Mammadov, Jabbar Manaf oglu as well as for technicians and engineers ,2015-01-01 Any unchangeable property of nature can be changed by declaring any of the variables in the formulas describing it to be constant For example one can postulate the constancy of 0 and then and 0 will be variables That is everything depends on the convention In physics wherever the value appears the well known Lorentz coefficient immediately appears nearby In STR keeping the speed of light constant and in GTR its trajectory constant Einstein obtained an absolutely rectilinear and motionless Reference System In order to obtain the correct result he adapts the surrounding world to it instead in STR changing the length and in GTR the trajectory of the space time continuum Extending Galilean symmetry only to wave equations with the constant Einstein left all other fundamental equations of physics non invariant from the point of view of Galilean symmetry which gave rise to asynchronicities and many unsolved problems in physics This book argues that many known relativistic effects are merely light time shifts and that by replacing t t in Galilean transformations with t t vt s to account for signal delays many natural phenomena can be explained within the framework of classical physics

Forbes, 1973 The dispersion relation is derived for the ensemble averaged wave in a Boussinesq fluid with a weak random vertical shear The basic flow is assumed to be statistically homogeneous in space and time with zero mean The phase velocity and decay rate are found for the two limiting cases where the wavelength is much greater and much smaller than the correlation length of the basic flow speeds The decay rate is found to increase as the direction of propagation becomes more horizontal However the maximum decrease in phase velocity is found to occur when the wave is propagating at an angle of 50 degrees to the horizontal These results are compared to those previously published Keller and Veronis 1969 for the analagous problem of Rossby waves propagating in the presence of random zonal currents that vary with latitude Author
