Rich Nations, Poor Nations Derek Howard Aldcroft, Ross Catterall, 1996 This distinguished collection of papers places present development problems in historical perspective drawing on European experience to show what characterized the growth of the world's first industrialized continent *Rich Nations - Poor Nations* Derek Howard Aldcroft, 1994 *The Other Canon of Economics, Volume 2* Erik Reinert, 2024-02-13 Other Canon Economics Essays in the Theory and History of Uneven Economic Development brings together key essays on development economics from one of the most prolific and important development economists and historians of economic policy today Erik S Reinert argues through essays ranging from 1994 to 2020 that neo classical economics damages developing countries the theory of comparative advantage leaves out a number of factors which make economic activities qualitatively different as carriers of economic growth Based on a long intellectual tradition started by the Italian economists Giovanni Botero 1589 and Antonio Serra 1613 and later used in virtually all presently industrialised countries Reinert shows that the country which exports increasing returns goods e.g. high end manufacture has advantages over the country which exports diminishing returns goods e.g. commodities This has important implications for today's development strategies that Reinert argues should be seen as industrial strategies

classical economics damages developing countries the theory of comparative advantage leaves out a number of factors which make economic activities qualitatively different as carriers of economic growth Based on a long intellectual tradition started by the Italian economists Giovanni Botero 1589 and Antonio Serra 1613 and later used in virtually all presently industrialised countries Reinert shows that the country which exports increasing returns goods e g high end manufacture has advantages over the country which exports diminishing returns goods e g commodities This has important implications for today s development strategies that Reinert argues should be seen as industrial strategies
