicler John Stow as well as the roles played by the Company in the City and beyond in different periods As well as looking in detail at the internal life of the Company the book will also focus on a number of important themes in the wider history of London These include trade and industry apprenticeship the impact of religious change the foundation of schools and other charities and the government and politics of the City In doing so the book will contribute to an understanding of the aims and activities of the livery companies over the centuries their ability to adapt to changing circumstances and their relevance in a modern world far removed from that in which they were first established The History of the Merchant Taylors Company will appeal to a wide range of people interested in the history of London It is fully illustrated with more than seventy five black and white and thirty colour illustrations
