Rick Mather Urban Approaches:

Rick Mather Hugh Pearman,1992 Rick Mather s domestic work is an exploration of high density living his restaurants are pieces of social stagecraft and his university and commercial projects address the issue of urban architecture head on This text traces the development of Mather s career Rick Mather Architects Robert Maxwell,Patrick Bellew,Tim Macfarlane,2006 Rick Mather Architects have been practising in London since the early 1970s Best known for their award winning museum extensions such as the Dulwich Picture Gallery and the National Maritime Museum their portfolio spans a broad spectrum of projects These range from private residences to academic masterplans and urban design including both renovations and new buildings such as the Virginia Museum of Fine Art They are world renowned for their intuitive sense of place and context as well as their pioneering technologies in structural glass and sustainable design Cover Redbrick William Whyte,2016-08-11 In the last two centuries Britain has experienced a revolution in higher education with the number of students rising from a few hundred to several million Yet the institutions that drove and still drive this change have been all but ignored by historians Drawing on a decade s research and based on work in dozens of archives many of them used for the very first time this is the first full scale study of the civic universities new institutions in the nineteenth century reflecting the growth of major Victorian cities in Britain such as Liverpool Manchester Birmingham York and Durham for more than 50 years Tracing their story from the 1780s until the 2010s it is an ambitious attempt to write the Redbrick revolution back into history William Whyte argues that these institutions created a distinctive and influential conception of the university something that was embodied in their architecture and expressed in the lives of their students and staff It was this Redbrick model that would shape their successors founded in the twentieth century ensuring that the normal university experience in Britain is a Redbrick one Using a vast range of previously untapped sources Redbrick is not just a new history but a new sort of university history one that seeks to rescue the social and architectural aspects of education from the disregard of previous scholars and thus provide the richest possible account of university life It will be of interest to students and scholars of modern British history to anyone who has ever attended university and to all those who want to understand how our higher education system has developed and how it may evolve in the future **Urban Design and the British Urban Renaissance** John Punter,2009-10 An insightful exploration of the strengths weaknesses and implications of New Labour s urban renaissance agenda experts in urban design and planning critically review the development and application of the strategy in Britain s largest cities RIBA Journal ,1993 **Understanding Urban Cycling** Justin Spinney,2020-10-28 Academic interest in cycling has burgeoned in recent years with significant literature relating to the health and environmental benefits of cycling the necessity for cycle specific infrastructure and the embodied experiences of cycling Based upon primary research in a variety of contexts such as London Shanghai and Taipei this book demonstrates that recent developments in urban cycling policy and practice are closely linked to broader processes of capital accumulation It argues

that cycling is increasingly caught up in discourses around smart cities that emphasise technological solutions to environmental problems and neoliberal ideas on individual responsibility and bio political conduct which only results in solutions that prioritise those who are already mobile Accordingly the central argument of the book is not that the popularisation of cycling is inherently bad but that the manner in which cycling is being popularised gives cause for social and environmental concern Ultimately the book argues that cycling has now become a vehicle for sustaining pro growth agendas rather than subverting them or shifting to sustainable no growth de growth and less technologically driven visions of modernity This book makes an innovative contribution to the fields of Cycling Studies Mobilities and Transport and will be of interest to students and academics working in Human Geography Transport Studies Urban Studies Urban Planning Public Policy Sociology and Sustainability Urban Design: Green Dimensions Peter Shirley,J. C. Moughtin,2006-08-11 In Green Dimensions Cliff Moughtin relates sustainable development and green design to the realm of urban design and development Examining regional and local frameworks for design and planning this book shows how sustainable urban design can be implemented on every scale Working from a strong theoretical base the author uses case studies and discusses policy developments in order to challenge the conventional wisdom on sustainable design The book provides a rounded discussion of the application and suitability of current practice and predicts future design needs Updating the reader on topics such as energy efficiency sustainable city forms and the culture of new urbanism this completely revised and restructured second edition also includes brand new chapters on the Urban Park and Bio diversity **The Architectural Review** ,1993

Imagining the Future City Sarah Bell,James Paskins,2013-11-18 London is one of the world s leading cities It is home to an extraordinary concentration and diversity of people industries politics religions and ideas and plays an important role in our highly globalised and tightly networked modern world What does the future hold for London Investigating any aspect of the city s future reveals a complex picture of interrelations and dependencies The London 2062 Programme from University College London brings a new cross disciplinary and highly collaborative approach to investigating this complexity The programme crosses departmental boundaries within the university and promotes active collaboration between leading academics and those who shape London through policy and practice This book approaches the question of London s future by considering the city in terms of Connections Things Power and Dreams **Blueprint** ,1996
