

## REFORMING INTERNATIONAL MONETARY SYSTEM

### A More Stable International Monetary System

A strengthened International Monetary System (IMS) – one that is resilient to future turmoil – is a key goal of the world community as it recovers from the global economic crisis.

#### **Global Imbalances**

What are global imbalances, and what do they mean for the IMS? Global imbalances are characterized by the large and persistent current account deficits in one group of systemic countries—most notably the United States—on one hand, and corresponding surpluses in another group, which includes China, Germany and the oil exporters. Their presence signals differences in savings and investment rates, differing capacities in their respective financial sectors to intermediate between borrowers and savers, policy choices that impede necessary adjustments, and the dependence of the system on the quality of policies in the core countries. As a result, large capital flows move across borders to fill these gaps.

In the run-up to the crisis, the main worry was that investors who had been hitherto financing the US deficit might change their minds, and that these large capital inflows would suddenly reverse, leading to a disorderly adjustment. In the event, the crisis took a different form—namely a sharp correction in asset prices in the US that led to dislocations in the financial system. Nevertheless, global imbalances played a role in the build-up of systemic risk: they contributed to low interest rates and large capital inflows into US and European banks, leading to a search for yield and the creation of riskier assets, both in the home markets of these banks as well as in some emerging markets. But the initial concern remains valid; indeed the recovery may not be sustainable in the face of continued imbalances as they hinder the necessary adjustments: deleveraging and rebuilding private balance sheets in deficit countries, facilitating fiscal adjustments where necessary, and encouraging consumption and reducing dependence on exports in surplus countries.

#### **Global Reserve System**

How does reserve accumulation affect the IMS?

Adequate mechanisms to cope with external financing shocks are critical to a well-functioning international monetary system. These mechanisms, which facilitate needed access to foreign currency, can be multilateral in nature such as access to IMF resources and regional reserve pools, bilateral such as central bank swap lines, or unilateral reflecting the buildup of international reserves.

Jomo Kwame Sundaram,2011-01-17 The 1944 Bretton Woods conference created new institutions for international economic governance Though flawed the system led to a golden age in postwar reconstruction sustained economic growth job creation and postcolonial development Yet financial liberalization since the 1970s has involved deregulation and globalization which have exacerbated instability rather than sustained growth In addition the failure of Bretton Woods to provide a reserve currency enabled the dollar to fill the void which has contributed to periodic massive U S trade deficits Our latest global financial crisis in which all these weaknesses played a part underscores how urgently we must reform the international financial system Prepared for the G24 research program a consortium of developing countries focused on financial issues this volume argues that such reforms must be developmental Chapters review historical trends in global liquidity financial flows to emerging markets and the food crisis identifying the systemic flaws that contributed to the recent downturn They challenge the effectiveness of recent policy and suggest criteria for regulatory reform keeping in mind the different circumstances capacities and capabilities of various economies Essays follow ongoing revisions in international banking standards the improved management of international capital flows the critical role of the World Trade Organization in liberalizing and globalizing financial services and the need for international tax cooperation They also propose new global banking and reserve currency arrangements
