## **Reforming Private Health Insurance:**

*Reforming Private Health Insurance* Mark A. Hall, 1994 Between 1987 and 1991 the portion of Americans covered by individually purchased health insurance dropped 40 per cent Assuming the US will continue to rely on private financing for health care the author clarifies benefits to society from an efficient health insurance market *Private Health Insurance Reform Legislation* United States. *Health Care Reform* United States. Congress. House. Committee on Ways and Means. Subcommittee on Health, 1994

**Hearing on Health Care Reform** United States. Congress. Senate. Committee on Small Business, 1992 Empowering Health Care Consumers Through Tax Reform Grace-Marie Arnett, 1999 Because of our tax system most Americans have the wrong kind of insurance and some Americans cannot afford any insurance This book shows how tax reform can lead to more appropriate and more affordable health insurance It is worth careful reading by our policy makers and by anyone concerned with health care in America Prof Martin Feldstein *Reforming China's Healthcare System* China Development Research Foundation, 2017-10-16 Although China's new healthcare reform launched in 2009 has achieved remarkable results in improving China's medical and healthcare system it is recognised that there is still room for further improvement This is especially important as China's population ages the prevalence of chronic diseases increases and environment related health risks worsen This book reports on a major international research project which examined health trends modes of health promotion health finance systems medical and healthcare innovations and environment related health risks in China For each of these key areas the book considers the current situation in China and likely future trends explores best practice from a wide range of foreign countries and puts forward proposals for improvements Overall the book provides a major assessment of China's medical and healthcare system and how it should be reformed Health Care Reform United States. General Accounting Office, 1993 The Political Economy of Health Care Reforms Huizhong Zhou, 2001 Zhou presents a collection of papers that are based on lectures presented at the 36th Annual Public Lecture Seminar Series conducted by his Department of Economics at Western Michigan University The six chapters explore Medicare reform managed care and its effect on the health care system efforts to cover the uninsured the effect of health insurance on labor market and employment decisions and the role of tax policy in health care The contributions largely limit themselves to analysis of existing institutions and eschew broad proscriptions for the American health care system c Book News Inc **Health Insurance Reforms in Asia** Sabrina Ching Yuen Luk, 2014-03-26 This book empirically examines health care financing reforms and popular responses in three major cities in East Asia Shanghai Singapore and Hong Kong It adopts a new revised version of the theory of historical institutionalism to compare and explain the divergent reform paths in these three places over the past three decades It also examines forces that propel institutional change The book provides three detailed case studies on the development of health care financing reforms and the politics of implementing them It shows that health care systems in Shanghai Singapore and

Hong Kong were the products of Western presence in the nineteenth century. It illustrates how greater attention is paid to the roles played by ideas, actors and environmental triggers without abandoning the core assumptions that political institutions and policy feedback remain central to impact health care financing reforms. It shows that health care financing reform is shaped by a complex interplay of forces over time. It also provides the most updated material about health care financing reforms in Shanghai, Singapore and Hong Kong. The central argument of this book is that health care financing reform is both an evolving process responding to changing circumstances and a political process revealing an intricate interplay of power relationships and diverse interests. It shows that institutional changes in health care financing system can be incremental but transformative in nature. It argues that social policies will continue to develop and welfare states will continue to adapt and evolve in order to cope with new risks and needs. This book sheds new lights on understanding the politics of health care financing reform and sources and modes of institutional change.

**The Political Economy of Health Care Development and Reforms in Hong Kong** Victor C.W. Wong, 2019-05-23. First published in 1999, this book constitutes a unique account of the development and reform of health care in Hong Kong. Its main focus is on policy developments since 1945. Victor Wong demonstrates the development of a two-tier health system in both a capitalist and Chinese context. His work is one of both health policy and political economy. Wong utilises the latter perspective to show the state's role in the interests of capital, the public demand for health care and the power of the medical profession. Alongside this, Wong brings in the role of Chinese and family medicine and the role of the family in cost containment and minimising the hospitalisation of elderly, frail and chronically ill patients. The volume is the most comprehensive analysis available for health policy in Hong Kong.

**Health Care Reform Around the World** Andrew Twaddle, 2002-06-30. Health care reforms around the world from Europe and North America to Africa, Latin America and Asia seem to all be market-oriented reforms driven by international business interests and right-wing political parties. There seems to be a sudden and broad concern with the efficiency of medical care with the assertion that democratically or professionally run systems are inherently inefficient. Far less concern is evident for the more traditional values held regarding medical care effectiveness or quality and equity. The fact is that we have little good cross-national research that systematically addresses the reform issue. This book addresses that problem and attempts to look at health care reforms in a number of countries representing as wide a spectrum as possible and using a common conceptual framework that allows for comparable information to be gathered and presented on each despite differing levels of socio-economic development. The authors agreed on a set of models that were thought to provide reasonable guidance in answering the questions of the source of pressures for reform, the alternative modes of organization that have been found in the world in recent years and the direction of change among those alternatives.
