International Financial History in the Twentieth Century Marc Flandreau, Carl-Ludwig Holtfrerich, Harold James, 2003 The essays written by leading experts examine the history of the international financial system in terms of the debate about globalization and its limits In the nineteenth century international markets existed without international institutions A response to the problems of capital flows came in the form of attempts to regulate national capital markets for instance through the establishment of central banks In the inter war years there were largely unsuccessful attempts at designing a genuine international trade and monetary system and at the same time coincidentally the system collapsed In the post 1945 era the intended design effort was infinitely more successful The development of large international capital markets since the 1960s however increasingly frustrated attempts at international control The emphasis has shifted in consequence to debates about increasing the transparency and effectiveness of markets but these are exactly the issues that already dominated the nineteenth century discussions

Business in Britain in the Twentieth Century Richard Coopey, Peter Lyth, 2009-08-13 This collection of fresh incisive scholarship by some of the leading business historians critically examines the nature of economic recovery in Britain in recent years Covering the key issues for business history in this period the book confronts the traditional literature on conclusions of relative decline and monocausal simplistic explanations It provides an impressive range of studies forming a platform for a new debate on the nature of British business in the 20th century Themes include productivity management research and development marketing regional clusters and networks industrial policy the use of technology and gender Sector studies include newer post war hopefuls and successes including aerospace IT retail banking overseas investment the creative industries The book demonstrates that our understanding of the historic strengths and weaknesses of business in Britain and the shifting balance between sectors of the economy has until now been poorly understood and that British business history needs a fundamental reappraisal

The Performance of European Business in the Twentieth Century Youssef Cassis, Andrea Colli, Harm Schröter, 2016-07-21 This book originated from the idea that performance is what really matters in business and thus in business history Yet surprisingly the analysis of performances has been neglected by economic and business historians This book is a first attempt to fill this gap and in doing so provides a totally new approach to European business history Rather than bringing together national studies it is based on a single database measuring performance in eight European countries according to identical criteria The study spans the entire twentieth century with particular attention to five benchmark moments the height of the

first globalisation on the eve of the First World War the late 1920s boom preceding the Great Depression the European reconstruction of the mid 1950s the end of Golden Age in the early 1970s and the height of the second globalisation at the turn of the twenty first century The analysis is based on a sample of 1 225 companies belonging to the three major European economies Britain France and Germany two large south European latecomers Italy and Spain two smaller north western countries Belgium and Sweden and one small Nordic country Finland Performance has been measured using two ratios of profitability return on equity ROE and holding return HR thus providing a complementary measure of profitability the former as seen from the firm s perspective the latter from the investor s perspective The book s findings at times surprising at once confirm and infirm widely held assumptions regarding business performance regarding strategy and structure ownership and control old and new industries emerging and advanced economies Multinational Corporations Paz Estrella

Tolentino,2003-09-02 This work presents case studies of the emergence and evolution of Multinational Corporations MNCs based in eleven developed and developing countries of widely divergent patterns of national development From this analysis Tolentino develops a comprehensive theory of the emergence and evolution of MNCs from a macroeconomic perspective

Agility and Decision Making Daniel Wagner and Dante Disparte two leading authorities in global risk management make a

compelling case for the need to bring traditional approaches to risk management and decision making into the twenty first century Based on their own deep and multi faceted experience in risk management across numerous firms in dozens of countries the authors call for a greater sense of urgency from corporate boards decision makers line managers policymakers and risk practitioners to address and resolve the plethora of challenges facing today s private and public sector organizations Set against the era of manmade risk where transnational terrorism cyber risk and climate change are making traditional risk models increasingly obsolete they argue that remaining passively on the side lines of the global economy is dangerous and that understanding and actively engaging the world is central to achieving risk agility Their definition of risk agility taps into the survival and risk taking instincts of the entrepreneur while establishing an organizational imperative focused on collective survival The agile risk manager is part sociologist anthropologist psychologist and quant Risk agility implies not treating risk as a cost of doing business but as a catalyst for growth Wagner and Disparte bring the concept of risk agility to life through a series of case studies that cut across industries countries and the public and private sectors The rich real world examples underscore how once mighty organizations can be brought to their knees and even their demise by simple miscalculations or a failure to just do the right thing The reader is offered deep insights into specific risk domains that are shaping our world including terrorism cyber risk climate change and economic resource nationalism as well as a frame of reference from which to think about risk management and decision making in our increasingly complicated world This easily digestible book will shed new light on the often complex discipline of risk management Readers will learn how risk management is being transformed from a business prevention function to a values based framework for thriving in increasingly perilous times From tackling governance structures and the tone at the top to advocating for greater transparency and adherence to value systems this book will establish a new generation of risk leader with clarion voices calling for greater risk agility The rise of agile decision makers coincides with greater resilience and responsiveness in the era of manmade risk
