Gérard,2000 Everyone eschews labels yet we all seem to possess them in the minds of legions of politicians marketers and even the ever peering government We are being targeted daily by flaming liberals left wing liberals right wing conservatives compassionate conservatives religious conservatives and liberals pinko liberals middle of the road liberals conservatives and liberals pinko liberals middle of the road liberals and conservatives and of course by neoconservatives and neoliberals The search is on for kindred souls the types who will open their wallets to support whatever it is the hucksters are peddling But what to these concepts mean and do their torchbearers grasp the underlying philosophies or do they care This bibliography lists over hundreds of entries under each category which are then indexed by title an author *A Dictionary of Conservative and Libertarian Thought (Routledge Revivals)* Nigel Ashford,Stephen Davies,2012-06-25 First published in 1991 this is a reissue of the path breaking Dictionary of Conservative and Libertarian Thought the first book to examine the ideals and arguments produced by the intellectual traditions of both conservatism and classical liberalism Covering the ideas of many such distinguished thinkers as Hayek Scruton Friedman and Buchanan the volume provides a valuable survey of the historical development of both schools of thought in all of the major western countries and their contributions to contemporary debates From American Conservatism to French Liberalism Invisible Hand to Organic Society from Scientism to Scepticism and Utopianism to Voluntarism this is a vital work whose reissue will be welcomed as much by the keen layperson as by students of political science the history of philosophy economics and public policy **In Search of a Political Philosophy** W. Explaining Political Disagreement Andrew Mason, 1993-08-27 This book considers a variety of explanations of why political disagreement is so extensive and persistent The author examines variants of the contestability and imperfection conceptions which have dominated political theory the

idea that political disagreement is so pervasive because of its value ladenness that key political concepts are essentially contested that those who occupy very different political positions fail to understand each other He argues that we need to develop a framework which borrows elements from both schools of thought presupposing some form of moral cognitivism while recognizing that many political disputes cannot be resolved to the satisfaction of every reasonable person Within such a framework he shows how empirical models can be constructed which give an active role not only to the agent s reasons for his or her beliefs but also to other psychological and sociological considerations

From Political Theory to Political Theology

Péter Losonczi,Aakash Singh,2010-03-18 During the last two decades we have witnessed what Jos Casanova has characterised as religion going public This has not been a trend exclusive to traditionally religious nations Rather it has been visible in as diverse environments as that of the construction of the new Russian political identity or in the post 9 11 political discourses of the

USA Surprisingly important religious manifestations also influenced the political discourses in Britain and more recently in France Partly as a consequence of these phenomena an intensive debate is now evolving about the compatibility of the neutrality of liberal democracy in relation to religiously motivated opinions in public discourses and the conditions under which such religiously driven contributions could viably go public This book offers a collection of essays on Religion and Democracy which critically discusses the most important questions that characterize these debates at the points of their intersection within political theory political theology and the philosophy of religion and considers both the challenges and the prospects of this new era which following Habermas one may call post secular
