Service-Learning Trae Stewart, Nicole Webster, 2010-12-01 Interest in and research on civic engagement and service learning have increased exponentially In this rapid growth efforts have been made to institutionalize pedagogies of engagement across both K 12 and higher education As a result increased positive attention has been complemented equally by well founded critiques complicating experiential approaches claims and questioning if institutional financial and philosophical commitment is warranted A key complaint from these critical voices is the tightly woven protective insular core in the field of service learning This claim is not unfounded nor necessarily bad Initial efforts to legitimize service learning and other forms of community based education required group cohesion The concern however is that the initial group cohesion has led to groupthink wherein group members have avoided critical analysis and evaluation This book aims to prevent groupthink within the field of service learning by allowing for the examination of effective alternatives by new voices who can serve as critical evaluators from within the field itself Myriad perspectives are offered including empirical theoretical

practical and community perspectives Authors challenge preconceived notions of service learning who is benefited by this pedagogy outcomes of participation and implementation and most importantly the theoretical conceptual and methodological lenses through which service learning is even considered The book allows servicelearning s major criticisms to be examined challenges to be voiced and research agendas to be laid This book parallels service learning s presence and popularity across various disciplines fields Chapters are written from broad perspectives and are aimed to inform service learning researchers and educators community organizations and policy makers who consider service learning as a means to address civic responsibility Authors expose theoretical and philosophical concerns circulating in the field and often still occupying spaces on the fringe of discourse action and research The book raises fundamental questions for undergraduate and graduate courses with social justice themes by considering the implications that pedagogies of engagement have on learners and communities

Critical Pedagogy Peter McLaren, Joe L. Kincheloe, 2007 Our educational system is in turmoil Many would argue that it has been assaulted and oversimplified by the right There is growing concern that we are becoming a liberal nation state with an increasingly anti liberal population and an electorate that is disinterested in politics In this globalized world the power of capital is so great that opposition to it is often discouraged and disheartened leaving many citizens few political precepts by which to consider their institutions This contemporary failure of vision has opened the way for the unimpeded return of the philosophy of the free market As a result social and educational policies are debated almost solely in terms of how they fit with the needs of the market Social and ethical understandings are replaced by a failed economic theory that requires a radical constraint of our political and economic choices Compassion for the poor the market lets us know is wrong headed because any interference with the labor market will always result in unfortunate economic and social consequences Moral issues are eclipsed by market needs In *Critical Pedagogy Where Are We Now* the contributors discuss how the field of critical pedagogy should respond to such dire conditions in a way that is theoretically savvy and visionary while concurrently contributing to the struggle to improve the lives of those most hurt by them Critical Pedagogy is essential reading for every classroom teacher and pre service teacher It is also a valuable tool for use in undergraduate and graduate level classrooms

Taboo ,2005 Recapturing the Personal Irving Epstein, 2006-12-01 In this volume contributors discuss both the theoretical and practical applications of an embodied knowledge perspective using the field of education as an exemplar It should be noted that while the theorists whose writings are discussed in these pages have made seminal contributions to the sociology of the body literature it is not possible nor is it our goal to comprehensively review the theoretical discourse of everyone who has written in the area Our more modest aim is to give our audience a sampling of what some of the important theoretical positions entail To that end we turn to the writings of the three social and cultural theorists whose work is given the greatest degree of attention in the volume Foucault Bourdieu and Butler and will briefly summarize their views
