**Literature and the Metaphoric Universe in the Mind** Nicolae Babuts,2017-07-05 Nicolae Babuts believes that the  
study of metaphoric thought and literature can be enriched by the application of recent discoveries from neuroscientific c  
experiments He maintains that metaphors are neither linguistic formations nor conceptual formations but instead the  
product of association of images and language They are a matter of vision Memory is an essential component in the creation  
of meaning and is the way the mind receives messages from the outside world In this process of transferring data from the  
outside world the mind s overriding tendency is to integrate and interpret Thus incoming messages are recognized and given  
meaning whether they are in harmony with the inner world of the mind or in confl ict with it Babuts argues that the literature  
we read is related to our perception of reality And reality has two identities the physical identity of the outside world and its  
symbolic identity within memory The symbolic identity of the outside world is represented internally by the metaphoric

water within and between different kinds of ecosystems What happens when the flow or the availability of water is curtailed  
or diverted either naturally or by human activity How will climate change alter the availability of water and impact aquatic  
ecosystems Methodological developments from the simplest hydrological formulas to large scale frameworks that inform
