Rio Azul An Ancient Maya City:

Río Azul Richard E. W. Adams, 1999 Deep within the forest in northern Guatemala lie the ruins of Río Azul a Maya city that reached one third the size of Tikal Discovered and partially explored in the early 1960s Río Azul and the surrounding region were more fully investigated between 1983 and 1987 by an archaeological team led by Richard E W Adams In this summary Adams integrates the findings of field archaeologists with those of the epigraphers and art historians to recreate the life of this Maya city from the little known Early Classic period Remains in the Río Azul area date from 900 B C to A D 850 The data indicate that unlike most Maya cities that have been studied Río Azul was a frontier town an administrative center with alternating defense and trade outpost functions About A D 385 the Río Azul region was conquered and the city founded by Tikal serving as a Teotihuacan linked garrison for that capital Nearly all of the more than seven hundred structures found within Río Azul were erected between A D 390 and 530 Acres of pavement were laid down around some thirty complexes of residences temples and tombs notable for the brightly painted red hieroglyphs and murals on their walls The elaborate complexes and sumptuous artifacts suggest a city with a heavy proportion of aristocratic families and retainers Around A D 530 Río Azul appears to have been suddenly destroyed The city was abandoned then reoccupied only to stagnate and finally collapse like many other Classic Maya cities in the late ninth century

[The Maya and Teotihuacan](#) Geoffrey E. Braswell, 2009-07-21 The contributors to this volume present extensive new evidence from archaeology iconography and epigraphy to offer a more nuanced understanding of the interaction between the Early Classic Maya and Teotihuacan Winner Choice Outstanding Academic Book 2005 Since the 1930s archaeologists have uncovered startling evidence of interaction between the Early Classic Maya and the great empire of Teotihuacan in Central Mexico Yet the exact nature of the relationship between these two ancient Mesoamerican civilizations remains to be fully deciphered Many scholars have assumed that Teotihuacan colonized the Maya region and dominated the political or economic systems of

certain key centers perhaps even giving rise to state level political organizations Others argue that Early Classic rulers merely traded with Teotihuacan and skillfully manipulated its imported exotic goods and symbol sets to increase their prestige Moving beyond these traditional assumptions the contributors to this volume present extensive new evidence from archaeology iconography and epigraphy to offer a more nuanced understanding of the interaction between the Early Classic Maya and Teotihuacan Investigating a range of Maya sites including Kaminaljuyu Cop n Tikal Altun Ha and Oxkintok they demonstrate that the influence of Teotihuacan on the Maya varied in nature and duration from site to site requiring a range of models to explain the patterns of interaction Moreover they show that the interaction was bidirectional and discuss how the Maya in turn influenced Teotihuacan

Ancient Maya Political Economies Marilyn A. Masson, David A. Demarest, Prudence M. Rice, Don S. Rice, 2005 The Terminal Classic in the Maya Lowlands revisits one of the great problems in Mayan archaeology the apparent collapse of Classic Maya civilization from roughly A D 830 to 950 During this period the Maya abandoned their power centers in the southern lowlands and rather abruptly ceased the distinctive cultural practices that marked their apogee in the Classic period Archaeological fieldwork during the past three decades however has uncovered enormous regional variability in the ways the Maya experienced the shift from Classic to Postclassic society revealing a period of cultural change more complex than acknowledged by traditional models Featuring an impressive roster of scholars The Terminal Classic presents the most recent data and interpretations pertaining to this perplexing period of cultural transformation in the Maya lowlands Although the research reveals clear interregional patterns the contributors resist a single overarching explanation Rather this volume s diverse and nuanced interpretations provide a new more properly grounded beginning for continued debate on the nature of lowland Terminal Classic Maya civilization
