The Riddles of Philosophy
Rudolf Steiner, 2009-08 Written in 1909 CW 13 Esoteric science is the science of what takes place esoterically in the sense that it is perceived not outside in nature but where one s soul turns when it directs its inner being toward the spirit Esoteric science is the opposite and counterpart of natural science Rudolf Steiner This masterwork of esotericism places humankind at the very heart of the vast invisible processes of cosmic evolution When we use the term natural science don t we mean that we are dealing with human knowledge of nature Steiner worked and reworked his Rosicrucian cosmology to make it increasingly precise and accurate *An Outline of Esoteric Science* is as vital and relevant now as it was when first published in 1910 and remains the most comprehensive and effective presentation of a spiritual alternative to contemporary materialistic cosmologies and a strict Darwinian view of human nature and evolution In this foundational work of spiritual science we see how the creation and evolution of humanity is embedded at the heart of the vast invisible web of interacting

cosmic beings through whom the alchemical processes of cosmic evolution continue to evolve Included are descriptions of the physical spiritual makeup of the human being the relationships of the different bodies of the human being to sleep and death and a detailed practical guide to methods and exercises including the Rose Cross Meditation through which we can attain knowledge of the spiritual worlds The most remarkable and revolutionary aspect of this work is the central function that Steiner attributes to the Christ and his involvement in human and earthly evolution through the Mystery of Golgotha An Outline of Esoteric Science is essential reading for all serious students of esoteric spirituality and Anthroposophy This foundational guide to Spiritual Science is a translation of Die Geheimwissenschaft im Umriss GA 13 *The Illustrated American* ,1891
