Reframing Educational Policy Democracy Community And The Individual:

Reframing Educational Policy Joseph Kahne, 1996 **Education Policy** Mark Olssen, John A Codd, Anne-Marie O'Neill, 2004-06-08 Education policy is now a global matter and all the more complex for that Mark Olssen John Codd and Ann Marie O'Neill do us an invaluable service in producing a carefully theorised guide to current issues and key concerns this is an important erudite and very practical book Stephen J Ball Education Policy Research Unit University of London Given the global reach of neoliberal policies we need cogent books that enable us to better understand the major effects such tendencies have Education Policy is such a book It is insightful and well written and should be read by all of us who care deeply about what is happening in education in international contexts Michael W Apple Author of Educating the Right Way and John Bascom Professor of Education University of Wisconsin Madison I really am taken with the book the range and depth of analysis are truly impressive This book is a magnum opus and everyone in the area should read it Hugh Lauder University of Bath In their insightful and comprehensive book on education policy Mark Olssen John Codd and Anne Marie O'Neill wrestle with the big questions of citizenship and democracy in an age of globalization They argue that education policy in the 21st century is the key to security sustainability and survival The book anchored in the poststructuralist perspective of Michel Foucault traverses the whole territory of education policy not only methods and approaches of policy analysis and the dominant political perspectives that influence policy classical liberalism social democracy and neo liberalism but also those policy areas that require the closest scrutiny markets trust professionalism choice diversity and finally community citizenship and democracy This is the new policy bible for educationalists it is at once systematic provocative and instructive Michael A Peters Research Professor University of Glasgow It is rare indeed for books with such ambitious scope as this one to appear within educational scholarship This is an important book for any graduate student who is undertaking work on any aspect of education policy Education Review This book provides an international perspective on education policy and of the role and function of education in the global economy The authors present a Foucauldian perspective on the politics of liberal education within a theoretical framework necessary for the critical analysis of education policy The authors set out the analyses necessary for understanding the restructuring in education and social policy that has occurred in many countries affected by the resurgence of neo liberal political theory They examine education policy in relation to globalization citizenship and democracy The authors argue that globalization is an extension of neoliberalism and is destructive of the nation state community and democracy They show the importance of education in building strong democratic nation states and global communities based on cultural identity and inter cultural awareness This book is essential reading for students of education policy studies and social policy analysis *International Handbook of Educational Policy* Nina Bascia, Alister Cumming, Amanda Datnow, Kenneth Leithwood, David Livingstone, 2008-05-14 Nina Bascia Alister Cumming Amanda Datnow Kenneth Leithwood and David Livingstone This Handbook presents contemporary and emergent trends in educational policy

research in over fifty chapters written by nearly ninety leading researchers from a number of countries. It is organized into very broad sections which capture many of the current dominant educational policy foci and at the same time situate current understandings historically in terms of both how they are conceptualized and in terms of past policy practice. The chapters themselves are empirically grounded, providing illustrations of the conceptual implications contained within them as well as allowing for comparisons across them. The serendipity within chapters with respect to jurisdictional particularities and contrasts allows readers to consider not only a range of approaches to policy analysis but also the ways in which policies and policy ideas play out in different times and places. The sections move from a focus on prevailing policy tendencies through increasingly critical and outsider perspectives on policy. They address in turn the contemporary strategic emphasis on large-scale reform, substantive emphases at several levels on leadership and governance, improving teacher quality and conceptualizing learning in various domains around the notion of literacies and concluding finally with a contrasting topic, workplace learning, which has had less policy attention and thus allows readers to consider both the advantages and disadvantages of learning and teaching under the bright gaze of policy.

Reframing Education Failure and Aspiration

Shaun Best, 2024-10-01 Education is considered central to social mobility and following a drive to raise learners' aspirations, an aspiration industry has emerged. However, the desire to leave school early should not be regarded as evidence of students lacking ambition. This book traces the emergence of the aspiration industry and argues that to have ambitions that do not require qualifications is different but not wrong. Reviewing the performance of six schools in England, their Ofsted reports and responses, it evaluates underpinning assumptions of what makes an effective school. This book critically examines neo-liberal education policy developments including the 1988 Education Reform Act and the political discourse around changing explanations of education failure with the rise in the marketisation of education.
