Congress. House. Committee on the Judiciary. Subcommittee on Administrative Law and Governmental Relations,1984 **Liability** Robert E. Litan,Clifford Winston,2010-12-01 The United States has recently witnessed an explosion of personal injury lawsuits involving medical malpractice unsafe products and widespread environmental hazards Jury awards and out of court settlements have escalated in many cases to hundreds of thousands of dollars At the same time premiums for liability insurance have skyrocketed As a result physicians have cut back services and some municipalities and businesses have been denied liability coverage altogether Some experts claim that only fundamental reform of the nation s civil justice system will end this insurance crisis But critics of such wholesale judicial reform contend that the insurance industry has launched a tort reform campaign to cover its own past underwriting mistakes Liability brings together economists and experts in liability law and the insurance industry to assess the merits of the conflicting positions and to formulate sound public policy Led by Robert Litan and Clifford Winston the contributors describe the major changes that have contributed to the insurance crunch and set forth a methodological framework for evaluating the debate over the current liability system They conclude that increases in premiums and cutbacks in coverage have been real but selective that the forces in the judicial system responsible for rising liability costs are not readily subject to change and that we know too little about the cost and benefits of the current tort system to replace it with an alternative compensation program **Health and Safety in Contemporary Britain** Paul Almond,Mike Esbester,2018-12-30 This book analyses the perceived legitimacy of health and safety in post 1960 British public life Since 2010 health and safety has appeared to be in crisis being attacked by press politicians and public alike but are these claims of crisis accurate How have understandings of health and safety changed over the past 60 years By exploring the history culture and operation of health and safety in contemporary Britain this book provides a new assessment of an understudied but surprisingly far reaching part of the British political and social landscape Combining archival research with focus group social survey and oral history testimony the book examines the historical background to health and safety how health and safety has been enacted in public and in the workplace the impact of changing economic occupational and social structures on the operation of health and safety and the conflicts and interests that have shaped the area
