## **Rise Of The Image:**

**The Rise of the Image** Thomas Frangenberg, 2017-07-05 The Rise of the Image reveals how illustrations have come to play a primary part in books on art and architecture Italian Renaissance art is the main focus for this anthology of essays which analyse key episodes in the history of illustration from the sixteenth to the twentieth century The authors raise new issues about the imagery in books on the visual arts by Leonardo da Vinci Giorgio Vasari Sebastiano Serlio Andrea Palladio Girolamo Teti and Andrea Pozzo The concluding essays evaluate the roles of reproductive media including photography in Victorian and twentieth century art books Throughout images in books are considered as vehicles for ideas rather than as transparent passive visual forms dependent on their accompanying texts Thus The Rise of the Image enriches our understanding of the role of prints in books on art The Rise of the Image, the Fall of the Word Mitchell

Stephens, 1998-10-08 For decades educators and cultural critics have deplored the corrosive effects of electronic media on the national consciousness The average American reads less often writes less well And numbed by the frenetic image bombardment of music videos commercials and sound bites we may also it is argued think less profoundly But wait Is it just possible that some good might arise from the ashes of the printed word Most emphatically yes argues Mitchell Stephens who asserts that the moving image is likely to make our thoughts not more feeble but more robust Through a fascinating overview of previous communications revolutions Stephens demonstrates that the charges that have been leveled against television have been faced by most new media including writing and print Centuries elapsed before most of these new forms of communication would be used to produce works of art and intellect of sufficient stature to overcome this inevitable mistrust and nostalgia Using examples taken from the history of photography and film as well as MTV experimental films and Pepsi commercials the author considers the kinds of work that might unleash in time the full power of moving images And he argues that these works an emerging computer edited and distributed new video have the potential to inspire transformations in thought on a level with those inspired by the products of writing and print Stephens sees in video s complexities simultaneities and juxtapositions new ways of understanding and perhaps even surmounting the tumult and confusions of contemporary life Sure to spark lively even heated debate The Rise of the Image the Fall of the Word belongs in the library of millennium watchers everywhere **The Rise of Big Spatial Data** Igor Ivan, Alex Singleton, Jiří Horák, Tomáš

Inspektor, 2016-10-14 This edited volume gathers the proceedings of the Symposium GIS Ostrava 2016 the Rise of Big Spatial Data held at the Technical University of Ostrava Czech Republic March 16 18 2016 Combining theoretical papers and applications by authors from around the globe it summarises the latest research findings in the area of big spatial data and key problems related to its utilisation Welcome to dawn of the big data era though it s in sight it isn t quite here yet Big spatial data is characterised by three main features volume beyond the limit of usual geo processing velocity higher than that available using conventional processes and variety combining more diverse geodata sources than usual The popular term

denotes a situation in which one or more of these key properties reaches a point at which traditional methods for geodata collection storage processing control analysis modelling validation and visualisation fail to provide effective solutions

Entering the era of big spatial data calls for finding solutions that address all small data issues that soon create big data troubles Resilience for big spatial data means solving the heterogeneity of spatial data sources in topics purpose completeness guarantee licensing coverage etc large volumes from gigabytes to terabytes and more undue complexity of geo applications and systems i e combination of standalone applications with web services mobile platforms and sensor networks neglected automation of geodata preparation i e harmonisation fusion insufficient control of geodata collection and distribution processes i e scarcity and poor quality of metadata and metadata systems limited analytical tool capacity i e domination of traditional causal driven analysis low visual system performance inefficient knowledge discovery techniques for transformation of vast amounts of information into tiny and essential outputs and much more These trends are accelerating as sensors become more ubiquitous around the world
