B. Jensen, 1993 *Animal Farm* Richard Peaslee, 1986 Do Animals Have Rights? Alison Hills, 2005-03-03 In this highly accessible book Alison Hills steers a careful path between often impractical poles of thought and for once provides a practical and liveable idea of the ethics of animals Telling the story of how animals have been thought of through human history she argues in particular that we must distinguish between species all animals are not in fact equal *The Case for Animal Rights* Tom Regan, 1983 THE argument for animal rights a classic since its appearance in 1983 from the moral philosophical point of view With a new preface

Project Animal Farm Sonia Faruqi, 2015-07-15 Sonia Faruqi had an Ivy League degree and a job on Wall Street But when the banking industry collapsed she found herself on a small organic dairy farm that would change her life for the better although it didn't seem that way in the beginning First she had to come to grips with cows shocked into place cannibal chickens and free range turkeys that went nowhere But there were bright lights as well happy frolicking calves on a veal farm and farmers who cared as much about the animals as their pocketbooks What started as a two week volunteer vacation turned into a journey that reached into the darkest recesses of the animal agriculture industry Surrounded by a colorful cast of characters Faruqi's quest to discover the truth about modern agribusiness took her around the world Lively edgy and balanced Project Animal Farm sheds light on the international agribusiness with the ultimate goal of improving the lives of farm animals here at home Using her finance background to forecast the future of agriculture Faruqi discusses the changes we need to make using our forks and our votes *Animal farming* Colin T. Whittemore, 2023-09-04 Animal farming is a readable thought provoking honest and unstuffy account of what really happens on Europe's and Britain's animal farms and how animal farming came to be that way Stories behind modern farming practices are revealed and concerns are raised over how our farms will look in the future Fascinating insights and unpalatable questions are presented into the ways that animals are often wrongly fed bred housed and managed Learning comes from failures so the book is more about failures than

successes The author combines well researched facts with well found experience He commends and condemns in equal measure often in unexpected ways A broad range of subjects is covered in the book What domestication now means for farm animals How selective breeding has changed them for better and worse The mixed blessings of government support and subsidisation The story of abuse of animals rights and welfare is dealt with in detail as are ideas of respect and compassion and the inadequate ways in which animals are fed The author describes a broken marketing system for livestock products and also considers organic farming Lastly in the present environment of agricultural upheaval in Europe how can science and technology take animal farming forward What are the chances of the wrongs being righted what will tomorrow s farmed animals be for

The Future of Animal Farming Marian Stamp Dawkins,Roland Bonney,2011-09-20 Does animal welfare have a place in sustainable farming or do the demands of a rising human population and the threat of climate change mean that the interests of animals must be put aside Can we improve the way we keep animals and still feed the world or is it a choice between ethics and economics The aim of this book is to challenge the them and us thinking that sets the interests of humans and farm animals against each other and to show that to be really sustainable farming needs to include not ignore animal welfare The authors of this remarkable book come from a diversity of backgrounds industry animal welfare organizations academic institutions and practical farming They are united in arguing that farm animals matter and that sustainable farming must have animal welfare at its ethical core along with the production of healthy affordable food and care for the environment

Constitutional Law: Rights, Liberties and Justice 8th Edition Lee Epstein,Thomas G. Walker,2013 Judicial decisions never occur in a vacuum they are influenced by a myriad of political factors From lawyers and interest groups to the shifting sentiments of public opinion to the ideological and behavioral inclinations of the justices Epstein and Walker show how all these dynamics play an integral part in the overall development of constitutional doctrine Drawing deeply from the spheres of political science and legal studies the exceperated case material is skillfully analyzied and presented for today s students Known for fastidious revising and streamlining the authors account for the latest scholarship in the field and offer rock solid analysis of recent landmark cases including as all the important opinions handed down through 2011 Building on the successes of the 7th edition the book s clean layout and design clearly distinguishes between commentary and opinion excerpts Not only does the design make the book an easier read for students it effectively showcases photos justice biographies and the Aftermath and Global Perspective sidebars And based on positive user feedback the authors have added even more Aftermath boxes in this new edition New cases in the 8th edition Hosanna Tabor Evangelical Lutheran Church and School v Equal Employment Opportunity Commission 2012 Snyder v Phelps 2011 Brown v Entertainment Merchants Association 2011 United States v Jones 2012 Citizens United v Federal Election Commission

Animals, Ethics and Trade Joyce D'Silva,Jacky Turner,2012-05-16 Modern urban life cuts us off from direct connection

with the animal world yet daily the lives of millions of animals are affected by what we consume and wear and what we trade in. The use of animals for food, labour and pleasure pursuits has long been justified with the assumption that unlike humans, animals aren't fully sentient beings. In recent years, however, science has revealed an astonishing array of complex animal behaviour, and scientists and policy makers now accept that the animals we make use of are indeed conscious with preferences and intentions. The implications for our culture of factory farming, fast food and rainforest liquidation are staggering. In this powerful book, internationally renowned experts on animal behaviour and agriculture such as Jane Goodall, Tim Lang and Vandana Shiva are brought together with ethicists, religious scholars, international industry and regulators for the first time to debate these critical issues and tackle the profound implications of animal sentience. The first sections discuss scientific and ethical perspectives on the consciousness, emotions and mental abilities of animals. Later sections address how human activities such as science, law, religion, farming, food production, trade, development and education respect or ignore animals' sentience and welfare and review the options for changes in our policies, our practices and our thinking. The result is nothing less than a stark and necessary look into the heart of humanity and the ethics that govern our animal-powered society.

Animal Satire Robert McKay, Susan McHugh, 2023-08-22. *Animal Satire* presents a cultural history of animal satire, a critically neglected but persistent presence in the history of cultural production in which animals expose human folly while the strategies of satire expose the folly of human-animal relations. Highlighting the teeming animal presences across the history of satirical expression from Aristophanes to Twitter, with chapters on key works of literature, drama, film and a plethora of satirical media, *Animal Satire* reveals the rich rhetorical significance of animality in powering the politics of satire from ancient and medieval through modern and contemporary times. More pressingly, the book makes the case for the significance of satire for understanding the real-world implications of rhetoric about animals in ongoing struggles for justice. By gathering both critical and creative examples from representative media forms, historical periods and continents, this volume aims to enrich scholarship on the history of satire as well as empower creative practitioners with ideas about its practical applications today.

The Anthropocene Judgments Project Nicole Rogers, Michelle Maloney, 2023-12-01. This book is a collection of speculative judgments that, along with accompanying commentaries, pursue a novel enquiry into how judges might respond to the formidable and planetary-scaled challenges of the Anthropocene. The book's contributors from Australia, Asia, Europe and the United Kingdom take up a range of issues including multispecies justice, the challenges of intergenerational justice, dimensions of postcolonial justice, the potential contribution of AI platforms to the judgment process and the future of judging and law in and beyond the Anthropocene. The project takes its inspiration from existing critical judgment projects. It is, however, thoroughly interdisciplinary. In anticipating future scenarios and designing or adapting legal principles to respond to them, the book's contributors have been assisted by climate scientists with expertise in future modelling; they have benefitted from the experience of fiction writers in future worldbuilding and

they have incorporated elements of the future worlds depicted in various texts of speculative fiction and artworks The judgments are of necessity speculative and hypothetical in their subject matter Thus taken together they constitute a collaborative experiment in creating the inclusive and radical imaginaries of the future common law The Anthropocene Judgments Project will appeal to critical and sociolegal academics scholars in the environmental humanities environmental lawyers students and others with interests in the pressing issues of ecology multispecies justice climate change the intersection of AI platforms and the law and the future of law in the Anthropocene

Food, Justice, and Animals Josh Milburn, 2023-03-21 How would we eat if animals had rights A standard assumption is that our food systems would be plant based But maybe we should reject this assumption Indeed this book argues that a future non vegan food system would be permissible on an animal rights view It might even be desirable In Food Justice and Animals Feeding the World Respectfully Josh Milburn questions if the vegan food system risks cutting off many people s pursuit of the good life risks exacerbating food injustices and risks negative outcomes for animals If so then maybe non vegan food systems would be preferable to vegan food systems if they could respect animal rights Could they The author provides a rigorous analysis of the ethics of farming invertebrates producing plant based meats developing cultivated animal products and co working with animals on genuinely humane farms arguing that these possibilities offer the chance for a food system that is non vegan but nonetheless respects animals rights He argues that there is a way for us to have our cake and eat it too because we can have our cow and eat her too
