membership and the challenges these industries face in the future. Importantly, the authors also provide a personal perspective alongside the industry analysis with eleven case studies of firms actually undergoing this restructuring process, including interviews with crucial agents of reform such as CEOs and GMs. The provision of both a macro and business perspective of SOEs reforms provides the reader with a complete and accurate insight into the economic, social, and business reality of China today. China's State-Owned Enterprises Reforms will therefore be essential reading for those interested in the Chinese economy and Chinese business, as well as economists, foreign investors, MBA and EMBA students, and scholars specializing in emerging or transitional economies.

China's State-owned Enterprises Hong Sheng, Nong Zhao, 2013. The Nature, the Performance, and the Reform of State-owned Enterprises provides a detailed description of state-owned enterprises (SOEs) in China with respect to both efficiency and income distribution. It shows that state ownership in the form of SOEs does not use resources efficiently and has a poor record in income distribution. Moreover, SOEs are found to enjoy unfair advantages in their competition with other firms. To illustrate the point, the book presents data revealing how favored policies, monopolistic powers, and subsidies benefit SOEs. These advantages are worth several trillion yuan a year. It is a sad irony that such wealth of the people is used to beef up the revenues of the SOEs, making their accounts look much better than they should be. This book, with its rich empirical data and information, is an authoritative reference for researchers interested in SOEs. It is also a good read for students of social sciences and the public to learn more about SOEs.

Reforming China Sen Peng, 2010-09-01. This book chronicles the dramatic events that have taken place since China opened up to the world in 1978 and adopted a policy of economic reform. It records how economic policies were drafted between 1992 and 2004, brought into law, initiated, and then implemented.

China's Industrial State-owned Enterprises: Between Profitability and Bankruptcy Carsten Holz, 2003. After decades of declining profitability, China's industrial state-owned enterprises appear obsolete. This study relies on extensive data and quantitative analysis to examine the reasons for the decline in profitability, to ascertain their current profitability patterns across various dimensions, and to account for any profitability gap with enterprises in other ownership forms. Recent reform measures are also evaluated. A differentiated picture emerges which seeks to make past developments comprehensible and illuminate the prospects of the reform of industrial state-owned enterprises in China.
